DEPARTMENT OF DEFENSE APPROPRIATIONS BILL, 2015

JULY 17, 2014.—Ordered to be printed

Mr. DURBIN, from the Committee on Appropriations,
submitted the following

REPORT

[To accompany H.R. 4870]

The Committee on Appropriations, to which was referred the bill (H.R. 4870) making appropriations for the Department of Defense for the fiscal year ending September 30, 2015, and for other purposes, reports the same with an amendment in the nature of a substitute and recommends that the bill as amended do pass.

New obligational authority

Total of bill as reported to the Senate	\$542,771,568,000
Amount of 2014 appropriations	565,093,629,000
Amount of 2015 budget estimate	544,122,025,000
Amount of House allowance	563,865,320,000
Bill as recommended to Senate compared to—	
2014 appropriations	– 22,322,061,000
2015 budget estimate	– 1,350,457,000
House allowance	– 21,093,752,000

BACKGROUND

PURPOSE OF THE BILL

This bill makes appropriations for the military functions of the Department of Defense for the period October 1, 2014, through September 30, 2015. Functional areas include the pay, allowances, and support of military personnel, operation and maintenance of the forces, procurement of equipment and systems, and research, development, test and evaluation. Appropriations for foreign military assistance, military construction, family housing, nuclear weapons programs, and civil defense are provided in other bills.

HEARINGS

The Appropriations Subcommittee on Defense began hearings on March 5, 2014, and concluded them on June 18, 2014, after 11 separate sessions. The subcommittee heard testimony from representatives of the Department of Defense, other Federal agencies, and representatives of organizations.

SUMMARY OF THE BILL

The Committee recommendation of \$542,771,568,000 includes funding to develop, maintain, and equip the military forces of the United States and for other purposes in nonemergency appropriations.

The fiscal year 2015 budget request for activities funded in the Department of Defense appropriations bill totals \$544,122,025,000 in new budget authority, including \$59,868,030,000 in contingency funding for the Departments of State and Defense and \$514,000,000 in mandatory spending.

In fiscal year 2014, the Congress appropriated \$565,093,629,000 for activities funded in this bill. This amount includes \$480,066,687,000 in nonemergency appropriations and \$85,026,942,000 in overseas contingency operations appropriations. The Committee recommends that funds requested for Coast Guard overseas contingency operations be appropriated directly to the Department of Homeland Security.

The Committee recommendation in this bill is \$22,322,061,000 below the amount provided in fiscal year 2014 and \$1,350,457,000 below the amount requested for fiscal year 2015.

COMMITTEE RECOMMENDATIONS

The following table displays the recommendations for each title:

[In thousands of dollars]

	Fiscal year 2014 enacted	Fiscal year 2015 estimate	Committee recommendation
Title I—Military Personnel	128,796,287	128,957,593	128,430,543
Title II—Operation and Maintenance	159,869,726	166,002,818	165,786,003
Title III—Procurement	92,861,300	89,660,299	91,409,693
Title IV—Research, development, test and evaluation	62,994,741	63,533,947	62,566,834
Title V—Revolving and management funds	2,246,427	1,234,468	2,150,078
Title VI—Other Department of Defense programs	35,035,166	34,101,361	33,641,680
Title VII—Related agencies	1,042,229	1,024,194	1,023,374
Title VIII—General provisions (net)	–2,779,189	–260,685	–1,891,348
Title IX—Overseas Contingency Operations	85,023,942	58,469,030	58,255,711
Title X—Overseas Contingency Operations—Department of State		1,353,000	1,353,000
Title XI—Overseas Contingency Operations—Military Construc- tion		46,000	46,000
Net grand total	565,093,629	544,122,025	542,771,568
Total discretionary (incl. scorekeeping adjustments)	572,041,629	550,674,725	549,324,268

The Committee has displayed recommended adjustments in tables presented under each appropriation account.

These adjustments reflect the following Committee actions: elimination of funds requested for programs which are lower priority, duplicative, or not supported by firm requirements in out-year development or procurement appropriations; deletion of excess funds based on program delays or slow execution; addition of funds to reflect congressional priorities and to rectify shortfalls in the budget estimate; and implementation of recommendations in S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported.

The Committee directs that the funding increases outlined in these tables shall be provided only for the specific purposes indicated in the table.

CLASSIFIED PROGRAM ADJUSTMENTS

The Committee recommends adjustments to certain classified programs, as explained in the classified annex to the Committee's report.

DEFINITION OF PROGRAM, PROJECT AND ACTIVITY

In fiscal year 2015, for purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177), as amended, the term "program, project and activity" for appropriations contained in this act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2015 and the P-1 and R-1 budget justification documents as subsequently modified by congressional action. The following exception to the above definition shall apply: for the military personnel and operation and maintenance accounts the term "program, project and activity" is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

In carrying out any Presidential sequestration, the Department of Defense and agencies shall conform to the definition for "program, project and activity" set forth above.

REPROGRAMMING GUIDANCE

The Secretary of Defense is directed to continue to follow the reprogramming guidance for acquisition accounts as specified in the report accompanying the House version of the fiscal year 2008 Department of Defense Appropriations bill (House Report 110–279). For operation and maintenance accounts, the Secretary of Defense shall continue to follow the reprogramming guidelines specified in the conference report accompanying H.R. 3222, the Department of Defense Appropriations Act, 2008. The dollar threshold for reprogramming funds shall remain at \$15,000,000 for operation and maintenance; \$20,000,000 for procurement; and \$10,000,000 for research, development, test and evaluation.

In addition, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees annual DD Form 1416 reports for titles I and II and quarterly, spreadsheet-based DD Form 1416 reports for service and defense-wide accounts in titles III and IV of this act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of an operation and maintenance (O–1), a procurement (P–1), or a research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

COMMITTEE INITIATIVES

The Committee has included funding above the President's budget request for several programmatic initiatives which the Committee believes are of inherent value for national defense. In several cases, funds are restored for programs which were included in previous Department of Defense budget requests, and several are for programs that the Committee believes are necessary to improve defense even though they have not been included under the request formulated by the Department of Defense. For instance, the Committee provides additional research funding in the following areas: medical research, basic research, alternative energy, advanced metals and materials, military burn treatment, and traumatic brain injury and psychological health. The Committee believes additional research funding is warranted in these and other areas to ensure that the Department of Defense continues to pursue technological advances that are critical to our national defense. The Committee has also provided funding for programs that are chronically underfunded, such as range conservation; facility sustainment, restoration, and modernization; corrosion; and Defense Production Act purchases. The Committee directs that funds for these initiatives

are to be competitively awarded or provided to programs that have received competitive awards in the past.

TOBACCO USE IN THE MILITARY

Tobacco use is the leading cause of preventable death in the United States, with more than 480,000 deaths attributable to cigarette smoking each year. While great strides have been made over the past 50 years to reduce tobacco use in the U.S. military, use among Armed Forces servicemembers remains higher than in the population as a whole. According to a 2011 Department of Defense health behavior survey, 24 percent of servicemembers smoke, compared to 20 percent of civilians. The gap in smokeless tobacco use is even higher: according to the same Department survey, 12.8 percent of servicemembers used smokeless tobacco products, including electronic cigarettes, compared to 2.3 percent of the civilian population. Survey data show this usage is much higher among junior enlisted servicemembers than officers. A 2008 DOD study found that one in three military smokers began doing so after enlisting. The Institute of Medicine in 2009 noted that tobacco use costs the Department more than \$1,600,000,000 annually in tobacco-related medical care, increased hospitalizations, and lost days of work. In addition to these costs, smoking undermines military readiness by compromising physical fitness in the short-term, and causing or contributing to serious health problems, such as lung cancer and delayed wound healing, in the long-term.

The Department of Defense has affirmed the goal of a tobacco-free military, and has implemented a range of programs including public-education campaigns, the banning of all tobacco use during basic training, and the prohibition of tobacco use by instructors in the presence of students. However, inexpensive, readily available tobacco products remain a major driver of tobacco use, just as in the general population. In recognition of this, the Navy has led efforts to curb tobacco use and promote evidenced-based tobacco prevention strategies, such as eliminating the sale of tobacco in Navy commissaries and ending discounts on tobacco prices in Navy and Marine Corps exchanges in 2012. In 2012, the Air Force also set a goal of becoming tobacco-free. Earlier this year, the Secretary of Defense began a comprehensive review of the Department's tobacco policies.

The Committee applauds these efforts and encourages the Department to continue to advance rapidly toward a tobacco-free military. In support of these goals, the Committee includes a provision directing the elimination of the price subsidy provided to tobacco products at military exchanges. This reform directs the Department to implement a consistent, verifiable price benchmark for tobacco products at exchanges, as recent surveys by the National Institutes of Health indicate that Army and Air Force exchange prices for cigarettes in practice to be between 14–25 percent lower than market price, despite Department of Defense Instruction 1330.9, which allows only a 5 percent discount.

SEXUAL ASSAULT

The Committee remains extremely concerned with the level of sexual assault in the military. The most recent report from the De-

partment found cases of reported sexual assaults increased 50 percent over the past year. The Committee applauds the Department initiative to rescreen and retrain recruiters and sexual assault prevention officers but believes more needs to be done to create a culture throughout the military in which sexual assault is not tolerated.

The Committee also believes that victims of sexual assault should not be subjected to further alienation during the investigation and prosecution of their case. In January 2013, the Air Force began a Special Victims' Counsel pilot program that provides victims with a trained military lawyer to provide legal assistance and support as a case makes its way through the often arduous criminal justice process. The Committee commends the Air Force on this program and sees it as a positive step in giving victims the voice and support they deserve. The Consolidated Appropriations Act, 2014 included \$25,000,000 for the Department to implement the Special Victims' Counsel program across all the services. In order to build on this progress, the Committee includes an additional \$25,000,000 in fiscal year 2015 for the continuation and expansion of the Special Victims' Counsel program.

ISRAELI MISSILE DEFENSE PROGRAMS

The fiscal year 2015 budget request includes \$272,775,000 for Israeli missile defense programs within the Missile Defense Agency [MDA] budget, including \$175,972,000 for the procurement of Iron Dome, which concludes a previously made U.S. commitment to provide \$680,000,000 from fiscal years 2012 to 2015 for the Iron Dome program in response to a request from the Government of Israel. The Committee continues its strong, bi-partisan support for Israeli missile defense programs to ensure the fulfillment of Israel's missile defense needs and retention of Israel's qualitative military edge. The Committee notes the long-standing and successful contributions of U.S. industry towards meeting these goals, to include co-production of Arrow and David's Sling components; and, beginning in fiscal year 2014, co-production of Iron Dome.

Following submission of the fiscal year 2015 budget submission, the funding requirement for Iron Dome increased, and recommends an additional \$175,000,000, which brings U.S. investment in Iron Dome production since fiscal year 2011 to over \$1,000,000,000. The Committee notes that the Iron Dome program, which was developed by Israel solely with Israeli funding, is not subject to conditions of other joint Israeli-U.S. cooperative missile defense programs, but rather is governed by a Memorandum of Agreement signed in March 2014. Therefore, the Committee directs that funds appropriated in fiscal year 2015 for Iron Dome be subject to the terms and provisions of this Memorandum of Agreement, as amended to reflect an agreed-upon implementation plan between MDA and the Israeli Missile Defense Organization [IMDO].

In addition, the Committee directs that not more than \$175,972,000 may be obligated or expended for Iron Dome in fiscal year 2015 until IMDO provides additional justification and documentation to the United States Department of Defense and MDA containing a timeline for Iron Dome expenditure of funds included in the fiscal year 2015 budget request and any additional funds

recommended in fiscal year 2015, as well as a delivery schedule for items funded with these and prior year funds; and a report to MDA documenting full and complete delivery by Israeli industry and acceptance by U.S. industry suppliers of all technical data packages required for U.S. co-production of Iron Dome. Further, this report shall document that all export licenses required to enable the release of classified technical data packages from the U.S. prime contractor to U.S. subcontractors are completed; a common cost model of Iron Dome components—to be jointly developed and agreed upon by MDA and IMDO—that includes recurring and non-recurring engineering costs; actual Iron Dome production costs beginning in fiscal year 2013; and component lead-times and delivery schedules for each fiscal year thereafter.

The Committee expects that to fully satisfy the requirements listed above, the Government of Israel will provide to MDA copies of signed and ratified contracts, subcontracts, and teaming arrangements between Israeli and U.S. industry for all Iron Dome co-production efforts. The Committee understands that moving forward with Iron Dome co-production will not negatively impact development, test and production schedules of the Arrow and David's Sling programs, which the Committee continues to fully support. Therefore, the Committee recommends an additional \$173,800,000 for the Arrow and David's Sling programs.

CVN 73 REFUELING AND COMPLEX OVERHAUL [RCOH]

The fiscal year 2015 budget request includes no funds to continue the refueling and complex overhaul of CVN 73, USS *George Washington*. The Committee notes that \$329,700,000 has previously been appropriated in the Shipbuilding and Conversion, Navy account for the CVN 73 RCOH to support the aircraft carrier's dry-dock induction in September 2016. With the fiscal year 2015 budget submission, the Navy announced its intention to make a decision with the fiscal year 2016 budget submission as to whether to refuel or prematurely retire CVN 73. The Committee understands that deferring this decision creates significant programmatic and operational schedule delays for the RCOH.

CVN 73 has more than 20 years of service life remaining, and the Navy cannot meet all U.S. combatant commanders' requirements with the current aircraft carrier fleet. Furthermore, U.S. law requires the Navy to maintain not less than 11 operational aircraft carriers. The Committee notes that contrary to its previously stated position, the Navy has now decided to immediately continue CVN 73 RCOH with previously appropriated funds. The Committee fully supports this decision. Therefore, the Committee recommendation includes an additional \$849,800,000 in the Navy's military personnel, operation and maintenance, shipbuilding, and other procurement accounts to fully fund the fiscal year 2015 requirement for CVN 73 RCOH, which will mitigate the schedule delays caused by the Navy's inaction. The Committee expects the Navy to include all remaining funds required to complete the CVN 73 RCOH in the Future Years Defense Program accompanying the fiscal year 2016 budget submission.

SHIP MODERNIZATION, OPERATIONS AND SUSTAINMENT FUND [SMOSF]

The fiscal year 2015 budget request includes a new proposal by the Navy to remove 11 Ticonderoga-class guided missile cruisers and three amphibious dock landing ships from the operational fleet and lay them up for several years under a phased modernization plan. This proposal does not conform with direction provided in the Fiscal Year 2013 National Defense Authorization Act, the Fiscal Year 2014 National Defense Authorization Act, the Department of Defense Appropriations Act, 2013, and the Department of Defense Appropriations Act, 2014. The Committee notes that the Navy's proposal removes more Ticonderoga-class guided missile cruisers and amphibious dock landing ships from the operational fleet than previously proposed, relies on the congressional defense committees providing additional financial management and acquisition authorities, and the Navy's budget plan does not contain full funding in the outyears for this proposal.

The Committee does not support the Navy's proposal due to concerns over the duration of the proposed lay-up period for several of the ships, the additional authorities required, and severe doubts as to whether the Navy would execute the phased modernization plan as proposed given the volatility in Navy budgets in recent years. Further, the Committee is perturbed by the Navy's disregard for congressional direction provided for two consecutive years. Therefore, the Committee recommendation denies the Navy's proposal and instead recommends a modified modernization plan that conforms with the Navy's proposal to expand the application of SMOSF funds to four additional Ticonderoga-class guided missile cruisers and an additional amphibious dock landing ship, while modifying the induction schedule for the SMOSF ships' modernization. The Committee notes that the SMOSF contains over \$1,700,000,000, which is sufficient to fund this plan in the near-term and expects the Navy to budget for additional funds required in the mid- and long-term.

ENGAGEMENT ON ARCTIC ISSUES

The Committee notes that the physical changes in the Arctic are unprecedented in both their rate and scope of change. In addition to the economic and social concerns, numerous studies, including the 2010 and 2014 Quadrennial Defense Reviews and the U.S. Navy Arctic Roadmap, have documented the significant impact that a rapidly changing Arctic has on national security, to include an increasing number of vessels expected to be operating in the Arctic Ocean in the summer and fall months.

The Arctic Council has grown significantly in recent years with increased influence, visibility, and membership. As of May 2013, China, Japan, Singapore, India, the Republic of Korea, and Italy have been granted observer status. In 2015, the United States will assume its 2-year Chair of the Arctic Council, succeeding Canada in this role. In view of the increasing significance and importance of the Arctic Council, and the United States' upcoming leadership in this body, the Committee urges the Secretary of Defense to continue to examine ways the Department can support engagement on Arctic issues, including funding for better Arctic Domain Aware-

ness, mapping the U.S. Arctic waters, and enhanced observations and prediction of Arctic weather, ocean, and ice conditions.

NATIONAL SECURITY IMPLICATIONS OF CLIMATE CHANGE

The Committee commends the Department for its ongoing review of the effect of sea-level rise, shifting climate zones and severe weather events on the Department's bases worldwide. As the 2014 Quadrennial Defense Review notes, "The impacts of climate change may increase the frequency, scale, and complexity of future missions, including defense support to civil authorities, while at the same time undermining the capacity of our domestic installations to support training activities." In light of the potential operational risks, the Under Secretary of Defense for Policy is directed to provide a report to the congressional defense committees within 90 days of enactment of this act identifying the most serious and likely climate-related security risks for each combatant command and the ways in which the combatant commands are integrating mitigation of these risks into their planning processes, including in the areas of humanitarian disaster relief, security cooperation, building partner capacity, and sharing best practices for mitigation of installation vulnerabilities. The report shall provide a description of the resources required for an effective response and the timeline of when those resources will be needed.

CYBER SECURITY: ROLES OF FEDERAL RESEARCH ORGANIZATIONS

The Committee remains concerned about continued ambiguities in the roles and responsibilities of various government entities with regard to our Nation's cyber defense. The Departments of Defense, Homeland Security, and Justice each have major roles to play in defining a cyber defense posture, as do State and local governments, academia, industry, and others.

The Committee wishes to better understand the roles that can, or should, be played by Federally Funded Research and Development Centers [FFRDC], National Laboratories, University Affiliated Research Centers [UARC], the military service's research laboratories, and similar organizations, all of which could provide substantial expertise in cyber security, but whose actions in this regard must be carefully coordinated to most efficiently utilize the resources available to address this difficult topic.

The Committee directs the Department to brief congressional defense and intelligence committees on the Department's governance construct to apportion, deconflict, and evaluate the cyber security research and development efforts among the Nation's FFRDCs, National Laboratories, UARCs, military research laboratories, and similar organizations, as well as whether expanding relationships with these organizations is warranted. To the extent practical, this brief should also address cyber security areas in which the Department of Defense recognizes that the Departments of Homeland Security and Justice have the leading role. Finally, the Committee recognizes the contributions of the Department in working with the Council of Governors on forming a Joint Action Plan for State-Federal Unity of Effort on Cybersecurity and encourages the Department to continue its collaborative efforts.

CYBER RED TEAM CAPABILITIES

The identification of cyber vulnerabilities is critical to protecting the Nation from adversaries in the cyber domain and the Committee commends the Department's efforts to enhance and develop cyber threat emulation capabilities through the use of cyber red teams. The Committee also supports efforts of the Department of Defense and U.S. Cyber Command to create a Cyber Mission Force consisting of several categories of cyber teams and urges the Department to consider recognizing a formal requirement for the expertise and competencies resident within cyber red teams. Moreover, the Committee is concerned that existing cyber red team capacity be maintained during the Cyber Mission Force transition to meet the increasing demand for cyber threat emulation, training, and skill development. Accordingly, the Department of Defense, Services, and National Guard shall not reduce cyber red team capacity or unit strength. In addition, the Committee directs the Department to brief the defense subcommittee, no later than 90 days after enactment of this act, regarding the current and future requirements for cyber red team capabilities and its initiatives to retain and enhance cyber red team capacity.

DEFENSE CYBER TRAINING AND EDUCATION

The Committee understands that U.S. Cyber Command and other Department of Defense elements have made substantial progress in maturing the military's plans to incorporate cyber requirements into training and doctrine. The Department's 2011 Strategy for Operating in Cyberspace stated that continued education and training will be hallmarks of the cyber workforce. The Committee directs the Secretary of Defense to report to congressional defense committees, within 180 days of the enactment of this act, on a plan for its cyber education program for officers and enlisted personnel. The report shall include definitions of military occupational specialties/rating specialties for each service along with the corresponding level of training, education, qualifications, and/or certificates required for each specialty, covering the full continuum of professional development from initial entry training to senior service war colleges.

CYBER RESEARCH AND DEVELOPMENT WITH UNIVERSITIES

The National Security Agency [NSA], in coordination with the Department of Homeland Security, currently sponsors the National Centers of Academic Excellence in Information Assurance Education and Information Assurance Research. Within the Information Systems Security Program [ISSP], the NSA conducts classified cyber-related research and development program through partnerships with certain universities. The Committee understands that these relationships with universities have proven productive. Accordingly, the Committee recommends an additional \$7,500,000 to support these relationships with academia.

AWARD AND INCENTIVE FEES

In 2006, the Government Accountability Office [GAO] reviewed 50 programs and determined that between April 2006 and October

2010, the Department of Defense could save in excess of \$450,000,000 by not offering contractors a second opportunity to win unearned fees, and save more than \$68,000,000 by using more clearly defined determination criteria. After the Department of Defense updated its guidance, the GAO issued a follow-up report in May 2009 that highlighted where implementation of the new award/incentive fee guidance resulted in savings. The follow-up report also recommended that the Secretary of Defense further promote the application of the updated guidance. To better understand the extent to which the Department of Defense has implemented the updated guidance, the Committee directs the GAO to review the original 50 programs to determine the actual amount of unearned award/incentive fees that were saved. The Committee further directs the GAO to assess additional policy changes that could be implemented to guarantee that contractors are only awarded performance bonuses that they have earned.

FIRE AND BUILDING SAFETY ACCORD

The Committee commends the Marine Corps Trademark and Licensing Office for adopting a requirement to abide by the Accord for Fire and Building Safety in Bangladesh. The Committee includes a general provision implementing this standard across all the services' exchanges for garments produced by the exchanges' private label brands and to the extent practicable, for garments provided by vendors and suppliers.

The Committee includes a second general provision directing the trademark and licensing offices of the services to adopt a requirement that its licensees which manufacture in Bangladesh also become signatories to the Accord or otherwise abide by its conditions. Further, in order to better understand the magnitude of Department of Defense purchases from businesses worldwide which may have similar safety and labor violations, the Secretary of Defense is directed to provide annual reports, no later than March 1 of each year, to the congressional defense committees, which disclose all factories producing private label and direct-import garments sold in the commissary and exchange systems, including factory name, address, and brand(s), private label(s), licensee(s) or retail supplier(s) sourcing from that factory from the prior year.

HUMAN RIGHTS VETTING

Section 8056 prohibits training, equipment, or other assistance for the members of a unit of a foreign security force if the Secretary of Defense has credible information that the unit has committed a gross violation of human rights. In a modification from current law, the Committee recommendation limits the exception in subsection (b) and broadens the waiver authority in subsection (c). Section 8056 does not require, and the Committee does not expect, a unit or members of such unit to be vetted for eligibility to receive such training, equipment, or other assistance prior to the Secretary's use of the waiver authority in subsection (c).

NATIONAL SECURITY AGENCY REPORTS

The Committee directs the National Security Agency [NSA] to provide to the congressional intelligence committees, and the Senate Committee on the Judiciary, and the House Committee on the Judiciary, no later than 90 days after enactment of this act:

- A report, unclassified to the greatest extent possible, setting forth:
 - For the last 5 years, on an annual basis, the number of records acquired by NSA as part of the bulk telephone metadata program authorized by the Foreign Intelligence Surveillance Court, pursuant to section 215 of the USA PATRIOT Act, and the number of such records that have been reviewed by NSA personnel in response to a query of such records; and
 - To the extent possible, an estimate of the number of records of United States persons that have been acquired by NSA as part of the bulk telephone metadata program and the number of such records that have been reviewed by NSA personnel in response to a query.
- A report, unclassified to the greatest extent possible, and with a classified annex if necessary, describing all NSA bulk collection activities, including when such activities began, the cost of such activities, what types of records have been collected in the past, what types of records are currently being collected, and any plans for future bulk collection.
- A report, unclassified to the greatest extent possible, and with a classified annex if necessary, including a list of terrorist activities that were disrupted, in whole or in part, with the aid of information obtained through NSA's telephone metadata program and whether this information could have been promptly obtained by other means.

GUANTANAMO BAY DETAINEES

The Committee notes the continuing costs associated with maintaining the detention facilities at Naval Station, Guantanamo Bay, Cuba. Based on cost figures provided by the Department of Defense, the annual cost to house a detainee at the facility on Guantanamo Bay is approximately \$2,768,902 per year. According to a May 2013 GAO report, the annual cost to incarcerate an individual at a maximum security Bureau of Prisons facility within the United States is approximately \$78,000 per year. The cost to house a detainee at a U.S. military detention facility is comparable to that of a U.S. civilian facility at an annual estimated cost of \$78,696.

The mission for detention of individuals at Guantanamo Bay was never envisioned by the military to be long-term. Facilities that were originally built to be temporary have outlived their service life. For example, the current medical clinic used to manage the healthcare of an aging detainee population currently functions with inadequate space and is lacking proper medical treatment equipment. The Committee notes that the base hospital is the only service facility for chronic care. Due to security considerations, the hospital must be used after hours or closed down during daytime oper-

ations to accommodate emergencies for detainees. The estimated cost to modify and develop a new medical facility is approximately \$11,000,000.

Another example of a facility operating beyond its intended usage is the temporary troop quarters housing service members who are supporting the detention mission. In many instances the rooms are overcrowded and continue to deteriorate. The intense year-round heat and humidity are burdening air handling equipment, degrading metal support infrastructure and corroding plumbing infrastructure at an accelerated rate. Many of these temporary facilities are a disservice to the men and women who carry out a challenging mission. Replacement housing facilities would cost over \$100,000,000 in military construction funds, further raising the costs on sustaining a facility that was not intended to be permanent.

As fiscal budget pressures for the Department continue, combined with the aging infrastructure used to house and treat detainees, the Committee believes continuing the detention mission at Guantanamo Bay will continue to rise and become cost prohibitive, especially as further reductions in the detention population would not lead to substantial cost savings in infrastructure or operations. Greater effort must be made to find a longer term solution to the detention mission.

TITLE I
MILITARY PERSONNEL

Funds appropriated under this title provide the resources required for basic pay, retired pay accrual, employers' contribution for Social Security taxes, basic allowance for subsistence, basic allowance for housing, special and incentive pays, permanent change of station travel, and other personnel costs for uniformed members of the Armed Forces.

The President's fiscal year 2015 budget requests a total of \$128,957,593,000 for military personnel appropriations. This request funds an Active component end strength of 1,308,600 and a Reserve component end strength of 820,800.

SUMMARY OF COMMITTEE ACTION

The Committee recommends military personnel appropriations totaling \$128,430,543,000 for fiscal year 2015. This is \$527,050,000 below the budget estimate.

Committee recommended military personnel appropriations for fiscal year 2015 are summarized below:

SUMMARY OF MILITARY PERSONNEL APPROPRIATIONS

[In thousands of dollars]

Account	2015 budget estimate	Committee recommendation	Change from budget estimate
Military Personnel:			
Military Personnel, Army	41,225,339	41,222,729	- 2,610
Military Personnel, Navy	27,489,440	27,515,655	+ 26,215
Military Personnel, Marine Corps	12,919,103	12,826,843	- 92,260
Military Personnel, Air Force	27,815,926	27,928,039	+ 112,113
Reserve Personnel:			
Reserve Personnel, Army	4,459,130	4,223,400	- 235,730
Reserve Personnel, Navy	1,863,034	1,841,624	- 21,410
Reserve Personnel, Marine Corps	670,754	661,174	- 9,580
Reserve Personnel, Air Force	1,675,518	1,660,148	- 15,370
National Guard Personnel:			
National Guard Personnel, Army	7,682,892	7,425,722	- 257,170
National Guard Personnel, Air Force	3,156,457	3,125,209	- 31,248
Total	128,957,593	128,430,543	- 527,050

Committee recommended end strengths for fiscal year 2015 are summarized below:

RECOMMENDED END STRENGTH

	2014 authorization	2015 budget estimate	Committee recommendation	Change from budget estimate
Active:				
Army	520,000	490,000	490,000

RECOMMENDED END STRENGTH—Continued

	2014 authorization	2015 budget estimate	Committee recommendation	Change from budget estimate
Navy	323,600	323,600	323,600
Marine Corps	190,200	184,100	184,100
Air Force	327,600	310,900	310,900
Subtotal	1,361,400	1,308,600	1,308,600
Selected Reserve:				
Army Reserve	205,000	202,000	202,000
Navy Reserve	59,100	57,300	57,300
Marine Corps Reserve	39,600	39,200	39,200
Air Force Reserve	70,400	67,100	67,100
Army National Guard	354,200	350,200	350,200
Air National Guard	105,400	105,000	105,000
Subtotal	833,700	820,800	820,800
TOTAL	2,195,100	2,129,400	2,129,400

Committee recommended end strengths for full-time support of the Reserve and Guard for fiscal year 2015 are summarized below:

RECOMMENDED ACTIVE GUARD AND RESERVE END STRENGTH

	2014 authorization	2015 budget estimate	Committee recommendation	Change from budget estimate
Active Guard and Reserve:				
Army Reserve	16,261	16,261	16,261
Navy Reserve	10,159	9,973	9,973
Marine Corps Reserve	2,261	2,261	2,261
Air Force Reserve	2,911	2,830	2,830
Army National Guard	32,060	31,385	31,385
Air National Guard	14,734	14,704	14,704
TOTAL	78,386	77,414	77,414

MILITARY PERSONNEL OVERVIEW

Retired Pay Accrual Shortfall.—In February 2014, Congress reversed a provision in the Bipartisan Budget Act (Public Law 113–67) that reduced the annual cost-of-living adjustment [COLA] for military retirees under the age of 62 by one percent. In order to follow through on this COLA adjustment and fully fund the military retirement accounts in fiscal year 2015, the Committee includes an additional \$507,500,000 throughout the military personnel accounts.

Reserve Component Budget Reporting.—The Committee continues its requirement for the Department to provide a semi-annual detailed report to the congressional defense committees showing transfers between subactivities within the military personnel appropriation. Reports shall be submitted not later than 30 days following the end of the second quarter and 30 days following the end of the fiscal year.

Unobligated Balances.—A Government Accountability Office analysis of past year obligation rates shows that the services continue to underexecute their military personnel accounts. Due to excess unobligated balances, the Committee recommends a total re-

duction of \$761,620,000 from the fiscal year 2015 military personnel accounts.

Career Intermission Pilot Program.—The Career Intermission Pilot Program presents a unique opportunity for servicemembers to take a career intermission, without penalty, before returning to active duty service to continue their military career. The program has proven to be a valuable retention tool for the Department as it provides servicemembers with the chance to address a multitude of personal or professional matters, such as caring for a family member with a disability or illness, or pursuing higher education. The Committee understands that the Navy is currently the only service utilizing this pilot program and encourages the Army and Air Force to use this effective career management tool. To better understand the effectiveness of this pilot program, the Committee directs the Government Accountability Office to provide the congressional defense committees a report within 90 days after enactment of this act on the impacts of this program on retention within the services. The report should examine how the program has been implemented by the Navy and what elements can be implemented by the Army and Air Force in order to maximize the program’s usefulness to servicemembers.

Enlistment of DACA Recipients.—The Committee is concerned that immigrants who have received Deferred Action for Childhood Arrivals [DACA] are not authorized to enlist in the Armed Forces, which has a negative impact on military recruitment and readiness. Under 10 U.S.C. section 504, Service Secretaries can authorize the enlistment of non-citizens when it is “vital to the national interest.” Enlisting DACA recipients would allow the Armed Forces to access an expanded pool of recruits. To be eligible for DACA, an individual must have entered the United States as a child; graduated from secondary school, obtained a general equivalency degree, or be currently enrolled in school; and not have a serious criminal record. DACA recipients are, by definition, educated and integrated into American society, and many have shown an interest in and aptitude for military service through participation in Junior Reserve Officers’ Training Corps [JROTC]. The requirements to qualify for DACA are similar to those for legislation known as the DREAM (Development Relief and Education of Alien Minors) Act. In 2011, Dr. Clifford Stanley, then-Undersecretary of Defense for Personnel and Readiness, testified in support of the DREAM Act, noting it would allow the Department of Defense “to expand the market of high-quality youth to the advantage of military recruitment and readiness.” In 2010, then-Secretary of Defense Robert Gates said the DREAM Act “will result in improved recruitment results and attendant gains in unit manning and military performance.” Accordingly, the Committee urges the Secretary of Defense, not later than 90 days after enactment of this act, to authorize the enlistment of DACA recipients pursuant to 10 U.S.C. Section 504.

Enlistment of Individuals with Disabilities in the Armed Forces.—In Senate report 113–85, the Committee directed the Department of the Air Force to study the feasibility and advisability of permitting individuals with auditory impairment, including deafness, to access as officers in the Armed Forces. The Committee is disappointed in the quality of the response from the Department on

this issue and questions the methodology used to conduct these studies in which normal hearing individuals used hearing-loss simulation devices to approximate the effects of impaired hearing.

The Committee strongly believes that the Department should examine more fully and more accurately the viability of allowing individuals with disabilities to enlist and directs the Department to provide a report to the congressional defense committees within 120 days of enactment of this act that includes an examination of which military occupational specialties are best suited for individuals with disabilities. The Committee further directs the Department to study this issue, utilizing an independent agency with expertise in disability law and accommodations to structure and supervise the study, and using individuals with actual disabilities, who have adapted and modified their way of life to their disability, in order to gain a more accurate reflection of how such individuals would fare in fitness-for-duty tests.

MILITARY PERSONNEL, ARMY

Appropriations, 2014	\$40,787,967,000
Budget estimate, 2015	41,225,339,000
House allowance	41,183,729,000
Committee recommendation	41,222,729,000

The Committee recommends an appropriation of \$41,222,729,000. This is \$2,610,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Item	2015 budget estimate	House allowance	Committee recommendation	Change from

	TOTAL, RESERVE PERSONNEL, MARINE CORPS	670,754	659,224	661,174	-9,580	+ 1,950

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	UNDISTRIBUTED ADJUSTMENT			
	Improving funds management: Unobligated balances	- 10,780	- 10,780
	Program increase: Retired pay accrual shortfall due to COLA adjustment	+ 1,200	+ 1,200

RESERVE PERSONNEL, AIR FORCE

Appropriations, 2014	\$1,723,159,000
Budget estimate, 2015	1,675,518,000
House allowance	1,652,148,000
Committee recommendation	1,660,148,000

The Committee recommends an appropriation of \$1,660,148,000. This is \$15,370,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Item	2015 budget estimate	House allowance	Committee recommendation	Change from	
					Budget estimate	House allowance

TITLE II
OPERATION AND MAINTENANCE

Funds appropriated under this title provide the resources required to prepare for and conduct combat operations and other peace time missions. These funds are used to purchase fuel and spare parts for training operations, pay supporting civilian personnel, and purchase supplies, equipment, and service contracts for the repair of weapons and facilities.

The President's fiscal year 2015 budget requests a total of \$166,002,818,000 for operation and maintenance appropriations.

SUMMARY OF COMMITTEE ACTION

The Committee recommends operation and maintenance appropriations totaling \$165,786,003,000 for fiscal year 2015. This is \$216,815,000 below the budget estimate.

Committee recommended operation and maintenance appropriations for fiscal year 2015 are summarized below:

SUMMARY OF OPERATION AND MAINTENANCE APPROPRIATIONS

[In thousands of dollars]

Account	2015 budget estimate	Committee recommendation	Change from budget estimate
Operation and Maintenance:			
Operation and Maintenance, Army	33,240,148	33,396,688	+ 156,540
Operation and Maintenance, Navy	39,316,857	38,822,366	- 494,491
Operation and Maintenance, Marine Corps	5,909,487	5,997,507	+ 88,020
Operation and Maintenance, Air Force	35,331,193	35,485,568	+ 154,375
Operation and Maintenance, Defense-Wide	31,198,232	31,049,591	- 148,641
Operation and Maintenance, Army Reserve	2,490,569	2,474,995	- 15,574
Operation and Maintenance, Navy Reserve	1,007,100	990,633	- 16,467
Operation and Maintenance, Marine Corps Reserve	268,582	270,482	+ 1,900
Operation and Maintenance, Air Force Reserve	3,015,842	2,989,206	- 26,636
Operation and Maintenance, Army National Guard	6,030,773	6,231,351	+ 200,578
Operation and Maintenance, Air National Guard	6,392,859	6,361,281	- 31,578
United States Court of Appeals for the Armed Forces	13,723	13,723

Environmental Restoration, Defense-Wide	8,547	8,547
Environmental Restoration, Formerly Used Defense Sites	208,353	258,353	+ 50,000
Overseas Humanitarian, Disaster, and Civic Aid	100,000	100,000
Cooperative Threat Reduction Account	365,108	365,108
OCOTF	5,000	- 5,000
Department of Defense Acquisition Workforce Development Fund ..	212,875	83,034	- 129,841
Total	166,002,818	165,786,003	- 216,815

REPROGRAMMING GUIDANCE FOR OPERATION AND MAINTENANCE
ACCOUNTS

The Committee directs the Secretary of Defense to submit the Base for Reprogramming (DD Form 1414) for each of the fiscal year 2015 appropriation accounts not later than 60 days after the enactment of this act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the House and Senate Appropriations Committees.

The Committee directs the Secretary of Defense to use the normal prior approval reprogramming procedures to transfer funds in the services' operation and maintenance accounts between O-1 budget activities in excess of \$15,000,000. In addition, the Secretary of Defense should follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 out of the following budget sub-activities:

Army:

- Maneuver units
- Modular support brigades
- Land forces operations support
- Force readiness operations support
- Land forces depot maintenance
- Base operations support
- Facilities Sustainment, Restoration, and Modernization

Navy:

- Aircraft depot maintenance
- Ship depot maintenance
- Facilities Sustainment, Restoration, and Modernization

Marine Corps:

- Depot maintenance
- Facilities Sustainment, Restoration, and Modernization

Air Force:

- Primary combat forces
- Combat enhancement forces
- Combat communications
- Facilities Sustainment, Restoration, and Modernization
- Operating forces depot maintenance
- Mobilization depot maintenance
- Training and recruiting depot maintenance
- Administration and service-wide depot maintenance

Air Force Reserve:

- Depot maintenance

Air National Guard:

- Depot maintenance

Finally, the Secretary of Defense should follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 into the following budget sub-activity:

Operation and Maintenance, Army National Guard:

- Other personnel support/recruiting and advertising

With respect to Operation and Maintenance, Defense-Wide, proposed transfers of funds to or from the levels specified for defense agencies in excess of \$15,000,000 shall be subject to prior approval reprogramming procedures.

OPERATION AND MAINTENANCE OVERVIEW

Civilian Workforce.—The civilian workforce has faced many challenges over the past several years. In 2013, the Department took specific action to release temporary employees, freeze hiring, and furlough most of its civilian workforce due to sequestration. The Committee expects the Department to maintain a stable, effective, right-sized civilian cadre. The Committee recognizes the critical role that the civilian workforce plays every day in ensuring the mission success of the Armed Forces and fully funds the 1 percent pay raise for civilian personnel as requested.

Workforce Management.—The Committee supports a workforce management plan that is fair for all sectors of the workforce. Decisions on sourcing new work, expanding existing responsibilities, or transferring functions currently performed by civilian personnel or contractors to performance by military personnel must not proceed without comparing the costs according to the Department's own methodology. Therefore, decisions whether to assign new work which is not inherently governmental, closely associated with inherently governmental functions, or critical to military, civilian, or contractor personnel, shall be based on the results of the costing methodology laid out in Department of Defense Instruction [DODI] 7041.04. Additionally, before converting functions performed by civilian personnel or contractors to performance by military personnel that are not required by law or regulation to be performed by military personnel, the Department shall adhere to its own costing methodology laid out in Department of Defense Instruction [DODI] 7041.04.

Contract Services Spending.—Recent analysis by the Government Accountability Office found that the Department of Defense failed to adhere to the enacted limitations on contracted services in the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112–81), exceeding the limitations by more than \$1,000,000,000 in fiscal year 2012. Moreover, guidance for adherence to the extension of the limitations for fiscal year 2014 has yet to be issued. The Committee is concerned that the Department does not have adequate policies, procedures, and controls in place to enforce limitations on the annual amounts expended on contracted services.

The Committee is also concerned that not all contracted services are being subjected to the spending limitations because of the exclusion of contracted services involving Economy Act transfers between and within Department of Defense components. Also, because of the disparity between the levels of contracted services captured in the Inventory of Contracts for Services, required under section 2330a of title 10, United States Code, and what the Department budgets for contracted services, the Committee concludes that the Department does not deliberately plan for most contracted services. The Committee urges a review of the efforts by the Under Secretary of Defense (Comptroller) and the Department's financial management and acquisition communities to implement effective control mechanisms for contracted services spending.

Overestimation of Civilian Workforce.—While the Committee supports a strong civilian workforce, the fiscal year 2015 budget re-

quest substantially overestimates the number of civilians that will be employed during fiscal year 2015. Through analysis directed by the Committee during the budget review, each service and defense agency identified the current estimate for civilian full time equivalents [FTE] that will be on the books in fiscal year 2014 and it is far short of what was planned for in the budget request. The Committee understands the difficulties in predicting civilian FTE levels, particularly during the past several turbulent years. However, the Committee cannot ignore that the Army, Navy and Air Force are estimating to finish fiscal year 2014 thousands of civilian FTEs lower than each service anticipated. Therefore, the Committee recommends reductions in fiscal year 2015 due to overestimation of civilian FTE targets.

Quarterly End Strength Report.—In its analysis of civilian personnel numbers, the Committee used the “Congressional End Strength Quarterly Report for DOD” dated March 22, 2014, to inform its review. Each service was asked to comment on the data provided in their operation and maintenance appropriation in an attempt to validate the numbers in the column titled “Number of people paid.” Unfortunately, not one service was able to validate the numbers on the quarterly report. Therefore, the Committee directs that the information on the quarterly end strength report be validated by each service and the Office of the Secretary of Defense in the case of Defense-Wide appropriations, prior to submission.

Voluntary Military Education Programs—Tracking Outcomes.—The Committee is concerned about the lack of information available on the outcomes of students receiving Tuition Assistance and My Career Advancement Account [MyCAA] benefits. Therefore, the Committee directs the Department to submit a report tracking such outcomes of each of these programs. The report shall be submitted on or before June 1, 2015, and shall include, but not be limited to, the following data totals for calendar year 2014: an aggregate graduation rate, loan default rate, and average indebtedness. Additionally, the report shall then disaggregate the data to show these same metrics by sector: public, private for-profit, and private not-for-profit. Finally, the report shall include the percentage of servicemembers utilizing the Top-Up program for voluntary military education and the average dollar amount of usage. The Department is also encouraged to make an effort to gather data on the jobs attained after graduation, specifically whether those jobs can be reasonably said to be in the field of study identified in the students’ education plans.

Voluntary Military Education Programs—Third Party Audits.—The Committee recognizes the importance of voluntary military education programs to the continued education of our men and women in uniform and their spouses. In recent years, the programs have grown in popularity among servicemembers and, as such, in cost to the Federal Government. Despite recent efforts to improve oversight, the Committee notes that Department of Defense attempts to obtain key information needed to assess the quality of nearly 3,000 schools servicemembers attend have been largely unsuccessful.

The Committee is concerned about the number and transparency of third party audits of schools within the Department’s Tuition As-

sistance program. In light of these concerns, the Committee commends the Department for its decision to develop a new Statement of Work for third party audits for execution under a new contract which will strengthen protections for, and the quality of education provided to, the military community. Since previous third party assessments lacked coherence and specificity, and did not fully consider the qualifications needed by the contractor conducting the assessments before awarding the contract, the Committee encourages the Secretary of Defense to develop a clear, written plan for third party assessments of schools. As part of that plan, the Department is urged to (1) develop clear, measurable questions to guide the assessments and (2) require that the entity or entities conducting the assessments have the necessary skills, expertise and experience to effectively assess the schools.

Joint Prisoner of War/Missing in Action Accounting Command [JPAC].—The Government Accountability Office’s 2014 Annual Report titled, “Additional Opportunities to Reduce Fragmentation, Overlap, and Duplication and Achieve Other Financial Benefits” (GAO-14-343SP), published April 8, 2014, identified the Prisoner of War/Missing in Action [POW/MIA] mission as an area of high risk. The report said, “The Department of Defense should minimize overlapping and duplicative efforts by examining options to reduce fragmentation and clarify guidance on roles and responsibilities among the eight organizations that account for missing persons and improve the effectiveness of the mission.”

A provision was included in S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, making modifications to requirements for accounting for members of the Armed Forces and Department of Defense civilian employees listed as missing (section 911). Among several new requirements and authorizations, the provision establishes a new “designated defense agency” to have responsibility over the POW/MIA accounting community. The Committee’s recommendation is consistent with section 911 and realigns funding among Operation and Maintenance, Navy; Operation and Maintenance, Air Force; and Operation and Maintenance, Defense-Wide. The funding for the new defense agency is transferred to an undistributed line in Operation and Maintenance, Defense-Wide until a budget line item for the new defense agency is established. The Department is directed to include the new defense agency as a separate line in Operation and Maintenance, Defense-Wide in its fiscal year 2016 request.

Finally, section 1509 of the Fiscal Year 2010 National Defense Authorization Act directed the Department of Defense to ensure that at least 200 missing persons are accounted for annually beginning in fiscal year 2015. The Committee encourages the Department to utilize the authorities established in section 911 of S. 2410 to partner with research universities with expertise in archeology and remains recovery to assist in becoming compliant with National Defense Authorization Act mandates.

Increasing Transparency of Federal Spending on Grants.—The Department of Defense reports its obligation of funds data by Grant, Cooperative Agreement, Technology Investment Agreement, and Other-Assistance-Award to the public at the USAspending.gov Web site, as required by the Federal Funding Accountability and

Transparency Act [FFATA] of 2006. The Transparency Act requires data on each obligation to be publicly accessible within 30 days of the date of obligation at the Web site.

On May 9, 2014, the President signed the Data Accountability and Transparency Act of 2014 (DATA Act) (Public Law 113–101). The purposes of the DATA Act are to expand the Transparency Act accountability to include agency expenditures linked to reported awards, simplify and streamline reporting requirements, reduce compliance costs, and hold agencies accountable for data quality. The Committee directs the Department of Defense to provide adequate resources to comply with the new requirements of the DATA Act.

Security Clearance Investigations.—The Committee is concerned about the Office of Personnel Management’s [OPM’s] screening process of Federal employees and believes that additional steps are needed to restore confidence in the security clearance process. Therefore, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 120 days after the enactment of this act, on the feasibility and costs associated with the Department of Defense assuming the responsibilities of conducting security clearance investigation activities for all Department of Defense personnel.

The Committee also encourages the Secretary of Defense to consider measures to optimize and streamline data sharing and best practices for continuous personnel security evaluations and threat analysis.

Information Technology.—The military services’ operation and maintenance requests for fiscal year 2015 include over \$11,000,000,000 for Information Technology [IT]. Robust funding for information technology is justified in the current environment. According to the IT budget materials, “[The] primary goals are to make the Department more effective and more secure against cyber threats and vulnerabilities.” The budget materials continue, “A secondary, but very important goal is to reduce the cost associated with the Department’s overall information technology infrastructure by simplifying, centralizing, and automating infrastructure at the enterprise level.”

Over the past several years, the services have consistently endeavored to find savings related to the IT budget’s secondary goal. They have pursued initiatives such as data center and server consolidations, enterprise e-mail, and consolidated software and hardware purchasing.

The Committee commends the Department for efforts to simplify, centralize and automate IT infrastructure. However, the Committee found a number of discrepancies where the resources reflected in the IT budget did not correlate to the operation and maintenance budget justification. The Committee recommends reductions based on that analysis. Finally, the recommendation includes additional reductions to the operation and maintenance accounts to compel further review of non-cyber IT requirements (those not related to the defense of DOD networks) and eliminate duplication.

Operation and Maintenance Budget Justification.—The Committee commends the Department for the improvements in the Op-

eration and Maintenance [O&M] budget materials made over the past several years. To further inform the congressional review, the Committee directs the following actions:

- The Department shall include the OP-8B: Total Civilian Personnel Costs for every appropriation as a part of the President's budget justification.
- Every subactivity group in O&M that funds recruiting and advertising activities shall include the budget profile broken out by recruiting and advertising for the prior year, current year, and budget year as a part of the performance criteria in the OP-5 exhibit. The Army National Guard shall include three categories broken out separately: recruiting, marketing, and retention. The Army National Guard is further directed to break out funding profiles for specific programs under each category providing more specific information about what is funded in each. Among other line items, one under marketing shall be sports sponsorships.
- The Army shall add a new table in the performance criteria of the OP-5 exhibit for SAG 115 Land Forces Operations Support that shows the number of funded Combat Training Center Rotations by location.
- The Office of Economic Adjustment's budget documentation in O&M Defense-Wide shall include the budget profile of each major program for the prior year, current year, and budget year as a part of the performance criteria in the OP-5 exhibit. Examples of major programs would be Program Assistance, Defense Industry Adjustment, and Guam.
- The Defense Information System Agency's [DISA] budget documentation in O&M Defense-Wide is currently a culmination of net adjustments within section III C of the OP-5 (Financial Summary Reconciliation and Increases and Decreases) that is difficult to analyze. Future OP-5 exhibits for DISA shall break down adjustments into more discrete items rather than providing numerous net adjustments in section III C.
- The Defense Security Service's budget documentation in O&M Defense-Wide shall break out funding for the Defense Insider Threat Management and Analysis Center [DITMAC]/Continuous Evaluation program. This category shall be a new separate program discussed in section I of the OP-5, Description of Operations Financed, in section III, the Financial Summary as a new BA Subactivity, and broken out in the Reconciliation of Increases and Decreases if changes occur to this program from the current year to the budget year.

Extremity Protection Program.—The Committee encourages the Department of Defense to fully fund the Cold Weather Protective Equipment—Extremity Protection Program in order to sustain research and development programs, acquisition requirements and to maintain a basic combat capability in protective equipment for servicemembers.

Advanced Trauma Training Program for National Guard and Reserve.—The Committee recognizes the valuable support universities, hospitals, and other military partners provide by offering civilian-based emergency response trauma training to sustain medics' and medical providers' capabilities of the National Guard En-

hanced Response Forces Packages [CERFP], National Guard Homeland Response Forces [NGHRF], and the Army Reserve Consequence Management Response Forces [CCMRF]. The Committee encourages the National Guard and Reserve to continue pursuing state-of-the-art trauma training with these civilian partners, thus maintaining unit medical readiness postures at optimum levels as military healthcare providers in CERFPs, NGHRFs, and CCMRFs maintain their individual skills to respond effectively to emergency incidents on the homeland. Furthermore, in order to minimize the civilian-military operational gaps in the event of a catastrophic incident, the Committee also encourages the development of enhanced preparedness medical training programs focusing on mass casualty triage, advanced disaster life support, advanced hazardous material life support, emergency dental, and psychological health by increasing civilian-based advanced trauma expertise gained through day-to-day experiences and medical research programs.

Defense Generator and Rail Equipment Center.—The Defense Generator and Rail Equipment Center [DGRC] is an Army facility located at Hill Air Force Base, Utah. The Committee understands that this facility has serious deficiencies needing significant renovations including some necessary to address health and safety concerns. Further, while DGRC is currently located within the boundaries of Hill AFB, the Committee is aware that after completion of the Enhanced Use Lease project currently underway at Hill AFB, DGRC will be located outside of the base boundaries and would be required to provide its own force protection which would increase operational costs. The Committee urges the Secretary of the Army to work directly with the Secretary of the Air Force and relevant State and local stakeholders to address concerns raised by the current DGRC location and to reach an agreement acceptable to all parties on the future status and location of the DGRC. The Committee is concerned that spending funds to perform non-safety related renovations of the DGRC before such a consensus is reached would not be a good use of limited resources and taxpayer funds. Therefore, the Committee encourages the Secretary of the Army to limit renovations to those required only for health and safety until such an agreement is reached and directs the Army to notify the congressional defense committees of all safety-related renovations performed, including a justification for why the renovations are required.

Electricity Reliability at Military Installations.—The Committee commends the Department and services for their continuing efforts to reduce installation energy costs, which total approximately \$4,000,000,000 annually. The increasing use of Energy Savings Performance Contracts and Utility Energy Service Contracts has been particularly important in achieving energy and financial savings with less up-front Federal investment. To further augment energy efficiency efforts, the Committee directs the Secretary of Defense to conduct a review of the value and time duration of “electricity reliability” and its use in making energy efficiency project decisions on military installations. The review should factor in any need for redundancy and include an assessment of how the value of electricity reliability could be incorporated in cost-benefit calculations for Power Purchase Agreements, performance contracting,

and other utility power purchases. The Committee directs the secretary to report to the congressional defense committees on the findings of the review within 90 days of enactment of this act.

Fly America Act.—The Committee commends the Department for its efforts to honor the Fly America Act as the drawdown in Afghanistan continues. The Committee directs the Secretary of Defense to provide a report to the congressional defense committees, no later than 30 days after the enactment of this act, detailing how many foreign flagged fixed-wing and rotary-wing aircraft are currently under contract in Afghanistan for airlift services, and a description of the Department’s plans to drawdown foreign carriers in advance of the cessation of military operations in Afghanistan.

Junior Reserve Officer Training Corps.—The Committee is concerned about the shrinking number of American youth eligible for military service. For nearly 100 years, the Junior Reserve Officer Training Corps [JROTC] has promoted citizenship and community service amongst America’s youth and has been an important means through which youth can learn about military service in the United States. But evidence suggests that some high school JROTC programs face closure due to funding tied to program enrollment levels, adversely impacting certain, particularly rural, populations. Therefore, the Committee directs the Secretary of Defense, in consultation with the services, to submit a report to the congressional defense committees no later than 180 days after the enactment of this act on recent trends in JROTC participation at both the individual and school level, as well as any plans to ensure adequate representation of all regions in the United States to ensure the capabilities of the Armed Forces to recruit from a diverse background to sustain the all-volunteer force.

OPERATION AND MAINTENANCE, ARMY

Appropriations, 2014	\$30,768,069,000
Budget estimate, 2015	33,240,148,000
House allowance	32,671,980,000
Committee recommendation	33,396,688,000

The Committee recommends an appropriation of \$33,396,688,000. This is \$156,540,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Item	2015 budget estimate	House allowance	Committee recommendation	Change from	
					Budget estimate	House allowance
	OPERATION AND MAINTENANCE, ARMY					
	BUDGET ACTIVITY 1: OPERATING FORCES					
	LAND FORCES					
10	MANEUVER UNITS	969,281	895,281	951,281	-18,000	+56,000

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
111	MANEUVER UNITS	969,281	951,281	- 18,000
	Improving funds management: Stryker maintenance decrease not accounted for in budget documentation ..			- 18,000
115	LAND FORCES OPERATIONS SUPPORT	1,057,453	1,042,953	- 14,500
	Improving funds management: Contractor Logistics Support costs no longer needed in fiscal year 2015			- 14,500
121	FORCE READINESS OPERATIONS SUPPORT	3,592,334	3,644,334	+ 52,000
	Transfer funding for 2 CTC rotations: Army-requested to line 1G, National Guard Personnel, Army and line 111, O&M Army National Guard			- 68,000
	Program Increase: Force Readiness Operations Support			+ 120,000
123	LAND FORCES DEPOT MAINTENANCE	1,001,232	1,101,909	+ 100,677
	Transfer denied: Fiscal year 2015 funding for depot maintenance back to O&M Army National Guard Line 123			- 8,323
	Program Increase: Depot Maintenance			+ 109,000
131	BASE OPERATIONS SUPPORT	7,428,972	7,370,972	- 58,000
	Budget documentation disparity: Rental payments			- 58,000
132	FACILITIES SUSTAINMENT, RESTORATION AND MODERNIZATION	2,066,434	2,449,956	+ 383,522
	Improving funds management: Arlington National Cemetery funded in the Military Construction and Veterans Affairs Appropriations bill			- 25,000
	Program Increase: FSRM			+ 408,522
213	INDUSTRIAL PREPAREDNESS	6,463	86,463	+ 80,000
	Program increase: Body Armor			+ 80,000
335	JUNIOR ROTC	169,784	177,784	+ 8,000
	Program increase: JROTC increase only to open new units			+ 8,000
411	SECURITY PROGRAMS	1,030,411	1,030,252	- 159
	Classified adjustment			- 159
432	SERVICEWIDE COMMUNICATIONS	1,624,742	1,611,742	- 13,000
	Improving funds management: Integrated Personnel and Pay System [IPPS-A] excess to requirement			- 13,000
UNDIST	Maintain program affordability: Overestimation of civilian full time equivalent targets		- 70,000	- 70,000
UNDIST	Budget documentation disparity: O&M and IT budget justification inconsistencies		- 108,000	- 108,000
UNDIST	Improving funds management: Working Capital Fund carry over above allowable ceiling		- 186,000	- 186,000

Automated Biometrics Identification System [ABIS].—The Committee recognizes that the ABIS has an enduring requirement and therefore encourages the Army to consider funding this capability in the base operation and maintenance budget.

Productivity Enhancement Program.—The Department of Defense's organic depot maintenance capability is vital to our military's sustainment infrastructure. The Committee encourages the Secretary of the Army to modernize the organic depots' Electronic Test and Measurement Equipment [ET&ME] to allow cost savings in future maintenance and calibration expenditures.

Ballistic Protective Eyewear.—The Committee supports efforts to establish a military combat eye protection program in the Department of Defense to ensure a high standard of performance for all

military-issue protective eyewear. The Committee encourages the rapid fielding of ballistic protective eyewear for all servicemembers so they can receive best-in-class eye protection for a range of threats while deployed and in training.

Body Armor.—The Committee recognizes the importance of ensuring that deployed soldiers have the lightest and most advanced body armor available to enhance mission performance and save lives. Modernizing the body armor inventory through replenishment will help the manufacturing base continue the development and manufacturing of more advanced body armor our soldiers need. Therefore, the Committee provides an additional \$80,000,000 for this initiative and encourages the Secretary of the Army to develop and implement a plan to replace and refurbish expired body armor.

Soldier for Life.—The Committee has been made aware of an initiative developed by the Chief of Staff of the Army called “Soldier for Life,” which is currently being funded within existing resources. Soldier for Life provides servicemembers, veterans and family members with the skills, knowledge, and tools required to successfully reintegrate into civilian life. The Committee encourages the Secretary of the Army to continue these types of initiatives and properly budget for them in future requests.

Army Force Structure and Installation Alignment.—The Army’s active component is set to decline from a peak of approximately 562,000 soldiers in 2012 to 490,000 by 2017. Further reductions would result in additional unit inactivations at Army posts around the country. The Committee believes more information is needed about impacts to readiness from further force structure reductions and affirms its support for the reporting requirements directed in the report accompanying S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, titled “Army Force Structure and Installation Alignment.”

Army Emergency Management Training Center.—The 2009 Army Emergency Management Program (AR-525-27) sought to integrate planning, execution, and response management to all-hazard incidents affecting Army installations and activities. Although largely successful, some aspects of the integration and synchronization of emergency management planning assigned to the Department of the Army G-3/5/7 may be more appropriately suited for an Emergency Management Training Center established within the U.S. Training and Doctrine Command [TRADOC], with Army Headquarters continuing to exercise oversight. Therefore, the Committee directs the Secretary of the Army to report to the congressional defense committees by no later than June 1, 2015, the feasibility of consolidating homeland defense functions across Army installations to better support the consequences management and homeland defense missions, and of establishing an Emergency Management Training Center to facilitate comprehensive doctrine, training, and leader development for Installation Emergency Management and Defense Support to Civil Authorities.

National Commission on the Future of the Army.—Several provisions were included in S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, regarding a National Commission on the Future of the Army. The Commission is to undertake a comprehensive study of the structure of the Army to deter-

mine the proper force mixture of the Active component and Reserve component, and how the structure should be modified to best fulfill current and anticipated mission requirements for the Army in a manner consistent with available resources and estimated future resources. The Committee affirms its support for the National Commission on the Future of the Army.

National Guard and Reserve Education Benefits.—The Committee understands that, effective January 1, 2014, members of the Army may become eligible for the Army’s tuition assistance program only after serving a period of 1 year after completing certain training courses, such as advance individual training, officer candidate school, and the basic officer leader course. The Committee is concerned that many members of the National Guard and Reserve, who serve only part time, rely on the tuition assistance program during all years of service and that the change in policy may be causing them to take out additional student loans to cover the cost of education during their first year of service. The Committee is further concerned that this policy is negatively affecting the recruitment efforts of the National Guard and Reserve. For these reasons and others, the Committee recommends the Secretary of the Army to reverse this decision as it applies to the Army National Guard and Reserve so that members of the National Guard and Reserve are eligible for tuition benefits in the same manner as they were prior to January 1, 2014, and to consider reversing the decision for active-duty members as well.

OPERATION AND MAINTENANCE, NAVY

Appropriations, 2014	\$36,311,160,000
Budget estimate, 2015	39,316,857,000
House allowance	39,073,543,000
Committee recommendation	38,822,366,000

The Committee recommends an appropriation of \$38,822,366,000. This is \$494,491,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

UNDIST	Program increase: CVN-73 Refueling and Complex Overhaul (Manpower)	+ 10,100	+ 10,100

Naval Shipyard Apprentice Program.—The Committee directs that during fiscal year 2015 the Navy shall induct classes of no fewer than 100 apprentices, respectively, at each of the naval shipyards. The Committee further directs the Navy to include the costs of the fiscal year 2016 class of apprentices in its budget request.

U.S. Coast Guard.—The Committee is aware that Department of Defense [DOD] regulations currently restrict DOD mission appropriated funded activities from offering reimbursable rates to non-DOD agencies. This restriction forces the Navy to charge the U.S. Coast Guard fully burdened rates for drydocking services at Navy shipyards rather than reimbursable rates. Therefore, the Committee directs that funds appropriated under Operation and Maintenance, Navy may be used to pay overhead costs incurred by a Naval Shipyard when drydocking U.S. Coast Guard ships.

Minimum Capital Investment for Certain Depots.—The Secretary of each military department is directed to invest in the capital budgets of the covered depots set forth in 10 U.S.C. 2476(e) a total amount equal to not less than 6 percent of the average total combined maintenance, repair, and overhaul workload funded at all the depots of that military department for the preceding 3 fiscal years.

Shipboard Lighting Systems.—The Committee commends the Navy for its increasing use of light-emitting diode [LED] lighting and encourages it to continue these activities. The Committee urges the Navy to consider updating lighting specifications for ships so LED use is not prohibited, developing an approved products list for LEDs that is broadly available for use in all vessels, using “total lifecycle costs” to determine the value of LEDs, and making the installation of LEDs in vessels a priority when appropriate, such as during ship retrofits and new builds.

Patuxent Naval Air Station.—The Committee is aware that the Department of the Navy commissioned the Massachusetts Institute of Technology’s Lincoln Laboratory to conduct a study to determine the effects and a potential mitigation plan between the operation of the proposed wind energy project and the Patuxent Naval Air Station. The study is not yet completed. Therefore, the Committee directs the Navy to refrain from executing any agreement with respect to the operation of the proposed wind energy project until the study is provided to the congressional defense committees.

OPERATION AND MAINTENANCE, MARINE CORPS

Appropriations, 2014	\$5,397,605,000
Budget estimate, 2015	5,909,487,000
House allowance	5,984,680,000
Committee recommendation	5,997,507,000

The Committee recommends an appropriation of \$5,997,507,000. This is \$88,020,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

UNDIST	Maintain Program Affordability: Overestimation of Civilian Full Time Equivalent Targets		- 200,000	- 200,000

Air Force Weather Training Modernization.—The Air Force Weather Agency makes a significant contribution to improving combat effectiveness of our warfighters. The Air Force needs to modernize its weather training programs to be able to continue that contribution. The Air Force may be able to take advantage of different training regimes as it modernizes its training programs, including reliance on organic training, entering into or expanding cooperative programs with other government agencies, such as the National Oceanic and Atmospheric Administration, and entering into or expanding cooperative programs with colleges and universities that have meteorological training programs. The Committee encourages the Air Force to investigate whether the service could improve the effectiveness and efficiency of its weather training programs by placing greater reliance on cooperative training programs.

Lajes Air Base.—The Committee supports the continued bilateral relationship the United States has with Portugal, particularly with respect to United States-NATO operations. However, given current budget constraints, the Committee recognizes the Air Force's need to consolidate its force structure and operations at Lajes Air Base on Terceira Island in the Azores. The Committee understands this reduction will also impact host country civilian positions and the local economy. The Committee encourages the Department to continue to work closely with Portuguese and Azorean officials to minimize the economic impacts to the local population and to continue to explore all possibilities for other U.S. Government uses of Lajes Air Base. The Committee directs the Secretary of Defense to provide the congressional defense committees, not later than 60 days after the submission of the European Infrastructure Consolidation Assessment on United States Air Force, a report describing the continued U.S. presence at Lajes Air Base; steps to be taken to mitigate adverse effects on the surrounding community; and initiatives to strengthen and enhance the strategic relationship between the United States and Portugal.

Budget estimate, 2015	31,198,232,000
House allowance	30,830,741,000
Committee recommendation	31,049,591,000

The Committee recommends an appropriation of \$31,049,591,000.
This is \$148,641,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Item	2015 budget estimate	House allowance	Committee recommendation	Change from	
					Budget estimate	House allowance
	OPERATION AND MAINTENANCE, DEFENSE-WIDE					
	BUDGET ACTIVITY 1: OPERATING FORCES

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	JOINT CHIEFS OF STAFF	462,107	432,107	- 30,000
	Budget documentation disparity: O&M and IT budget justification are inconsistent			- 20,000
	Improving funds management: Inconsistency in management headquarters savings			- 10,000
	SPECIAL OPERATIONS COMMAND	4,762,245	4,802,697	+ 40,452
	Restoring acquisition accountability: Naval Special Warfare Maritime Support Vessel			- 20,298
	Authorization adjustment: SOCOM NCR			- 5,000
	Improving funds management: Programs executing lower than requested			- 12,000
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 18,200
	Program Increase: Flying Hours			+ 95,950
	CIVIL MILITARY PROGRAMS	119,888	179,688	+ 59,800
	Program increase: Youth Challenge			+ 31,000
	Program increase: STARBASE			+ 25,000
	Program increase: Innovative Readiness Training			+ 3,800
	DEFENSE CONTRACT AUDIT AGENCY	556,493	548,093	- 8,400
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 8,400
	DEFENSE CONTRACT MANAGEMENT AGENCY	1,340,374	1,289,295	- 51,079
	Improving funds management: Civilian FTE hiring plan ahead of schedule			- 50,000
	Improving funds management: Program growth based on rates should be included in pricing calculations			- 1,079
	DEFENSE HUMAN RESOURCES ACTIVITY	633,300	648,500	+ 15,200
	Budget documentation disparity: O&M and IT budget justification are inconsistent			- 7,000
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 2,800
	Program increase: Sexual Assault Special Victims' Counsel			+ 25,000
	DEFENSE INFORMATION SYSTEMS AGENCY	1,263,678	1,245,778	- 17,900
	Budget documentation disparity: O&M and IT budget justification are inconsistent			- 7,500
	Improving funds management: Inconsistency in management headquarters savings			- 2,000
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 8,400
	DEFENSE LOGISTICS AGENCY	381,470	391,070	+ 9,600
	Budget documentation disparity: Justification Does Not Match Summary of Price and Program Changes for DFAS Bill			- 1,300
	Budget documentation disparity: Functional transfer to DISA not accounted for in budget documentation			- 1,800
	Program increase: Procurement Technical Assistance			+ 12,700
	DEFENSE POW/MIA OFFICE	21,485		- 21,485
	Transfer: Defense Prisoner of War/Missing Personnel Office [DPMO] resources to the new defense agency responsible for personnel accounting efforts			- 21,485
	DEFENSE SECURITY COOPERATION AGENCY	544,786	537,786	- 7,000
	Authorization adjustment: Combating terrorism fellowship			- 7,000
	DEPARTMENT OF DEFENSE EDUCATION AGENCY	2,566,424	2,556,924	- 9,500
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 10,500

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	Program increase: Professional development for mathematics			+ 1,000
	MISSILE DEFENSE AGENCY	416,644	403,644	- 13,000
	Improving funds management: Excess forward financing for BMDS AN/TPY-2 Radars			- 13,000
	OFFICE OF ECONOMIC ADJUSTMENT	186,987	106,391	- 80,596
	Authorization adjustment: Guam civilian water and wastewater funding ahead of need			- 80,596
	OFFICE OF THE SECRETARY OF DEFENSE	1,891,163	1,849,763	- 41,400
	Authorization adjustment: OSD AT&L BRAC 2015 planning and analysis			- 4,800
	Maintain program affordability: OSD Policy unjustified program growth			- 2,600
	Maintain program affordability: OSD [P&R] eliminate contractor growth for CE2T2 program			- 25,000
	Maintain program affordability: Directed reduction for OSD management headquarters			- 20,000
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 7,000
	Program increase: Healthy Base Initiative			+ 3,000
	Program increase: Readiness and Environmental Protection Initiative			+ 15,000
	WASHINGTON HEADQUARTERS SERVICE	610,982	603,882	- 7,100
	Maintain program affordability: Decrease in construction, alteration and fit out costs not accounted for in budget justification			- 3,600
	Maintain program affordability: Overestimation of civilian full time equivalent targets			- 3,500

UNDIST	Program Increase: NSA Cyber Research with Universities		+ 7,500	+ 7,500
UNDIST	Program Increase: Federal insider threat detection enhancement		+ 10,000	+ 10,000

Defense Language and National Security Education Office.—The Committee recognizes that, in partnership with universities across the country, the Defense Language and National Security Education Office provides critical training for servicemembers and government officials in a number of languages and strategic cultures, including those of the Arab world, Afghanistan, China, and Iran. The Committee encourages the Department of Defense to continue placing a high priority on these programs to ensure warfighters receive the language and culture training needed to complete their missions effectively.

Military Use Airspace.—The Committee encourages the Department of Defense to continue to utilize national assets, such as the Hays Military Operations Area, to maintain airborne combat readiness for both manned and remotely piloted aircraft.

Wildlife Trafficking.—The proceeds of animal poaching and wildlife trafficking are known to fund armed conflict on the African

continent, including by the Lord's Resistance Army and other destabilizing groups in the Great Lakes Region. The Committee supports efforts by Africa Command and Special Operations Command to assist in the mitigation of these illegal activities through their capacity-building engagements with African governments and authorities, including "train the trainer" exchanges and exercises. The Committee expects Africa Command and Special Operations Command to continue these engagements in areas affected by wildlife trafficking.

The Committee also directs the Secretary of Defense to provide a report to the congressional defense committees within 120 days of enactment of this act describing the planned activities to support implementation of the Executive order establishing the Presidential Task Force on Wildlife Trafficking.

STEM Education and STARBASE.—The Committee finds that consolidation of Science, Technology, Engineering, and Mathematics [STEM] education programs and significant changes to the STARBASE program are not advisable at this time. STARBASE provides a unique low-cost leveraging of community and military resources that another Federal agency will not be able to duplicate. The benefits of cooperative community and military relationships stimulate the long-term interest of youth in STEM careers. Therefore, the Committee provides \$25,000,000 to continue the Department of Defense STARBASE program in fiscal year 2015. The Committee encourages the Secretary of Defense to continue the STARBASE program in future fiscal years.

Item Unique Identification Initiative.—The Item Unique Identification [IUID] initiative requires the marking and tracking of assets deployed through the Armed Forces or in the possession of Department of Defense contractors. Improving asset tracking and in-transit visibility has the potential for realizing costs savings by improving the management of defense equipment and supplies throughout their lifecycle. The Committee encourages the Department of Defense to take additional actions to improve asset visibility, to include completing and implementing its strategy for coordinating improvement efforts across the Department.

Defense Personal Property Moves.—The Committee has a long-standing interest in the quality of life of military members and their families and understands the tremendous challenges associated with completing frequent defense personal property moves. The Committee is aware that the Department of Defense has successfully shifted to the Defense Personal Property Program [DP3] and commends the improvements to cost efficiency, the claims experience, and in family satisfaction. The Committee further commends the improvements that the Department and its transportation service providers have made to reduce costs and improve the quality of each military move.

Flame Retardant Military Uniforms.—The Committee recognizes that for several years the Army's rapid fielding initiative program, using overseas contingency operations funding, has provided flame retardant clothing to all deploying soldiers to minimize the risk of burn injuries from improvised explosive devices. The Committee notes that the Army's flame retardant uniforms are approximately double the cost of non-flame retardant uniforms. However, the

Committee understands that recent technical developments in flame retardant garments have begun to reduce costs while offering options and varying levels of protection.

These emerging developments provide the services with ways to protect servicemembers, regardless of the environment, without imposing undue costs on already strained budgets. Therefore, the Committee directs the Secretary of the Army, in coordination with the Secretaries of the Navy and Air Force, to conduct a feasibility study on increased use of flame-retardant uniforms, including a review of available technologies and industry sources of flame retardant fabrics, and to provide a written report to the congressional defense committees not later than 180 days after the date of the enactment of this act.

Transition Assistance Programs.—The Committee applauds the Department’s revamped Transition Assistance Program [TAP] to provide assistance to servicemembers transitioning toward a career or education following military separation. The enhanced program called Transition—Goals, Plans, Success (Transition—GPS) was established to assist servicemembers with their transition as the military draws down by providing information, counseling, tools, and training for servicemembers to separating from the military. While the Committee recognizes the achievements of the Department within Transition—GPS, the Committee encourages the Secretary, in conjunction with the Secretary of the Labor and the Secretary of Veterans Affairs, to continuously improve and build upon the program.

Furthermore, the Committee supports the conclusions reached by the March 2014 Government Accountability Office [GAO] report titled, “Transitioning Veterans: Improved Oversight Needed to Enhance Implementation of Transition Assistance Program.” The report highlighted five areas of concern: the ability for commanders and relevant policy stakeholders to track attendance, establishing training quality, assessing career readiness, ensuring participation and completion, and measuring performance and results in order to evaluate TAP effectiveness. The Committee directs the Secretary of Defense to report to the congressional defense committees on the implementation status of the GAO recommendations included in the report no later than 180 days after date of enactment of this act.

Africa Standby Force.—The Committee commends the African Union for working toward a proposed African Standby Force and supports the more immediate African Capacity for Immediate Response to Crises [ACIRC] force, a multinational African rapid reaction military capability being established to respond to urgent crises and human rights challenges on the African continent. The Committee encourages Africa Command to provide appropriate training and capacity building support when appropriate to the African Union and its member states to realize an effective ACIRC and eventual standby force that are both able counter emerging crises while operating in accordance with international law and human rights norms. The Committee encourages the Secretary of Defense to develop a roadmap to assist the African Union forces with developing a sustainable logistics and airlift capacity.

Federal Insider Threat Detection Enhancement.—The Committee commends the military services for making significant strides towards implementing insider threat detection programs, specifically end-user auditing and monitoring programs. However, the combatant commands have not implemented robust, proven capabilities for end-user auditing and monitoring in support of insider threat detection. Therefore, the Committee recommends an additional \$10,000,000 to be used for the combatant commands to implement proven and effective end-user auditing and monitoring capabilities in support of their existing insider threat detection programs. The Committee urges specific priority be given to U.S. Central Command, U.S. Strategic Command and U.S. Pacific Command.

Middle East Regional Security Studies Programs.—The Committee encourages the Department of Defense to continue to support established university programs that promote regionwide informal workshops and task forces on arms control, regional security, and related topics to the Middle East for Arab, Israeli, and other officials and experts engaged in these issues.

OPERATION AND MAINTENANCE, ARMY RESERVE

Appropriations, 2014	\$2,940,936,000
Budget estimate, 2015	2,490,569,000
House allowance	2,535,606,000
Committee recommendation	2,474,995,000

The Committee recommends an appropriation of \$2,474,995,000. This is \$15,574,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

UNDIST	Maintain program affordability: Reduction to Non-cyber IT programs		- 7,551	- 7,551

National Guard Embedded Mental Health Programs.—The Committee recognizes that suicide continues to be an area of concern in the National Guard and Reserve components. Programs to improve access to behavioral healthcare for National Guard and Reserve members and their families through a collaboration of Federal, State, and community partners are helping to address gaps in treatment. The Committee provides \$10,000,000 to be utilized by the Director of Psychological Health Programs of the National Guard Bureau for implementation of embedded mental health programs in States determined by that office to be at high risk for suicides.

National Guard Facilities and Assets.—The Committee recognizes the number of existing National Guard operational, training, logistics, and maintenance capabilities that can be utilized by Federal, State, and local entities to reduce Federal overhead costs. The Committee encourages the Department of Defense to coordinate interagency use of facilities and capabilities for cost-savings and improved efficiencies in achieving homeland security training and other core mission objectives.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

Appropriations, 2014	\$6,392,304,000
Budget estimate, 2015	6,392,859,000
House allowance	6,393,919,000
Committee recommendation	6,361,281,000

The Committee recommends an appropriation of \$6,361,281,000. This is \$31,578,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

U.S. COURT OF APPEALS FOR THE ARMED FORCES

Appropriations, 2014	\$13,606,000
Budget estimate, 2015	13,723,000
House allowance	13,723,000
Committee recommendation	13,723,000

The Committee recommends an appropriation of \$13,723,000. This is equal to the budget estimate.

ENVIRONMENTAL RESTORATION, ARMY

Appropriations, 2014	\$298,815,000
Budget estimate, 2015	201,560,000
House allowance	201,560,000
Committee recommendation	201,560,000

The Committee recommends an appropriation of \$201,560,000. This is equal to the budget estimate.

ENVIRONMENTAL RESTORATION, NAVY

Appropriations, 2014	\$316,103,000
Budget estimate, 2015	277,294,000
House allowance	277,294,000
Committee recommendation	277,294,000

The Committee recommends an appropriation of \$277,294,000. This is equal to the budget estimate.

ENVIRONMENTAL RESTORATION, AIR FORCE

Appropriations, 2014	\$439,820,000
Budget estimate, 2015	408,716,000
House allowance	371,716,000
Committee recommendation	408,716,000

The Committee recommends an appropriation of \$408,716,000. This is equal to the budget estimate.

ENVIRONMENTAL RESTORATION, DEFENSE-WIDE

Appropriations, 2014	\$10,757,000
Budget estimate, 2015	8,547,000
House allowance	8,547,000
Committee recommendation	8,547,000

The Committee recommends an appropriation of \$8,547,000. This is equal to the budget estimate.

ENVIRONMENTAL RESTORATION, FORMERLY USED DEFENSE SITES

Appropriations, 2014	\$287,443,000
Budget estimate, 2015	208,353,000
House allowance	233,353,000
Committee recommendation	258,353,000

The Committee recommends an appropriation of \$258,353,000. This is \$50,000,000 above the budget estimate to help address unfunded needs.

OVERSEAS HUMANITARIAN, DISASTER, AND CIVIC AID

Appropriations, 2014	\$109,500,000
Budget estimate, 2015	100,000,000
House allowance	103,000,000
Committee recommendation	100,000,000

The Committee recommends an appropriation of \$100,000,000. This is equal to the budget estimate.

COOPERATIVE THREAT REDUCTION ACCOUNT

Appropriations, 2014	\$500,455,000
Budget estimate, 2015	365,108,000
House allowance	365,108,000
Committee recommendation	365,108,000

The Committee recommends an appropriation of \$365,108,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

(In thousands of dollars)

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	COOPERATIVE THREAT REDUCTION	365,108	365,108
1	Strategic Offensive Arms Elimination	1,000	1,000
2	Chemical Weapons Destruction	15,720	15,720
3	Biological Threat Reduction	256,762	256,762
4	Threat Reduction Engagement	2,375	2,375
5	Other Assessments/Admin Costs	27,844	27,844
5	Global Nuclear Security	20,703	20,703
6	WMD Proliferation Prevention	40,704	40,704
	TOTAL, COOPERATIVE THREAT REDUCTION	365,108	365,108

DEPARTMENT OF DEFENSE ACQUISITION WORKFORCE DEVELOPMENT FUND

Appropriations, 2014	\$51,031,000
Budget estimate, 2015	212,875,000
House allowance	51,875,000
Committee recommendation	83,034,000

The Committee recommends an appropriation of \$83,034,000. This is \$129,841,000 below the budget estimate.

**TITLE III
PROCUREMENT**

Funds appropriated under this title provide the resources required to purchase military equipment and hardware, including aircraft, ships, missiles, combat vehicles, ammunition, weapons, electronic sensors and communications equipment, and other procurement items.

The President's fiscal year 2015 budget requests a total of \$89,660,299,000 for procurement appropriations.

SUMMARY OF COMMITTEE ACTION

The Committee recommends procurement appropriations totaling \$91,409,693,000 for fiscal year 2015. This is \$1,749,394,000 above the budget estimate.

Committee recommended procurement appropriations for fiscal year 2015 are summarized below:

SUMMARY OF PROCUREMENT APPROPRIATIONS

[In thousands of dollars]

Account	2015 budget estimate	Committee recommendation	Change from budget estimate
Procurement:			
Aircraft Procurement, Army	5,102,685	4,880,153	- 222,532
Missile Procurement, Army	1,017,483	1,008,692	- 8,791
Procurement of Weapons and Tracked Combat Vehicles, Army	1,471,438	1,701,549	+ 230,111
Procurement of Ammunition, Army	1,031,477	1,015,477	- 16,000
Other Procurement, Army	4,893,634	4,449,383	- 444,251
Aircraft Procurement, Navy	13,074,317	13,960,270	+ 885,953
Weapons Procurement, Navy	3,217,945	3,263,794	+ 45,849
Procurement of Ammunition, Navy and Marine Corps	771,945	754,845	- 17,100
Shipbuilding and Conversion, Navy	14,400,625	15,895,770	+ 1,495,145
Other Procurement, Navy	5,975,828	6,060,433	+ 84,605
Procurement, Marine Corps	983,352	944,029	- 39,323
Aircraft Procurement, Air Force	11,542,571	11,214,612	- 327,959
Missile Procurement, Air Force	4,690,506	4,652,552	- 37,954
Procurement of Ammunition, Air Force	677,400	675,459	- 1,941
Other Procurement, Air Force	16,566,018	16,500,308	- 65,710
Procurement, Defense-Wide	4,221,437	4,380,729	+ 159,292
Defense Production Act Purchases	21,638	51,638	+ 30,000
Total	89,660,299	91,409,693	+ 1,749,394

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Committee directs the Secretary of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2008 Department of Defense Appropriations bill (House Report 110-279). Specifically, the dollar threshold for reprogramming funds will remain at

\$20,000,000 for procurement and \$10,000,000 for research, development, test and evaluation.

In addition, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for service and defense-wide accounts in titles III and IV of this act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

PROCUREMENT OVERVIEW

Physical Access Control Systems.—The Committee is concerned with the challenges the Department of Defense continues to face with the efficacy of their physical access control systems that should prevent unauthorized access to Department of Defense installations. The Department of Defense continues to develop and deploy incompatible programs and systems. These solutions increase costs and often fail to meet existing requirements. Commercially available physical access control systems address these shortfalls in that they are affordable, meet Department of Defense requirements, and do not have a significant sustainment cost. Therefore, the Secretaries of the Army, Navy, and Air Force shall perform a business case analysis that examines the development, procurement, and sustainment cost of existing physical access control systems compared to the cost of physical access control systems available commercially. The Secretaries shall provide a report to the congressional defense committees summarizing the outcome of this business case analysis and actions they plan to take to implement the most affordable solution no later than 180 days after enactment of this act.

Rocket Motor Industrial Base.—The Committee is concerned that the domestic industrial base for tactical solid rocket motors continues to be impacted by constrained budgets, the use of foreign vendors, and a lack of competition. For example, a foreign supplier began development and qualification for a new rocket motor on the AMRAAM missile in 2009 after the domestically supplied rocket failed to qualify because of issues with the propellant and the blast tube insulation. The Committee has learned that the Navy may also be exploring a rocket motor source from a foreign vendor for a tactical missile program. Finally, the Committee understands that the Army recently awarded a sole-source contract for rocket

motors for the Guided Multiple Launch Rocket System, a program that has been stable and in production for some time.

The Committee is concerned that in these programs, a competition for a new rocket motor vendor was not executed; and in two programs, the Department is becoming more reliant on a foreign supplier. The Committee is closely following these developments across all services, as rocket motors continue to be a critical component of the defense industrial base. The Committee believes that whenever possible, domestic sources should be considered, and full and open competition employed before awarding contracts.

Therefore, the Committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics to conduct an independent assessment of domestic and foreign-sourced rocket motor propulsion for all Department of Defense tactical missile programs. This report should include the impacts of foreign-sourced rocket motors on domestic suppliers, and the national security impacts on the defense industrial base. This report shall be delivered to the congressional defense committee not later than 180 days of enactment of this act.

The Committee also directs the Government Accountability Office [GAO] to provide a report to the congressional defense committees within 180 days of enactment of this act that outlines the assumptions and analysis utilized by the Army to justify a sole-source contract to develop and qualify new, insensitive munitions-compliant rocket motors for the Guided Multiple Launch Rocket System, and why a competitive acquisition strategy was not used.

Army Organic Industrial Base.—The Committee directs the Secretary of the Army to provide 45-day written notification to the congressional defense committees prior to the Secretary approving civilian reductions in force that will result in an employment loss of 50 or more full-time employees at any Army organic industrial base facility. The notification shall include the impact that the proposed reduction in force will have on the ability to maintain the organic industrial base critical manufacturing capabilities as delineated in the Army Organic Industrial Base Strategy Report, a detailed accounting of the costs of implementing the reduction in force, and an assessment of the cost of, and time necessary, to restore any lost capability to meet future organic wartime manufacturing needs.

Management of Conventional Ammunition Inventory.—The Committee is aware of the Department of Defense's efforts to better manage its conventional ammunition inventory. The Government Accountability Office recently reported in "Actions Needed to Improve Department-wide Management of Conventional Ammunition Inventory" that more work needs to be done, particularly regarding information sharing between the services. Incomplete and unreliable inventory systems can lead to the wasteful destruction of ammunition, duplicative procurement of ammunition that may be available in the stockpiles of another service, and shortages of ammunition required for forward-stationed forces. To use limited resources more efficiently and improve support to our warfighters, the Committee encourages the Department of Defense to accelerate efforts to automate ammunition tracking and inventory accounting, and affirms its support for the reporting requirements directed in

the report accompanying S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, titled “Management of Conventional Ammunition Inventory.”

Arsenal Sustainment Initiative.—The Committee supports the ongoing efforts of the Department of the Army to develop the Army Organic Industrial Base Strategy. This process is identifying manufacturing capabilities at each organic industrial facility that are critical for this country to sustain in times of war and peace. However, the Committee is concerned that while the Army Organic Industrial Base Strategy is identifying capabilities, further action is needed to fund these capabilities at a level adequate to maintain them. In particular, the Nation’s arsenals are at risk of not having the capacity to respond rapidly to meet the Department’s needs. The Committee directs the Secretary of the Army to assign the arsenals sufficient workload to maintain the critical capabilities identified in the Army Organic Industrial Base Strategy Report, ensure cost efficiency and technical competence in peacetime, and preserve the ability to provide an effective and timely response to mobilizations, national defense contingency situations, and other emergency requirements.

Further, the Committee is aware that while the Army’s manufacturing arsenals have provided critical wartime needs to all the services, they are not always considered by the other services for the work opportunities to sustain them in peacetime. Given the arsenals’ unique capabilities, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this act describing steps taken to encourage the Air Force, Navy and Marine Corps to better use the arsenals for their manufacturing needs.

Arsenal and Ammunition Plant Facility Maintenance.—The Committee is concerned with the reduction in funding for arsenal and ammunition plant facility maintenance. Established in most cases during World War II or before, the Army’s Government-owned, contractor-operated [GOCO] and Government-owned, Government-operated [GOGO] facilities are critical parts of our Nation’s defense industrial base, each with specific areas of expertise. However, prolonged combat operations in Afghanistan and Iraq and a more constrained budget environment have slowed the pace of necessary investments required for routine maintenance and modernization of production capabilities. With these concerns in mind, the Committee directs the Secretary of the Army to continue to submit the Long-range Facilities and Construction Planning at Army Ammunition Plants and Arsenals report, consistent with Senate Armed Services Committee Report 110–335, which accompanies the Duncun Hunter National Defense Authorization Act for Fiscal Year 2009, and 112–26, which accompanies the National Defense Authorization Act for Fiscal Year 2012, including a detailed strategy to address the most urgent needs of the arsenals and ammunition plants and investments that will improve overall facility competitiveness and efficiency.

AIRCRAFT PROCUREMENT, ARMY

Appropriations, 2014	\$4,844,891,000
Budget estimate, 2015	5,102,685,000
House allowance	5,295,957,000
Committee recommendation	4,880,153,000

The Committee recommends an appropriation of \$4,880,153,000.
 This is \$222,532,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
2	Utility F/W Aircraft	13,617	10,787	- 2,830
	Restoring acquisition accountability: Unit cost growth			- 2,830
3	Aerial Common Sensor [ACS] [MIP]	185,090	136,290	- 48,800
	Restoring acquisition accountability: ICS/CLS early to need			- 8,800
	Budget documentation disparity: QRC breakout			- 40,000
4	MQ-1 UAV	190,581	189,081	- 1,500
	Restoring acquisition accountability: Unit cost growth			- 1,500
6	Helicopter, Light Utility [LUH]	416,617	391,617	- 25,000
	Restoring acquisition accountability: ECO unjustified growth			- 25,000
8	AH-64 Apache Block IIIA Reman	157,338	85,338	- 72,000
	Restoring acquisition accountability: Excess advance procurement due to quantity reduction			- 72,000
13	UH-60 Blackhawk M Model [MYP]	132,138	117,138	- 15,000
	Restoring acquisition accountability: Excess advance procurement due to quantity reduction			- 15,000
16	MQ-1 Payload [MIP]	26,913	25,313	- 1,600
	Restoring acquisition accountability: Unit cost growth			- 1,600
25	Network and Mission Plan	114,182	105,380	- 8,802
	Restoring acquisition accountability: Aircraft notebook production delay			- 8,802
31	CMWS	107,364	60,364	- 47,000
	Restoring acquisition accountability: Excess request			- 47,000

Army Aviation Restructure Initiative [ARI].—The Army’s fiscal year 2015 budget request proposes a significant restructuring of Army aviation assets. This includes transferring all Apache helicopters to the active Army from the Army National Guard and shifting Blackhawk helicopters from the active Army to the Army National Guard. The proposal also includes retiring the Kiowa Warrior helicopters and replacing the TH-67 trainer helicopters with Lakota helicopters. The Committee believes the Army has not considered the full fiscal implications of the proposal, and the Army has not provided the Committee a comprehensive divestiture plan for the retiring helicopters.

The Committee understands that the Army estimates saving a total of \$11,942,000,000 under the ARI, including \$10,300,000,000 from divestiture of the Kiowa Warrior helicopters. However, the Committee notes the Army’s cost estimate fails to account for increased costs to procure and maintain additional Lakota helicopters, to train the Army Active Duty and Army National Guard pilots for the new missions, and to operate and maintain Apaches and Blackhawks. Therefore, the Committee directs Cost Assessment and Program Evaluation [CAPE] to do an independent cost analysis of both the ARI and the alternate Army National Guard estimates to complete the proposed transfer and associated out-years costs. The Director, CAPE shall provide a report to the congressional defense committees 120 days after enactment of this act.

In addition, the Committee directs the Secretary of the Army to submit a report to the congressional defense committees not later than 120 days after the enactment of this act on the divestiture

plan for unneeded Army helicopters. This report should address (1) the number of airframes being divested under the ARI by fiscal year, (2) the number of airframes being transferred to other Government agencies, (3) the number of airframes being offered for sale to other nations, (4) the cost of divesting these aircraft, (5) the impact the divestiture of these airframes will have on the domestic rotary wing industrial base and (6) the impact of the divestiture plan on military readiness. Further, the Secretary of the Army is directed not to allow the resale or auction of any divested airframe until 30 days after the report is submitted to the congressional defense committees.

Army Oversight of Aviation Programs.—The Committee is aware of a Department of Army memorandum establishing responsibility for current and future fixed and rotary wing platforms to the Program Executive Office for Aviation. The Committee is also aware that responsibility for key subsystems of the platforms are assigned to several other Program Executive Offices. The Committee understands the Army memorandum has created inefficiencies in program acquisition, material procurements, and support in current systems by establishing multiple organizations within Government to support a single aircraft.

For example, the Enhanced Medium Altitude Reconnaissance and Surveillance System [EMARSS] program, which is covered by the subject memorandum, is under oversight by multiple Program Executive Offices. The combined oversight of multiple Program Executive Offices does not appear to have improved the EMARSS program, as it experienced severe cost growth. These cost overruns led to the Army canceling the program in the fiscal year 2015 President’s budget request. Therefore, the Committee rescinds \$73,500,000 of fiscal year 2014 funds, included in the Consolidated Appropriations Act, 2014 for new EMARSS aircraft.

In addition, the Committee directs the Secretary of the Army to justify the confusing and duplicative management structure mandated by this memorandum including a description of the estimated cost savings or efficiencies that are expected by this reorganization, and report to the congressional defense committees not later than 120 days after enactment of this act.

Army National Guard Blackhawks.—The Committee acknowledges that the older UH–60As need to be modernized and replaced as quickly as possible for the Army National Guard Blackhawk fleet to remain viable and mission capable. It is projected that the Army National Guard will not retire their last UH–60A until 2025, while the Active Army will retire their last UH–60A in 2020. Therefore, the Committee recommends accelerating the fielding of new UH–60M helicopters to the Army National Guard.

MISSILE PROCUREMENT, ARMY

Appropriations, 2014	\$1,549,491,000
Budget estimate, 2015	1,017,483,000
House allowance	1,217,483,000
Committee recommendation	1,008,692,000

The Committee recommends an appropriation of \$1,008,692,000. This is \$8,791,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

	Improving funds management: Unobligated balances	-14,000
	HMMWV Mod Program	60,000	+60,000
	Program increase: HMMWV Ambulance Replacement	+60,000

Family of Medium Tactical Vehicles and the Army Budgeting Process.—The fiscal year 2015 base budget request includes no funds in fiscal years 2015 and 2016 for the procurement of the Family of Medium Tactical Vehicles [FMTV] but carries funding in fiscal year 2017 and 2018 to resume production and eventually meet the Army's acquisition objective. The Committee notes that the lack of funding in fiscal years 2015 and 2016 will shutdown FMTV production for 2 years and will negatively impact the industrial base, resulting in higher acquisition costs when the Army restarts procurement in fiscal year 2017 as planned. The Committee understands that fiscal constraints force difficult trade-offs; however, during its budget review, the Committee identified over \$750,000,000 in poorly budgeted funds within the Other Procurement, Army account. Had the Army performed a similarly rigorous budget review, these excess funds could have been used to address not only the shortfall in FMTV, but other programs as well. To avoid a production shut down and expensive restart costs, the Committee recommends an additional \$250,000,000 for FMTVs.

The Committee understands that the Army budget is assembled by specific mission areas, and that each mission area receives an allocation of funds to spread across its requirements. The Committee notes that as a result, a requirement in one mission area may receive funding, while a requirement in a different area, such as FMTVs, remains unfunded, even if the FMTV is a higher overall priority within the Army than the funded requirement. Therefore, the Committee directs the Secretary of the Army to work with the other Services to review those Service's budgeting processes and to use this information to create an Army budgeting process that al-

lows improved prioritization of requirements so that priority programs do not go unfunded. The Committee directs the Secretary of the Army to report to the congressional defense committees 180 days after the enactment of this act on the findings of this review.

Joint Tactical Radio System.—The Committee commends the Army on implementing an acquisition strategy for Manpack and Rifleman radio procurement that ensures technical and price competition over the next 5 years. However, this strategy revision has taken a significant amount of time to implement and has left \$438,000,000 of previously appropriated funds unobligated, of which \$67,000,000 was offered by the Department of Defense [DOD] for rescission. Due to contract award delays, the Committee recommends an additional rescission of \$103,000,000 and urges the Army to use the remaining unobligated funds to modernize equipment for the “Army of 2020” with the latest in communications and networking capabilities.

High Mobility Multi-Purpose Wheeled Vehicle [HMMWV] Ambulance.—The Committee recognizes the continued value of the HMMWV ambulance, which is tasked to respond to contingency operations, domestic emergencies, and humanitarian assistance requests. The Committee also recognizes that the Army National Guard and the Army Reserve have identified significant shortfalls in HMMWV ambulances which hinder training and operational capabilities. Therefore, the Committee provides \$60,000,000 for procurement of HMMWV ambulances.

AIRCRAFT PROCUREMENT, NAVY

Appropriations, 2014	\$16,442,794,000
Budget estimate, 2015	13,074,317,000
House allowance	14,054,523,000
Committee recommendation	13,960,270,000

The Committee recommends an appropriation of \$13,960,270,000. This is \$885,953,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
1	EA-18G	43,547	1,343,547	+ 1,300,000
	Program increase: 12 EA-18G aircraft			+ 1,200,000
	Program increase: Extend fiscal year 2014 production			+ 100,000
5	Joint Strike Fighter CV	610,652	593,552	- 17,100
	Restoring acquisition accountability: Airframe anticipated negotiations savings			- 17,100
7	JSF STOVL	1,200,410	1,143,610	- 56,800
	Restoring acquisition accountability: Airframe anticipated negotiations savings			- 56,800
12	H-1 Upgrades (UH-1Y/AH-1Z) Advance Procurement	80,926	75,626	- 5,300
	Maintain program affordability: Advance procurement efficiencies			- 5,300
13	MH-60S [MYP]	210,209	203,909	- 6,300
	Restoring acquisition accountability: Unjustified unit cost growth			- 5,100
	Maintain program affordability: Engineering change order funds excess to need			- 1,200
15	MH-60R [MYP]	933,882	913,882	- 20,000
	Restoring acquisition accountability: Production line shut down early to need			- 20,000
17	P-8A Poseidon	2,003,327	1,985,927	- 17,400
	Maintain program affordability: Anticipated unit price savings			- 11,300
	Maintain program affordability: Unjustified growth—production engineering support			- 6,100
26	MQ-4 TRITON Advance Procurement	37,445		- 37,445
	Restoring acquisition accountability: Reduce concurrency			- 37,445
32	Adversary	8,418	4,918	- 3,500
	Improving funds management: Unobligated balances			- 3,500
33	F-18 Series	679,177	750,177	+ 71,000
	Program increase: Marine Corps F-18 Improvements			+ 71,000
55	Common Avionics Changes	157,531	153,067	- 4,464
	Improving funds management: Global Positioning System A-kits early-to-need			- 4,464
61	RQ-7 Series	2,542		- 2,542
	Improving funds management: Unobligated balances			- 2,542
63	F-35 STOVL Series	285,968	205,507	- 80,461
	Improving funds management: Unobligated balances			- 80,461
64	F-35 CV Series	20,502	1,367	- 19,135
	Improving funds management: Unobligated balances			- 19,135
65	Spares and Repair Parts	1,229,651	1,054,651	- 175,000
	Budget documentation disparity: Unjustified increase—spares for aviation outfitting account repairables			- 175,000
66	Common Ground Equipment	418,355	384,855	- 33,500
	Improving funds management: Unobligated balances			- 33,500
70	Special Support Equipment	65,839	60,339	- 5,500
	Restoring acquisition accountability: Unit cost growth			- 5,500
71	First Destination Transportation	1,768	1,168	- 600
	Improving funds management: Unobligated balances			- 600

EA-18G Aircraft.—Airborne electronic attack [AEA] is a capability that has proven critical in recent military engagements and for which there will be growing demand in the future. As the primary air platform performing this mission for the Navy, the EA-18G has proven itself to be a key component to the success of the carrier air wing. The Committee is concerned that the fiscal year 2015 budget request does not include any funding for the EA-18G

aircraft even though Navy leadership has publicly expressed their support for continued procurement into 2016. Therefore, the Committee adds \$1,200,000,000 for an additional 12 aircraft, and \$100,000,000 with direction to the Navy to extend current production to a minimum production rate of two aircraft per month.

MH-60R Seahawk Procurement.—The Committee is aware that the Navy is considering breaching the joint-service H-60 multi-year procurement contract by not procuring the final 29 aircraft in fiscal year 2016. Because this is a joint-service multi-year contract, the Army will be forced to renegotiate the contract, which will delay deliveries and increase unit costs. The Committee believes the Navy will face significant termination costs that will consume much of the projected savings from truncating the program. The Committee understands that these aircraft were to be assigned to the USS *George Washington* and that if this aircraft carrier were to be retired, the 29 MH-60R helicopters would be excess. In light of the Committee’s support for the overhaul of this aircraft carrier, the fiscal year 2015 advance procurement for these aircraft is fully funded. The Committee directs the Navy to review the total MH-60R requirement and urges restoral of the 29 aircraft to the fiscal year 2016 budget request.

MQ-4 Triton Unmanned Aerial Vehicle.—The fiscal year 2015 President’s budget request includes \$37,445,000 for advance procurement of the first production Triton UAV. Due to the deferment of critical mission capabilities into future software blocks within the development program, as discussed elsewhere in this report, it is premature to begin procurement of the Triton aircraft in fiscal year 2015. Therefore, the Committee recommends no funding for advance procurement.

WEAPONS PROCUREMENT, NAVY

Appropriations, 2014	\$3,009,157,000
Budget estimate, 2015	3,217,945,000
House allowance	3,111,931,000
Committee recommendation	3,263,794,000

The Committee recommends an appropriation of \$3,263,794,000. This is \$45,849,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

	Restoring acquisition accountability: Unit cost efficiencies			- 9,963
15	Harm Mods	111,739	106,431	- 5,308
	Restoring acquisition accountability: Unit cost growth			- 5,308
23	MK-48 Torpedo ADCAP Mods	46,893	44,960	- 1,933
	Restoring acquisition accountability: Unit cost growth			- 1,933

MK 45 Gun Mount Industrial Base.—The Committee understands that no order has been placed in 2 years for naval gun mount modernization. As a result, a significant amount of previously appropriated funds made available for modernization of MK 45 gun mounts remain unobligated. The delays and fluctuation in work increases price and performance risk, and is also harmful to the manufacturer and supplier industrial base. Therefore, the Committee encourages the Navy to utilize available funds to put on contract four MK 45 gun mount mods. Guns would be provided for two DDG upgrades and two CG upgrades.

PROCUREMENT OF AMMUNITION, NAVY AND MARINE CORPS

Appropriations, 2014	\$549,316,000
Budget estimate, 2015	771,945,000
House allowance	629,372,000
Committee recommendation	754,845,000

The Committee recommends an appropriation of \$754,845,000. This is \$17,100,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[Dollars in thousands]

	Item	Qty.	2015 budget estimate	House recommendation	Qty.	Committee recommendation	Change from		House estimate

Shipbuilding Industrial Base and Workload Allocation.—The Committee remains concerned generally about the overall health of the shipbuilding industrial base and specifically about the health of the non-nuclear surface combatant shipbuilding industry. The Committee reiterates its commitment to the goal of reducing costs and increasing value in the shipbuilding program and believes that cooperative workload allocation agreements between the Navy and industry may provide an alternative method to obtain efficiency and economies in Navy ship design and construction with the goals of closing the shortfalls in the fleet and retain the shipbuilding industrial base needed for future military requirements. Therefore, the Secretary of the Navy is directed to engage industry in discussions on future shipbuilding workload distribution and methods to ensure the viability of the non-nuclear shipyards over the long term.

For instance, when the LPD-17 program was experiencing significant production issues, the Department of the Navy entered into a workload agreement, “Memorandum of Understanding Concerning the Reallocation of LPD-17 and DDG-51 Ship Construction Workload” (SWAP 1), with shipbuilders on June 17, 2002. The purpose of the agreement was to reallocate workload to ensure “stability at both yards, stabilize and reduce total projected shipbuilding costs for the LPD-17 Program, and maintain properly balanced sources of supply for future Navy surface combatant shipbuilding”. The agreement also requires the Navy to award a compensatory DDG-51 or equivalent workload if the Navy awards a shipbuilding contract for LPD 28. The Committee understands that

the Navy considers this agreement to remain in full force and effect, and that the Navy will engage with shipbuilders involved in the agreement to discuss workload distribution. While Congress is not a party to this agreement, the Committee directs the Navy to submit a report to the congressional defense committees no later than March 1, 2015, on the Navy's options and potential courses of action to fulfill the requirements of the SWAP 1 agreement preceding or concurrent with when LPD 28 is placed under contract. The report should also address strategies to ensure the viability and stability of the non-nuclear shipyards over the long term to preserve the defense maritime industrial base and achieve the highest level of performance and quality from the shipbuilders.

CVN 79.—The Committee understands that in light of significant cost overruns on CVN 78, USS *Ford*, the Navy is working diligently to reduce costs of the follow-on ship of the class, CVN 79, USS *Kennedy*. The Committee further understands that this includes innovative contracting strategies leading to greater competition. The Committee commends the Navy for this approach and believes that additional savings could be achieved as a result of increased competitive acquisition strategies.

DDG 1000 Destroyer.—The fiscal year 2015 budget request includes \$419,532,000 for the DDG 1000 program, an increase of \$187,838,000 over amounts appropriated in fiscal year 2014. The Committee notes that the fiscal year 2015 request is \$98,200,000 above the projected amount required for fiscal year 2015 during last year's budget submission and that in total, the Navy has added \$451,900,000 from fiscal years 2015 to 2017 to the DDG 1000 program in the fiscal year 2015 budget submission. The Committee understands that these increases are attributed to the fact that the Navy had not previously funded the program to the cost estimate provided by the Director, Cost Assessment and Program Evaluation [CAPE]. The Committee further understands that the Navy does not plan to budget to the CAPE estimate in fiscal year 2016.

The Committee notes that the DDG 1000 program breached Nunn-McCurdy cost caps in 2010 and was re-certified by the Under Secretary of Defense for Acquisition, Technology, and Logistics on June 1, 2010. The recertification found that the primary root cause for the Nunn-McCurdy breach was the reduction in quantity from ten ships to three ships. The Committee further notes that subsequent to the Nunn-McCurdy recertification, Congress has fully funded annual budget requests, supported multiple above threshold reprogrammings, provided Special Transfer Authority, supported changes to the acquisition strategy, and supported a litigation settlement that provided \$198,000,000 to the DDG 1000 program.

In the fiscal year 2015 budget submission, the Navy's estimated procurement cost for the three DDG 1000 ships of the class is \$12,069,400,000, an increase of 34.4 percent since fiscal year 2009, when the third ship of the class was procured. Given the steadily rising costs of the DDG 1000 program since authorization and appropriation of the third and final ship of the class, the Committee believes the Navy and the congressional defense committees would be well-served with an updated Independent Cost Estimate. Therefore, the Committee directs the Director, CAPE, to provide with the

fiscal year 2016 budget submission an updated Independent Cost Estimate for the DDG 1000 program.

Littoral Combat Ship [LCS].—The fiscal year 2015 budget request includes full funding for the procurement of three Littoral Combat Ships [LCS], a reduction of one ship compared to the prior year budget request. The Committee notes that the Navy agreed to a block buy contract for 20 LCS in fiscal year 2010, ramping two shipyards up to a rate of two LCS per year beginning in fiscal year 2012, and that the Navy had planned on procuring the last four ships of that block buy in fiscal year 2015. The fiscal year 2015 budget submission does not support that plan. The Committee understands that the Navy now plans to extend the block buy contract into fiscal year 2016, and that to preserve block buy pricing additional funds for the acquisition of long lead materials are required in fiscal year 2015. Therefore, the Committee recommends \$80,000,000 only for preservation of block buy pricing. The Assistant Secretary of the Navy for Research, Development and Acquisition is directed to provide the congressional defense committees an update on the Navy's acquisition strategy for LCS prior to the obligation of these funds.

Amphibious Warships.—According to section 123 of S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, the Secretary of the Navy is authorized to incrementally fund an additional LPD-17 *San Antonio*-class amphibious ship. The Committee continues to be concerned about the level of risk being assumed with amphibious lift capability. Therefore, to help address the amphibious lift shortfall that exists today, the Committee recommendation provides \$800,000,000 to incrementally fund an additional LPD-17 class amphibious ship.

Joint High Speed Vessel [JHSV].—The Department of the Navy is procuring JHSVs for fast intra-theater transportation of troops, military vehicles and equipment. With submission of the fiscal year 2013 budget, the Navy assumed risk with the overall JHSV requirement and reduced the program procurement objective from 18 to 10 ships. Under this plan, the final ship would be purchased with fiscal year 2013 funding. However, based on the ability of the JHSV to support all branches of the military services, provide intra-theater sealift, operate in littoral environments and austere port environments, and support humanitarian/disaster relief activities, the Committee supports procuring additional JHSVs to address the original requirement. Further, the Committee notes that one JHSV is being used as an experimental test platform for Navy technology projects. Therefore, the Committee recommends \$200,000,000 to procure one JHSV in fiscal year 2015.

Polar-Class Icebreakers.—The Committee notes that since 2006, the United States has been operating a *Polar*-class icebreaker fleet consisting of one heavy and one medium vessel. The Committee understands that this falls short of U.S. requirements. While the United States has deferred investment in its polar fleet, other nations such as China and Russia are pressing ahead to develop robust icebreaking capability, allowing them to pursue their national interests in the polar regions. The Committee supports the inter-agency process to develop requirements for a new *Polar*-class icebreaker or similarly Arctic-capable surface vessel, recognizing the

strategic importance of Arctic operations to our Nation's future security and prosperity. Therefore, the Committee directs the Deputy Secretary of Defense, in cooperation with the Secretary of the Navy and the Commandant of the United States Coast Guard, to provide the congressional defense committees a plan to begin expanding U.S. icebreaking capacity that will result in the approval of an operational requirements document no later than 180 days after the date of enactment of this act.

OTHER PROCUREMENT, NAVY

Appropriations, 2014	\$5,572,618,000
Budget estimate, 2015	5,975,828,000
House allowance	5,923,379,000
Committee recommendation	6,060,433,000

The Committee recommends an appropriation of \$6,060,433,000. This is \$84,605,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

Littoral Combat Ship [LCS] Mission Modules.—In February 2014, the Secretary of Defense announced the Department's decision to reduce the planned LCS buy from 52 to 32 ships and ordered the Secretary of the Navy to conduct a review of the Navy's small surface combatant needs. The Committee understands these actions were taken due to concerns raised by the Director of Operational Test and Evaluation and Congress on the escalating costs of the ship as well as its survivability. Additionally, the Government Accountability Office [GAO] has repeatedly noted that the Navy's strategy includes buying significant numbers of LCS mission modules before their performance is demonstrated and that the current inventory of mission packages exceeds the quantities necessary for operational testing.

Given the testing concerns raised by GAO and the Department's current strategic pause on the LCS program, the Committee finds it prudent to also slow the procurement of LCS mission modules. Therefore, the Committee recommends a total reduction of

\$71,314,000 to the fiscal year 2015 budget request for LCS mission modules and related components.

Consolidated Afloat Networks and Enterprise Services [CANES].—The fiscal year 2015 budget request includes \$422,604,000 for continued procurement and installation of CANES and CANES—Intell. The Committee understands that the CANES program declared a Major Automated Information System [MAIS] Critical Change in December 2013 due to the inability to achieve a full deployment decision within 5 years of selection of the preferred alternative. The testing schedule for the CANES program has faced significant delays due to unrelated mechanical problems on the original test ship USS *Milius* (DDG 69), and initial operational test and evaluation is now scheduled to take place in August 2014 aboard the USS *Higgins* (DDG 76). The Committee is concerned with the steep increase in procurement of systems planned for fiscal year 2015, and that the program will reach its maximum production rate before significant testing results can be completed. Therefore, the Committee recommends a reduction of six systems from the fiscal year 2015 budget request, which would support an overall increase in the number of systems procured from 20 in fiscal year 2014 to 27 in fiscal year 2015.

PROCUREMENT, MARINE CORPS

Appropriations, 2014	\$1,240,958,000
Budget estimate, 2015	983,352,000
House allowance	927,232,000
Committee recommendation	944,029,000

The Committee recommends an appropriation of \$944,029,000. This is \$39,323,000 below the budget estimate.

C-130 Avionics Modernization Program.—The Committee supports modernization of the C-130H fleet and understands the Air Force plans to operate approximately 150 C-130H models for the foreseeable future. As such, the Committee supports continuation of the C-130 Avionics Modernization Program [AMP] program to ensure the Air National Guard operates relevant and modernized aircraft. Therefore, consistent with the report accompanying S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, the Committee directs the Air Force to obligate prior year funds authorized and appropriated for the C-130 AMP program to conduct such activities as are necessary to complete testing and transition the program to production and installation of modernization kits.

C-130 Aircraft Fleet.—The Committee recognizes the Air Force's commitment to intra-theater lift as supported by the multi-year procurement plan of the C-130J aircraft. However, with a sizable fleet of older model C-130s residing within the Reserve components, the Committee is concerned with the long term sustainment of the fleet. Consistent with section 138 of S. 2410, the National Defense Authorization Act for fiscal year 2015, the Committee directs the Air Force to develop a modernization, recapitalization and fielding plan for the current C-130 fleet that addresses the most

recent Quadrennial Defense Review requirement that the Air Force maintain 300 intra-theater lift aircraft and addresses the recommendations of the National Commission on the Structure of the Air Force.

B-52 Upgrades.—The Committee commends the Department’s efforts to upgrade the B-52 aircraft. While supportive of the aircraft and its valuable legacy within the Air Force, the Committee is monitoring the costs associated with follow-on modifications to the aircraft. As such, the Committee requests that the Secretary of the Air Force provide regular updates on progress of the internal weapons bay upgrade and the combat network communications technology enhancement and how these modernization efforts will allow the B-52 to conduct additional missions and participate in future operations.

Undefinitized Contract Actions.—During review of the budget request, the Committee notes several programs within the Aircraft Procurement, Air Force account that had large amounts of unobligated balances in prior years. For example, two programs had over \$600,000,000 unobligated between fiscal year 2012 and 2013. Among those programs, the Air Force had chosen undefinitized contract actions [UCAs] in awarding contracts. While these contract actions are certainly within the bounds of authority, as outlined in Defense Federal Acquisition Regulation, Part 217, UCAs are required to be definitized 180 days after award; however, many of these contract awards took longer. For example, in documentation provided to the Committee for the HC/MC 130 recapitalization program, the obligation data indicated that typical contract negotiations take 27 months for completion. The Committee believes such practice is unacceptable. The Government Accountability Office [GAO] has investigated the use of UCAs and has made recommendations to reduce their usage noting that the risk to the government are greater when there is little incentive for contractors to finalize the contract. Therefore, the Committee directs the Government Accountability Office to review the use of UCAs within the Aircraft Procurement, Air Force account to determine how often this contracting option is being utilized and for what purpose; if other contract award options are more efficient and effective; and what recommendations GAO can make to reduce the number of UCAs within the account in the future and submit a report 120 days after enactment of this act.

MISSILE PROCUREMENT, AIR FORCE

Appropriations, 2014	\$4,446,763,000
Budget estimate, 2015	4,690,506,000
House allowance	4,546,211,000
Committee recommendation	4,652,552,000

The Committee recommends an appropriation of \$4,652,552,000. This is \$37,954,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

21	Def Meterological Sat Prog (Space)	87,000	30,000	- 57,000
	Maintain program affordability: Compete DMSP F-20 storage			- 57,000
22	Evolved Expendable Launch Veh (Infrast.)	750,143	688,143	- 62,000
	Improving funds management: Forward financing			- 62,000
23	Evolved Expendable Launch Veh (Space)	630,903	733,603	+ 102,700
	Restoring acquisition accountability: Unit cost growth			- 22,300
	Program increase: One competitive launch			+ 125,000

Global Positioning System [GPS] Digital Payload.—The Committee is aware of technical and cost challenges with the current analog navigation payload on GPS III. The Committee believes that early Air Force investment, when combined with industry investment, into the development of a digital navigation payload will significantly reduce cost and schedule risk for the future GPS constellation. The fiscal year 2015 budget request includes \$32,900,000 for GPS III Space Modernization Initiative [SMI]. The Committee fully supports the Air Force's SMI request and directs that of the amount appropriated, not less than \$20,000,000 shall be used to mature an alternate GPS digital payload.

Space Modernization Initiative [SMI].—Recently, the Department of Defense has begun to shift its perspective of the architecture for space-based capabilities away from monolithic space platforms to creative distribution of payloads on national, civil, and commercial satellites. The Committee firmly believes that movement away from large satellites, where possible, will result in significant cost savings and reduce the schedule to deliver payloads into orbit. Further, the Air Force is entering into a pathfinder program with the commercial satellite communications industry that may provide enhanced coverage at a lower cost to both the Air Force and the commercial provider. The Committee commends the Department of Defense and the Air Force for their unconventional approach to ensure viable space-based capability for years to come. The Committee encourages the Air Force to use funds appropriated for the

space modernization initiative to further implement these new space-based capability strategies.

Defense Meteorological Satellite Program [DMSP].—The budget request includes \$87,000,000 for storage, integration, test, launch, and early-orbit checkout of one Defense Meteorological Satellite Program [DMSP] satellite. Air Force analysis indicates this satellite will not be needed on-orbit until 2020, costing an additional \$425,000,000 in storage during that period. This amount is excessive for a 1990s technology satellite originally costing approximately \$500,000,000. The Committee is aware that only a few of the capabilities provided by this satellite cannot be met by other existing civil and commercial satellites. The Committee questions the Air Force’s current plan to launch this satellite in 2020 at a significant cost to the Government for a capability that may be met through other space-based assets. Therefore, Committee directs the Air Force to reassess its plan for the last DMSP and pursue a least cost approach for the disposition of this satellite. Of the amount requested for DMSP, the Committee provides \$30,000,000.

PROCUREMENT OF AMMUNITION, AIR FORCE

Appropriations, 2014	\$729,677,000
Budget estimate, 2015	677,400,000
House allowance	648,200,000
Committee recommendation	675,459,000

The Committee recommends an appropriation of \$675,459,000. This is \$1,941,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[Dollars in thousands]

	Item	Qty.	2015 budget estimate	Qty.	House recommendation	Qty.	Committee recommendation	Change from		House estimate

Energy Efficient Military Billeting.—The Committee encourages the Department of Defense to continue efforts to leverage technology and deliver energy efficient returns on investments, such as thermal technologies in battlefield housing. Such technologies will realize cost savings by reducing the military's battlefield fuel footprint while also making current billeting structures more energy efficient.

Weapon Storage Area Recapitalization.—The Committee commends the Air Force for its focus on weapon storage area recapitalization and encourages the Air Force to take into consideration the amount of immediate use when choosing the sequence for recapitalization projects. With this in mind, the Committee directs the Secretary of the Air Force to submit a report to the congressional defense committees within 90 days of enactment of this act detailing the rationale for the order chosen and the plan to recapitalize the identified weapon storage areas.

PROCUREMENT, DEFENSE-WIDE

Appropriations, 2014	\$4,240,416,000
Budget estimate, 2015	4,221,437,000
House allowance	4,353,121,000
Committee recommendation	4,380,729,000

The Committee recommends an appropriation of \$4,380,729,000. This is \$159,292,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
21	Major Equipment	11,640	11,402	- 238
	Restoring acquisition accountability: AFRTS cost growth			- 238
24	Vehicles	1,500		- 1,500
	Restoring acquisition accountability: Unjustified requirement			- 1,500
28	Aegis BMD Advance Procurement	68,880		- 68,880
	Transfer to line 30 for All Up Round procurement			- 68,880
30	Aegis BMD	435,430	504,310	+ 68,880
	Transfer from line 28 for All Up Round procurement ..			+ 68,880
31	BMDS AN/TPY-2 Radars	48,140	88,140	+ 40,000
	TPY-2 spares			+ 40,000
34	Iron Dome	175,972	350,972	+ 175,000
	Program Increase			+ 175,000
42	Major Equipment, OSD	43,708	39,708	- 4,000
	Restoring acquisition accountability: Cost growth			- 4,000
44	Major Equipment, TJS	10,783	10,283	- 500
	Restoring acquisition accountability: Classified adjustment			- 500
47	MC-12	40,500	35,100	- 5,400
	Restoring acquisition accountability: Early to need			- 5,400
50	Non-Standard Aviation	48,200	30,200	- 18,000
	Restoring acquisition accountability: Reduce 1 aircraft			- 18,000
54	CV-22 Modification	25,578	18,894	- 6,684
	Budget documentation disparity: Unjustified request for aviation equipment			- 6,684
58	Precision Strike Package	145,929	134,929	- 11,000
	Budget documentation disparity: Unjustified recurring cost growth			- 11,000
59	AC/MC-130J	65,130	70,988	+ 5,858
	Program Increase for modifications			+ 5,858
72	Combatant Craft Systems	51,937	50,337	- 1,600
	Restoring acquisition accountability: Combat craft medium excess costs			- 1,600
90	Installation Force Protection		12,740	+ 12,740
	Transfer from Line #95			+ 12,740
91	Individual Protection		79,605	+ 79,605
	Transfer from Line #96			+ 79,605
92	Joint Bio Defense Program (Medical)		13,784	+ 13,784
	Transfer from Line #95			+ 4,872
	Transfer from Line #96			+ 8,912
93	Collective Protection		55,560	+ 55,560
	Transfer from Line #96			+ 55,560
94	Contamination Avoidance		175,840	+ 175,840
	Program Increase			+ 17,000
	Transfer from Line #95			+ 152,525
	Transfer from Line #96			+ 6,315
95	Chemical Biological Situational Awareness	170,137		- 170,137
	Transfer to Line #90			- 12,740
	Transfer to Line #92			- 4,872
	Transfer to Line #94			- 152,525
96	CB Protection & Hazard Mitigation	150,392		- 150,392
	Transfer to Line #91			- 79,605
	Transfer to Line #92			- 8,912
	Transfer to Line #93			- 55,560
	Transfer to Line #94			- 6,315

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	Classified Adjustment	-29,644

Special Operations Command [SOCOM] Manned Intelligence Surveillance Reconnaissance [ISR] Aircraft.—The Committee notes the fiscal year 2015 budget request of \$40,500,000 for modification of MC-12 aircraft being transferred from the Air Force to Special Operations Command. However, the Committee is concerned with SOCOM’s continuing changes to its requirements for manned ISR aircraft. The incremental changes to the manned ISR fleet, including the proposed divestiture of recently upgraded aircraft, seems to indicate that SOCOM does not understand its long-term ISR requirements. As a result, the Committee concurs with the language as directed by S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, to complete a review of the platform requirements for manned ISR aircraft to support United States Special Operations Forces and includes a reduction of \$5,400,000.

DEFENSE PRODUCTION ACT PURCHASES

Appropriations, 2014	\$60,135,000
Budget estimate, 2015	21,638,000
House allowance	51,638,000
Committee recommendation	51,638,000

The Committee recommends an appropriation of \$51,638,000. This is \$30,000,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[Dollars in thousands]

	Item	Qty.	2015 budget estimate	Qty.	House recommendation	Qty.	Committee recommendation	Change from		Change from	
								Budget estimate	Qty.	Budget estimate	Qty.
1	DEFENSE PRODUCTION ACT PURCHASES		21,638		51,638		51,638				
	DEFENSE PRODUCTION ACT PURCHASES								+ 30,000		

Additional Funding.—The Committee recognizes the critical role that the DPA title III program serves in strengthening the U.S. defense industrial base and believes that this work is in the national interest. Therefore, the Committee increases funding for DPA by \$30,000,000 over the budget request. The Committee directs that the additional funding be competitively awarded to new initiatives and priority consideration should be given to completion of DPA projects initiated in prior years. Furthermore, the Committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics to inform the congressional defense committees 30 days prior to any obligation or expenditure of these funds.

TITLE IV

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

Funds appropriated under this title provide the resources required to conduct a program of research, development, test and evaluation, including research in basic science, applied research, advanced technology development, demonstration and validation, engineering and manufacturing development, and operational systems development.

The President's fiscal year 2015 budget requests a total of \$63,533,947,000 for research, development, test and evaluation appropriations.

SUMMARY OF COMMITTEE ACTION

The Committee recommends research, development, test and evaluation appropriations totaling \$62,566,834,000 for fiscal year 2015. This is \$967,113,000 below the budget estimate.

Committee recommended research, development, test and evaluation appropriations for fiscal year 2015 are summarized below:

SUMMARY OF RESEARCH, DEVELOPMENT, TEST AND EVALUATION APPROPRIATIONS

[In thousands of dollars]

Account	2015 budget estimate	Committee recommendation	Change from budget estimate
Research, Development, Test and Evaluation:			
Research, Development, Test and Evaluation, Army	6,593,898	6,544,151	- 49,747
Research, Development, Test and Evaluation, Navy	16,266,335	15,920,372	- 345,963
Research, Development, Test and Evaluation, Air Force	23,739,892	23,082,702	- 657,190
Research, Development, Test and Evaluation, Defense-Wide	16,766,084	16,805,571	+ 39,487
Operational Test and Evaluation, Defense	167,738	214,038	+ 46,300
Total	63,533,947	62,566,834	- 967,113

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Committee directs the Secretary of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2008 Department of Defense Appropriations bill (House Report 110-279). Specifically, the dollar threshold for reprogramming funds will remain at \$20,000,000 for procurement and \$10,000,000 for research, development, test and evaluation.

In addition, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for service and defense-wide accounts in titles III and IV of this act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appro-

priations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION OVERVIEW

Use of Research, Development, Test and Evaluation Funding for Procurement of End Items.—The fiscal year 2015 budget request includes \$69,670,000 in two separate programs in the Research, Development, Test and Evaluation, Navy account for the acquisition of weapons that will be used operationally. The Committee strongly believes that these requests violate intent of section 8055 of the Department of Defense Appropriations Act, 2014, which prohibits the use of research and development funding to procure end-items for delivery to military forces for operational use. The Committee further notes that this legislative provision has been carried annually for several years, and has again been requested by the President for inclusion in the Department of Defense Appropriations Act, 2015. The Committee recommendation once again includes this restriction.

In particular, the fiscal year 2015 budget request includes \$25,000,000 in Research, Development, Test and Evaluation, Navy to procure two incrementally funded CH-53K helicopters that will be utilized as operational platforms after completion of the program's test schedule. The Committee is aware of the need to maintain the industrial base following a 1 year schedule delay that shifted the program's production decision into fiscal year 2016. However, this circumstance does not justify the violation of public law and sound acquisition practice. Therefore, the recommendation denies \$25,000,000 requested for these operational aircraft and provides \$15,000,000 in research and development to sustain qualified vendors pending a production decision for the CH-53K program. This recommendation allows the test program to proceed as scheduled and has no negative impact on the program's production schedule.

In addition, the fiscal year 2015 budget request includes \$44,670,000 in Research, Development, Test and Evaluation, Navy to incrementally fund a Ship to Shore Connector ship in addition to the previously funded test asset. All of the program's test and training activities will be conducted with the first Ship to Shore Connector test craft. This second ship will deliver after completion of the program's test activities and be utilized as an operational asset. Further, the Committee notes that the fiscal year 2015 budget request includes \$123,233,000 in Shipbuilding and Conversion, Navy for the procurement of two operational Ship to Shore Connec-

tors. The Committee denies the use of research and development funds for the procurement of an operational craft, and realigns funds from Research, Development, Test and Evaluation, Navy to Shipbuilding and Conversion, Navy for the procurement of a third Ship to Shore Connector in fiscal year 2015. The realignment of funds has no impact on the program's acquisition schedule and allows the test program to proceed as scheduled.

Navy Justification Material.—The Committee is concerned with the quality of the material provided by the Navy to justify the fiscal year 2015 President's budget request. The budget justification was incomplete, and lacked several mandatory documents, such as R-4a forms. The deletion of these exhibits is at odds with the Financial Management Regulations and the principles of justifying the Navy's budget to Congress. Additionally, several exhibits contained the words "to be determined" in areas where projections could be made such as contract award date, vendor, and contract type.

The supplemental information that was provided to the Committee offered little further insight. For example, several major acquisition programs requested large amounts of funding for "primary hardware development," without further explanation. These types of summary entries limited Committee insight into the planned work. As a result, the Committee directs the Secretary of the Navy to provide the mandated justification documents and the required level of detail in the fiscal year 2016 budget request.

Alternative Energy Research.—The Committee continues to support the fiscal and operational value of investing in alternative energy research. The recommendation includes an additional \$75,000,000 for Army, Navy and Air Force research and development to continue research of promising alternative energy technologies, such as renewable energies, alternative fuels, and energy efficiencies. The Committee encourages the services to focus on the ability of platforms, installations, and personnel to operate with a diverse mix of fuels.

F135 Engine.—When the Department of Defense made the decision to terminate the alternate engine for the F-35 Joint Strike Fighter [JSF] in May of 2011, it reassured the Committee that a second engine was no longer necessary as a hedge against the failure of the main JSF engine program. The Department also stated that the financial benefits, such as savings from competition, were small if they existed at all. Since that time, the F135 engine has experienced numerous problems, including the failure of an oil flow management valve and a pre-take-off fire in the past few weeks, both of which grounded the entire fleet of over 100 aircraft. Further, the F135 engine unit cost has not declined as projected. However, the Committee believes that had the alternate engine program continued, competition would have incentivized the F135 engine manufacturer to find creative methods to drive down prices and ensure timely delivery of a high quality product, which is consistent with current Department preference for competition in acquisitions. Therefore, the Committee recommends the Secretary of Defense reassess the value of an alternate engine program creating competition to improve price, quality, and operational availability.

Solar Research in Dry-Dust Areas.—The Committee supports efforts by the Department of Defense to become more energy efficient. These efforts have demonstrated cost savings and are an important part of the 2010 and 2014 Quadrennial Defense Reviews and the Department of Defense’s Operational Energy Strategy. Renewable energy, including solar, is an important part of these efforts. Earlier this year, the Army broke ground on its largest solar energy plant at Fort Huachuca in Arizona. Covering 155 acres, the plant is projected to provide not less than 25 percent of the Fort’s electricity. The Committee believes solar initiatives are also important for overseas operations, particularly in the Middle East and Africa, where in country supplies are unreliable and large amounts of energy often need to be transported to theater. However, dry-dust problems can prevent the optimal use of solar energy in some areas. Therefore, the Committee urges the Department of Defense to continue research into the use of solar energy in dry-dust regions.

Basic Research.—The fiscal year 2015 budget request includes \$2,017,502,000 for basic research to be performed by all Department of Defense [DOD] services and agencies. This amount is \$149,096,000, or 7 percent below the fiscal year 2014 enacted level. The Committee is discouraged by this sharp decline, because basic research is the foundation upon which other technology is developed. Further, basic research performed by DOD spans across universities and colleges, small businesses and laboratories, growing future scientists and creating new business opportunities. Earlier this year, the Committee held a hearing on Defense Research and Innovation. The testimony provided by the witnesses indicated that a sharp decline in science and technology investment could threaten America’s technological edge. Therefore, the Committee recommends \$2,274,928,000 for basic research, a 5 percent increase for the Department of the Army, Department of the Air Force, Department of the Navy and DOD, above previously enacted levels. The Committee also expects that the Department not make disproportionate or unjustified reductions to science and technology entities as part of the headquarters management reduction initiative.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

Appropriations, 2014	\$7,126,318,000
Budget estimate, 2015	6,593,898,000
House allowance	6,720,000,000
Committee recommendation	6,544,151,000

The Committee recommends an appropriation of \$6,544,151,000. This is \$49,747,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

	Improved funds management: P504 transferred from line 167			+ 48,446
167C	Apache Block III		90,099	+ 90,099
	Improved funds management: D17 transferred from line 167			+ 74,099
	Ground fire acquisition development			+ 16,000
167D	Fixed Wing Aircraft		819	+ 819
	Improved funds management: D18 transferred from line 167			+ 819
167E	Improved Turbine Engine Program		39,328	+ 39,328

[In thousands of dollars]

Line	Item	2014 budget estimate	Committee recommendation	Change from budget estimate
	Improved funds management: EB1 transferred from line 167			+ 39,328
169	Digitization	10,912	5,996	- 4,916
	Transfer EC8: Emerging Technologies from NIEs to line 169A			- 4,916
169A	Emerging Technologies from NIEs		4,916	+ 4,916
	Transfer EC8: Emerging Technologies from NIEs from line 169			+ 4,916
171	Other Missile Product Improvement Programs	49,848	38,348	- 11,500
	Restoring acquisition accountability: DZ9 program delay			- 11,500

Armored Multi-Purpose Vehicle [AMPV].—The fiscal year 2015 budget request includes \$92,353,000 for the Armored Multi-Purpose Vehicle [AMPV], a Family of Vehicles based on a military vehicle derivative that will replace the M-113 Armored Personnel Carriers to support Armored Brigade Combat Teams across the range of military operations. The Committee notes that the Army Acquisition Objective of 3,007 vehicles for the AMPV program of record does not include vehicles for Echelons Above Brigade [EAB], which could require additional quantities in excess of 1,900 vehicles. The Committee understands that the Army is preparing a report to the congressional defense committees on its plan to eventually replace all M-113 Armored Personnel Carriers within Echelons Above Brigade formations; however, the Committee notes that any potential acquisition program requires an Analysis of Alternatives to support decision milestones.

The Committee notes that the fiscal year 2015 budget request includes \$9,913,000 in a separate program element for several Analyses of Alternatives [AoA], and further notes that while the Army is considering selection of the AMPV EAB as a potential AoA candidate in fiscal year 2015, the Army has not yet decided whether to proceed with that particular AoA. Therefore, the Committee directs the Army to conduct an Analysis of Alternatives for an AMPV EAB requirement in fiscal year 2015, and allocates \$4,000,000 only for that purpose from within available funds. Further, the Army is directed to report to the congressional defense committees within fifteen days of completion of the AoA on its findings and results.

Patriot Modernization.—The fiscal year 2015 budget request includes \$152,991,000 in Research, Development, Test and Evaluation, Army for Patriot Modernization, an increase of \$117,957,000 over amounts appropriated in fiscal year 2014. The Committee has previously expressed concerns in Senate Reports 113-85 and 112-196 regarding the lack of clearly defined requirements for this program, the absence of an acquisition strategy that embraces competition, and a lack of full understanding of costs. These concerns are exacerbated by the fiscal year 2015 budget submission, which more than doubles projected funding required for Patriot Modernization through fiscal year 2018, compared to estimates provided for that same time period just 1 year ago. The Committee notes that this comparison does not include funding identified in this year's budget submission for a future radar competition beginning in fiscal year 2017. Further, the Committee notes that exclud-

ing the development and acquisition of a new radar, the Army plans to invest over \$2,200,000,000 for modernization of the Patriot system over the next 5 years in Research, Development, Test and Evaluation, Army and in Missile Procurement, Army, and that the large majority of these funds would not be competitively awarded. The Committee does not believe this to be in the best interest of the Army or the U.S. taxpayer.

Finally, the Committee notes that the Army has delayed submission to the congressional defense committees of reports required in Senate Report 113–85, which direct a plan from the Secretary of the Army that establishes an open system software architecture for future upgrades and technology refresh to the Patriot system in the near-term, and an acquisition strategy from the Secretary of the Army in conjunction with the Under Secretary of Defense for Acquisition, Technology and Logistics that incorporates full and open competition for Patriot Modernization in the near-, mid- and long-term. Therefore, the Committee does not find the requested program increase justified, and recommends \$37,991,000 for Patriot Modernization in fiscal year 2015, consistent with amounts appropriated in fiscal year 2014.

In addition, the Committee directs the Under Secretary of Defense for Acquisition, Technology and Logistics, in conjunction with the Director of the Office of Secretary of Defense Cost Assessment and Program Evaluation, to provide with the fiscal year 2016 budget submission a cost assessment of the acquisition strategy for Patriot Modernization, as well as an estimate of savings that would result from inserting competition in the acquisition strategy in the near-term.

Network Integration Evaluation [NIE].—The fiscal year 2015 budget request includes \$105,279,000 to conduct two Network Integration Evaluation [NIE] exercises. The Committee notes that the Army continues to over-estimate costs for the NIE, resulting in repeated significant underexecution, accumulating carry-over funding and annual budget re-estimates. The Committee further notes that the Army intends to apply \$20,000,000 of funds appropriated in fiscal year 2014 to fiscal year 2015 requirements. Accordingly, the Committee recommends a reduction to the fiscal year 2015 request to ensure the Army can execute the funds it is provided.

Army Aviation Modernization Programs.—The fiscal year 2015 budget submission includes \$264,887,000 for the modification and product improvement of multiple aircraft. The Committee notes that this includes funds for no less than five major efforts, including two major acquisition programs, the UH–60L Digital Cockpit program and the Improved Turbine Engine Program [ITEP]. The Committee further notes that neither the UH–60L Digital Cockpit program nor the ITEP program has been fully funded for two consecutive budget cycles and that both programs are beset by repeated program delays. The Committee is concerned that the Army is again heading towards failure with two major acquisition programs, and does not believe this matter is alleviated by co-mingling funding for these programs with other aviation modernization efforts. Therefore, the Committee recommends adjusting the budget structure for the modernization of aviation platforms and directs

the Army to maintain the revised budget alignment in the fiscal year 2016 budget submission.

Precision Weapons Testing.—The Committee understands that the Army is executing on-going technology and development programs for small, precision weapon munitions that provide low-collateral damage capabilities in urban environments and counter-insurgency operations. The Committee encourages the Army to continue to develop and flight test guidance, navigation, control, and targeting capabilities on small, precise weapons.

Military Batteries.—The Committee recognizes the critical nature of high quality batteries to power military wheeled and tracked vehicles in austere, demanding environments. The Committee understands that utilizing batteries based on decades-old design poses potential risks to equipment and personnel, and that the Army has increased use of batteries based on modern designs that deliver improved performance in tactical environments. The Committee directs the Secretary of the Army to provide with the fiscal year 2016 budget submission a report detailing safety incidents by different types of battery models used.

Materials Technology for Strategic Defense.—The Committee notes the Army Research Laboratory [ARL] is expanding research, education, and technology development efforts in materials and metals processing science and engineering, aiming to transform the affordability, performance, and environmental sustainability of strategic materials. The Committee further notes that ARL's Open Campus concept benefits the academic community and industry through collaboration with ARL's research staff, leading to continued technological superiority for the U.S. warfighter, and encourages the Army to review whether its strategic materials efforts could benefit from the Open Concept approach.

Army Inventory Tracking.—The Committee is concerned about difficulties to effectively and efficiently manage and account for equipment returning from Afghanistan. This challenge also affects cataloguing, inventorying, and tracking of equipment in the continental United States. The Committee understands that the Army is testing automated inventory tracking and management solutions to address capability gaps, and encourages further testing and evaluation to determine if these solutions can be cost-effective, time-saving alternatives to the current means of cataloguing and tracking returning equipment. The Committee directs the Army to report to the congressional defense committees not later than 120 days after the enactment of this act on the result of these evaluations.

Health Surveillance Technologies.—The Committee is aware of Department of Defense efforts to use technology to improve surveillance of hospital-based patient safety and quality initiatives as well surveillance of acute and chronic public health disease threats. Deployment of these critical technologies has the ability not only to detect rarely occurring biological threat agents, but the ability to identify the occurrence of naturally occurring infectious illnesses. The technologies can be further modified to detect non-infectious diseases and chronic illness, and to conduct patient safety surveillance in the hospital and outpatient settings. The Committee encourages the Department to work with the medical and academic

community and continue its efforts in reaching the full deployment of these technologies.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

Appropriations, 2014	\$14,949,919,000
Budget estimate, 2015	16,266,335,000
House allowance	15,877,770,000
Committee recommendation	15,920,372,000

The Committee recommends an appropriation of \$15,920,372,000. This is \$345,963,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
1	University Research Initiatives	113,908	133,908	+ 20,000
	Program Increase			+ 20,000
2	In-House Laboratory Independent Research	18,734	19,142	+ 408
	Program Increase			+ 408
3	Defense Research Sciences	443,697	497,145	+ 53,448
	Program Increase			+ 53,448
5	Force Protection Applied Research	139,496	169,496	+ 30,000
	Program Increase			+ 5,000
	Program Increase: Alternative energy			+ 25,000
32	Surface and Shallow Water Mine Countermeasures	100,349	86,734	- 13,615
	Budget documentation disparity: USV product development undefined			- 13,615
42	Ship Concept Advanced Design	17,864	12,271	- 5,593
	Transfer to National Defense Sealift Fund: Strategic Sealift Research and Development			- 5,593
43	Ship Preliminary Design & Feasibility Studies	23,716	2,448	- 21,268
	Restoring acquisition accountability: CSC contract award delay			- 3,305
	Budget documentation disparity: Undefined contract design for Naval Operational Logistics Information			- 2,000
	Transfer to National Defense Sealift Fund: Naval Operational Logistics Integration			- 15,963
49	Ohio Replacement	849,277	853,277	+ 4,000
	Program Increase: Submarine propulsion component development			+ 4,000
50	LCS Mission Modules	196,948	173,348	- 23,600
	Improving funds management: Prior year unobligated balances and schedule slips			- 23,600
56	Cooperative Engagement	43,578	37,478	- 6,100
	Restoring acquisition accountability: CAB contract award delay			- 3,000
	Restoring acquisition accountability: AMDR delay			- 3,100
62	Navy Logistic Productivity	3,873	3,473	- 400
	Improving funds management: Unobligated balances			- 400
71	Joint Precision Approach and Landing Systems—Dem/Val	54,896	23,124	- 31,772
	Restoring acquisition accountability: Removing F-18 and MH-60R integration			- 31,772
76	Tactical Air Directional Infrared Countermeasures [TADIRCM] ..	5,657	5,556	- 101
	Program terminations: JATAS			- 101
77	ASE Self-Protection Optimization	8,033	5,923	- 2,110
	Budget documentation disparity: Unjustified request for test assets			- 2,110
81	Space and Electronic Warfare [SEW] Architecture/Engineering Support	22,393	18,798	- 3,595
	Budget documentation disparity: Poor justification materials			- 3,595
87	Other Helo Development	46,154	40,099	- 6,055
	Transfer MH-XX: To program Line #87X			- 6,055
87X	MH-XX		6,055	+ 6,055
	Transfer MH-XX: From program Line #87			+ 6,055
92	P-3 Modernization Program	1,710	710	- 1,000
	Improving funds management: Unobligated balances			- 1,000
94	Tactical Command System	70,248	62,748	- 7,500
	Budget documentation disparity: Unjustified request for JMPS 64 bit			- 7,500
95	Advanced Hawkeye	193,200	193,200	
	Restoring acquisition accountability: Cost growth for modernization and poor execution			- 10,000
	Program increase: Advanced Hawkeye			+ 10,000

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
102	Executive Helo Development	388,086	348,086	-40,000
	Restoring acquisition accountability: Savings from early down select			-40,000
107	Small Diameter Bomb [SDB]	71,849	51,286	-20,563
	Restoring acquisition accountability: JSF integration			-20,563
108	Standard Missile Improvements	53,198	36,698	-16,500
	Improving funds management: Behind in execution			-16,500

Ocean Exploration Program.—As recommended by the President’s Commission on Ocean Policy, the Office of Naval Research [ONR] should support the National Oceanic Atmospheric Administration’s “America’s Ocean Exploration Program” through continued cooperation on advanced technology, such as remotely controlled and autonomously operated vehicles. Where appropriate, the Committee encourages ONR to enable information sharing with other Federal research agencies by integrating and leveraging relevant research and data.

Commonality for Command and Control Software.—The Department of the Navy spends a significant portion of its annual budget to procure, develop, and maintain numerous Command and Control [C2] software systems to meet the needs of Navy Flight Test Ranges. These systems contain common software components. Typically, software components are not off-the-shelf systems, leading to complex interoperability challenges which limit data sharing. Therefore, the Committee urges the Navy to identify concepts that enable the decoupling of software components for reuse in future

Government C2 systems at Naval Flight Test Ranges. In addition, the Committee encourages the Navy to evaluate the value of establishing a government owned-government led open source code repository.

Navy Alternative Energy.—The Committee provides an additional \$25,000,000 for Navy alternative energy research. The Committee encourages the Navy to expand ocean renewable energy testing, research, develop, and deploy for maritime security systems, support at-sea surveillance and communications systems, and explore opportunities to reduce the cost of energy and increase energy security at coastal Department of Defense [DOD] facilities. The Committee encourages the Navy to continue its investments in developing ocean renewable energy technologies, as defined in the Energy Independence and Security Act of 2007, and to coordinate with the Department of Energy and designated National Marine Renewable Energy Centers for ocean renewable energy demonstration activities at or near DOD facilities.

Power Generation and Energy Storage.—The Committee supports the Navy's investments in power generation and energy storage research. The Committee notes that development and deployment of lithium-ion batteries are critical to current and future missions, but safety incidents and concerns have made it challenging for operational utility. Therefore, the Committee encourages the Department of the Navy to continue development and qualification of technologies to reduce the risk of thermal runaway in lithium-ion batteries.

HAZMAT Elimination.—Until recently, most on-board ship water purification systems used bromine as an antimicrobial. However, bromine is toxic, and requires special HAZMAT handling which is time-consuming and expensive. While the Navy has placed bromine-free systems on most of the large deck surface ship classes, it has not yet removed bromine systems from the LCS, CG, DDG, and FFG classes. The Committee urges the Navy to explore using systems that eliminate this HAZMAT threat to its personnel.

Counter Anti-Access/Area Denial Capabilities.—The Committee remains concerned about the ability of U.S. naval forces to confront anti-access/area-denial environments in maritime domains, particularly in the Asia Pacific region. U.S. Forces face complex and sophisticated emerging ballistic and cruise missile threats that impact operational access and mission effectiveness. The Committee urges the Office of Naval Research to conduct research efforts on technologies that enhance the ability of U.S. naval forces to operate in heavily contested environments.

Integrated Undersea Surveillance System.—The Committee understands that the Integrated Undersea Surveillance System provides the Navy with its primary means of submarine detection. The Committee believes that developing technology that is capable of autonomous installation of an undersea passive acoustic array should be a Navy priority. Therefore, the Committee encourages the Navy to continue developing this technology.

Navy Integrated Capability Concept.—The Committee notes the Department of the Navy is pursuing a streamlined approach to integrating multiple weapon systems under the Navy Integrated Capability Concept. This concept will greatly enhance interoperability

across weapon systems in the Navy; however, the other military departments are not participating in these integration activities. In addition, this concept is directing the modification of Navy weapons systems, which is expected to cost over \$4,000,000,000. The Committee believes that such a large financial commitment cannot be carried out without proper validation of requirements, which is required of any major defense acquisition program. As a result, the Committee directs the Cost Assessment and Program Evaluation [CAPE] and the Joint Requirements Oversight Council [JROC] to review and validate this cost and requirements of the concept and report to the congressional defense committees within 180 days of enactment of this act.

Ohio Replacement Program.—The fiscal year 2015 President’s budget request includes \$853,277,000 to continue development of the *Ohio*-class replacement submarine. The current fleet of 14 ballistic submarines are scheduled to retire in fiscal year 2027, after 42 years of service. The Committee received testimony from the Chief of Naval Operations that replacement of the *Ohio*-class SSBN “is the top priority program for the Navy” and encourages the same priority for the program in future years’ budgets. The Committee strongly urges the Navy to keep this program on schedule and within budget.

F/A-18 and EA-18G Propulsion Upgrade Study.—The Committee encourages the Department of the Navy to continue researching potential F414-400 turbofan engine upgrades for the F/A-18 and EA-18G. Therefore, the Committee fully funds the fiscal year 2015 request for the F/A-18 and EA-18G modernization plan.

Amphibious Combat Vehicle.—This fiscal year 2015 request includes \$105,749,000 to begin development of the Amphibious Combat Vehicle Increment 1.1. The funding is requested to manufacture 33 prototype vehicles, conduct testing and other associated costs. The Committee is supportive of the Marine Corps’ Amphibious Combat Vehicle [ACV] program but is concerned with aspects of the proposed acceleration of the acquisition strategy, such as inadequate test schedules and excessive numbers of prototypes. Therefore, the Committee fully funds the fiscal year 2015 request, but rescinds \$40,000,000 previously appropriated in the Department of Defense Appropriations Act, 2014. The combined fiscal year 2014 and fiscal year 2015 funds allows ample funding for competitive contract awards in fiscal year 2015.

Electromagnetic Railgun.—The Navy has initiated a new effort to transition several breakthrough technologies to the warfighter, including the electromagnetic railgun. The advantages of this capability include increased range over traditional propellant guns, enhanced lethality, increased ammunition storage capacity, and decreased costs when compared to current land attack missiles. The fiscal year 2015 President’s budget request includes, and the Committee fully funds, \$58,696,000 to procure equipment and define ship modifications for a railgun demonstration on a Joint High Speed Vessel.

In an effort to accelerate the railgun’s deployment and reduce the risk of this technology, the Committee encourages the Navy to fund a small railgun demonstration as proposed by the Defense Ordnance Technology Consortium. Demonstration of a smaller weapon

would allow for the rapid production, testing, and early fielding of a tactical railgun system. Once developed, this system may also be used for early fielding of an integrated air and missile defense system to provide testing components for other systems.

By April 1, 2015, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees that outlines the Navy and Strategic Capabilities Office's plan to demonstrate a small (10 mega-joule or less system) electromagnetic railgun system as a step to reduce program risk for follow-on development efforts.

Unmanned Carrier Launched Airborne Surveillance and Strike [UCLASS] System.—The Committee supports the request of \$403,017,000 to continue the development of the UCLASS program in three segments: the air segment, the control system and connectivity segment, and the carrier segment. The Committee is concerned that the Navy is proceeding with UCLASS development prior to the formal establishment of stable requirements.

For example, earlier this year, the Navy issued a second draft request for proposals for the air segment, which included changes to the key performance parameters from the original draft. The changes in requirements forced industry to significantly change their air vehicle designs to better meet the amended parameters. This could have been avoided if the UCLASS requirements had been formally established through a Joint Requirements Oversight Council approved capability development document [CDD] prior to issuing a draft request for proposal. The Committee is concerned that the Navy is avoiding basic acquisition practices at the outset of a very large development program. To help ensure key performance parameters are well established and understood in the future, the Committee directs the Secretary of the Navy to obtain Joint Requirements Oversight Council approval of the UCLASS CDD before issuing the final request for proposal.

MQ-4 Triton Unmanned Aerial Vehicle [UAV].—The fiscal year 2015 President's budget requests \$498,003,000 to continue system development and begin modernization of the RQ-4 Triton UAV program. Last year, the program experienced a 2 year delay in development and added \$312,000,000 across fiscal years 2014 and 2015. This year, the program has experienced an additional year delay and added \$407,600,000 across fiscal years 2015, 2016 and 2017. The Committee is concerned with the cost and schedule breaches over the past few years. In addition, the Committee is troubled by the software development delays, the reduction of a test article, the development of a unique ground station, and the lack of anti-tamper systems to protect the critical technologies. Therefore, the Committee recommends deferring modernization until a review of the capabilities development document outlining the modernization program is performed by the Joint Review Oversight Council [JROC]. The Committee reduces the fiscal year 2015 research and development request by \$60,000,000, and directs the Navy to use \$5,000,000 to complete the analysis in support of the JROC review. The recommendation includes a separate modernization budget line item for transparency.

Satellite Communications Interference.—The Committee is aware that the Department of the Navy is investigating methodologies to

decrease interference in satellite communication between the Mobile User Objective System [MUOS] satellite transmission and the terminals. The Committee is concerned about problems associated with interference in ground terminals for wideband satellite communications systems and encourages further development of technologies that can effectively address this interference. Therefore, the Committee fully funds the budget request for the satellite communication development program and encourages the Navy to work with small businesses to provide an affordable solution.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

Appropriations, 2014	\$23,585,292,000
Budget estimate, 2015	23,739,892,000
House allowance	23,438,982,000
Committee recommendation	23,082,702,000

The Committee recommends an appropriation of \$23,082,702,000. This is \$657,190,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Classified adjustment			-418,182

Technology Transfer.—The Committee recognizes the importance of the technology transfer program and recommends an additional \$2,500,000 to complement and leverage current program efforts largely focused on licensing Department of Defense patents across a broad range of industries. The Committee encourages the Department of Defense to apply the additional funds to universities with robust programs in aviation and aerospace research. The funds will allow these universities to lead the transfer of defense technology

to address specific technology shortfalls within the United States aviation and aerospace industry.

The Competitive Rocket Innovation—Modern Engine Arrangement.—The Committee is concerned with the Air Force’s reliance on the Russian RD–180 engine to power the first stage of the Atlas V launch vehicle for assured access to space. When the Department originally decided to use the RD–180 engine, the Air Force committed to develop an advanced rocket engine that would eventually replace the RD–180. Unfortunately, the Air Force failed to make rocket engine development a priority, so the program remains a science and technology project with no formal completion schedule that would deliver a new engine in this decade.

The fiscal year 2015 science and technology budget request includes \$43,059,000 for liquid rocket engine technology development. The Committee believes this level of funding falls short of the investment needed to create a viable new engine program and therefore adds \$25,000,000.

The Committee also recognizes that, in addition to assuring access to space for national payloads, civil space programs and the commercial launch industry would benefit from an affordable, domestically manufactured, advanced technology rocket engine that would be available to all launch providers. Therefore, the Committee directs the Secretary of the Air Force to develop an affordable, competitive rocket engine development strategy that delivers a rocket engine by 2019. The strategy should include an assessment of the potential benefits and challenges of using public-private partnerships and innovative teaming arrangements. The Secretary of the Air Force shall submit the development strategy to the congressional defense committees no later than 180 days after the enactment of this act.

Space Launch Range Services and Capability.—The Committee notes that a lack of competition for launch services over the past decade has resulted in significant launch costs and disincentives for industry to invest in development to improve launch capabilities. The Committee believes additional competition can be achieved by creating new opportunities within the United States launch infrastructure, including commercial and State-owned launch facilities. Increasing the capability and number of launch facilities helps to ensure our Nation’s ability to launch priority space assets. Therefore, to promote competition at launch facilities, \$7,000,000 is provided to spaceports or launch and range complexes that are commercially licensed by the Federal Aviation Administration and receive funding from the local or State government. These funds shall be used to develop the capacity to provide mid-to-low inclination orbits or polar-to-high inclination orbits in support of the national security space program.

Combat Rescue Helicopter.—The Committee fully supports the Air Force’s decision to proceed with an acquisition program to replace the aging HH–60G Pave Hawk combat search and rescue helicopter. Due to the timing of this decision, the President’s budget request for fiscal year 2015 reflects no funding in fiscal year 2015 and a shortfall of \$436,000,000 from fiscal year 2016 through 2018.

Since 2010, the HH–60G Pave Hawk readiness rate has remained around 60 percent. However, the cost to achieve this rate

has grown an average of 7 percent year-by-year. Based on this data, the Committee believes it is unaffordable not to recap the aging Pave Hawk fleet. Therefore, the Committee provides an additional \$100,000,000 in fiscal year 2015 and urges the Secretary of the Air Force to fully fund this program in the out-years consistent with the most recent decision on the program.

The Committee notes that some combat rescue scenarios in the Africa Command and Pacific Command areas of responsibilities could create challenges to a pure rotor wing fleet. Therefore, to ensure the program addresses the full spectrum of combat rescue missions, the Committee encourages the Air Force to review the joint operational needs and requirements to determine if a high-low capability would best meet the combatant commander's needs.

The Committee also directs that should the Secretary of the Air Force consider terminating the combat rescue helicopter program, a 30-day written notification must first be provided to the congressional defense committees. This program is designated as a congressional special interest item.

Joint Surveillance and Target Attack Radar System [JSTARS] Recapitalization.—The Committee is encouraged by the Air Force's effort to replace the aging, and increasingly costly, JSTARS E-8C aircraft, and supports the conclusions of Air Force's Analysis of Alternatives [AOA] study. The AOA determined that a business jet aircraft outfitted with existing moving target indicator [MTI] radar and battle management command and control [BMC2] technology would meet the combatant commanders' warfighting requirements at the lowest cost. However, the budget request shows that the Air Force intends to pursue a traditional acquisition program and expend nearly \$2,000,000,000 on a research and development effort despite the fact that existing radars could be integrated onto existing business jet airframes.

The Committee is concerned that the Air Force plans to begin retirement of this high demand/low density asset in 2016 just as it is embarking on an extensive development program with no production planned until 2019. Further, the Air Force plans to launch into competitive prototyping in fiscal year 2015 before a formal capabilities development document is approved that finalizes the system requirements to be prototyped. The Air Force states their plan is to leverage high technology readiness level communication, sensor, and BMC2 system technologies to reduce program cost, schedule, and risk.

However, the program, as laid out, will not enter into the engineering, manufacturing, and development phase until fiscal year 2017, with over \$400,000,000 spent prior to that phase. The current acquisition strategy does not reflect the mature, affordable and existing components that will be utilized.

The Committee believes this is an integration effort rather than a research and development effort, and for that reason, reduces the fiscal year 2015 request by \$63,088,000, and directs the Secretary of the Air Force to reassess the acquisition strategy to shorten the development phase and enter into production earlier.

B-52 Radar Replacement.—In March 2013, the Air Force submitted a report to the Committee that stated replacing the B-52 radar will cost less than sustaining its existing radar for the re-

maining service life of the aircraft. The Committee also understands that legacy radar sustainment costs will increase in the coming years, but the Air Force cannot afford the up-front development cost of a replacement radar. The Committee recommends the Secretary of the Air Force reassess the cost of a new radar versus the cost of sustaining the legacy radar, and consider including funds in the fiscal year 2016 budget request to begin replacement of the B-52 legacy radar system.

Requirements Analysis and Maturation.—The Committee understands that the Department of Defense [DOD] has spent over \$130,000,000 to develop and deploy multi-physics engineering software applications. These applications have been used in over 70 pilot demonstration programs to improve the outcomes of DOD weapon system acquisitions through rapid virtual prototyping using high performance computing and software tailored for complex DOD weapon system issues. The Committee believes that the Department is on the verge of making a paradigm change in weapons system engineering. Therefore, the Committee encourages the Department to expand and institutionalize virtual prototyping in the weapon system acquisition process. The Committee provides an additional \$3,000,000 to establish a systems engineering capability for DOD weapon system virtual prototyping based on high performance computing.

Advanced Extremely High Frequency Terminals.—The Committee is concerned with the change to the Air Force's plan that delays development and acquisition of Advanced Extremely High Frequency [AEHF] terminals for the bomber fleet of aircraft. The Committee believes that any gap in command and control of nuclear forces is unacceptable. Therefore, the Committee directs that the Secretary of the Air Force provide a detailed plan on how it will mitigate any bomber related command and control shortfall resulting from the revised AEHF terminal acquisition strategy. The report shall be submitted to the congressional defense committees not later than 120 days from enactment of this act.

C-130H Upgrades for the Air National Guard.—The Committee received a letter from the State Adjutants General of the National Guard outlining their support for continued modernization of the Air National Guard's C-130H fleet. In this letter, the Adjutants General expressed their concern that the C-130H fleet would not be modified with Automatic Dependent Surveillance-Broadcast [ADS-B] Out capability prior to 2020. The letter highlights that the current \$2,300,000,000 C-130 Avionics Modernization Program [AMP] does not include this critical ADS-B Out capability. Because the AMP does not include the ADS-B Out modification, the Committee is encouraged by the State Adjutants General request to pursue an alternative C-130 Communication, Navigation, Surveillance/Air Traffic Management [CNS/ATM] solution for the Air National Guard to meet the 2020 mandate. Therefore, the Committee would be willing to consider a reprogramming request submitted to the congressional defense committees transferring fiscal year 2015 funds to the C-130 Airlift Squadrons budget line item in the Research, Development, Test and Evaluation, Air Force appropriation to begin a program in fiscal year 2015.

High-Altitude Intelligence, Surveillance, and Reconnaissance [ISR] Programs.—The RQ-4 Global Hawk provides unique capabilities that are in high demand supporting critical missions in all six geographic combatant command regions across the globe. Likewise, the U-2 aircraft provides unique intelligence, surveillance, and reconnaissance [ISR] capabilities and treaty verification data currently unmet by any other Air Force platform. In the fiscal year 2015 budget request, the Air Force outlines its intent to begin retiring the U-2 fleet in 2016. The Air Force also proposes to begin work that will integrate the U-2 sensor onto the Global Hawk platform at a cost of \$487,000,000, as reported in 2013. The Committee is concerned by the Air Force's decision to retire a critical piece of its high-altitude ISR fleet without a high-altitude ISR transition plan, and the projected cost to upgrade the Global Hawk Block 30. Therefore, of the amounts appropriated in Research, Development, Test and Evaluation, Air Force for Global Hawk RQ-4 UAV, \$77,100,000 intended for payload integration may not be obligated until the Secretary of Defense provides a classified report to the congressional defense committees. The report should identify the different types of high-altitude, combatant commander strategic ISR requirements, which platforms are or can be used to fulfill these requirements, and which requirements will not be met if the U-2 is retired. This report shall also contain an updated high-altitude ISR transition plan and an estimate of the cost to modify the Global Hawk Block 30 or any other platform.

Arctic Domain Awareness.—The Committee is concerned with the pace of needed development in the arctic region, particularly with respect to arctic domain awareness. The United States currently has a limited weather satellite presence covering the region that will be further reduced by 2019. Therefore, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees, within 180 days of enactment of this act, outlining a plan to ensure arctic domain awareness coverage for the foreseeable future, including an assessment of the potential to partner with Canada on the Canadian Weather Satellite mission.

Air Force T-1A Aircraft.—The T-1A aircraft is used to train all tanker and transport pilots and, due to its age, requires significant upgrades or a service life extension. The Committee supports section 139 of S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, which requires the Air Force to submit to the congressional defense committees a report on the options for replacing or upgrading the T-1A aircraft's capability.

Minority Leaders Program.—The Committee encourages the Air Force Research Laboratory to invest in research activities that can be conducted by the Air Force Minority Leaders Program to meet critical defense capabilities, science and technology, future workforce, and technical program objectives for the Air Force. Additionally, the Committee urges the Air Force Research Laboratory to expand the research areas in which the Air Force Minority Leaders Program can participate.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE-WIDE

Appropriations, 2014	\$17,086,412,000
Budget estimate, 2015	16,766,084,000
House allowance	17,067,900,000
Committee recommendation	16,805,571,000

The Committee recommends an appropriation of \$16,805,571,000.
This is \$39,487,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
2	Defense Research Sciences	312,146	332,146	+ 20,000
	Basic research program increase			+ 20,000
4	Basic Operational Medical Research Science	49,848	60,757	+ 10,909
	Basic research program increase			+ 10,909
5	National Defense Education Program	45,488	60,488	+ 15,000
	Military Child STEM Education programs			+ 15,000
6	Historically Black Colleges and Universities/Minority Institutions	24,412	31,412	+ 7,000
	Basic research program increase			+ 7,000
13	Information & Communications Technology	334,407	324,407	- 10,000
	Maintain program affordability: Eliminate program growth in new starts			- 10,000
20	Tactical Technology	305,484	300,484	- 5,000
	Program increase: Arctic Operations			+ 5,000
	Maintain program affordability: Lack of transition plan			- 10,000
21	Materials and Biological Technology	160,389	150,389	- 10,000
	Improving funds management: Poor execution			- 10,000
22	Electronics Technology	179,203	169,203	- 10,000
	Improving funds management: Poor execution			- 10,000
28	Combating Terrorism Technology Support	69,675	99,675	+ 30,000
	Program increase			+ 30,000
29	Foreign Comparative Testing	30,000	20,000	- 10,000
	Maintain program affordability: Reduce program growth			- 10,000
33	Discrimination Sensor Technology	45,110	32,110	- 13,000
	Improving funds management: Project MD95 excess growth			- 13,000
43	Advanced Innovative Analysis and Concepts	60,000	53,000	- 7,000
	Maintain program affordability: Eliminate program growth			- 7,000
47	Joint Capability Technology Demonstrations	131,960	119,960	- 12,000
	Improving funds management: Unobligated balances			- 12,000
54	Generic Logistics R&D Technology Demonstrations	16,836	21,836	+ 5,000
	Program increase			+ 5,000
60	Command, Control and Communications Systems	243,265	239,265	- 4,000
	Maintain program affordability: Excessive growth in new starts			- 4,000
62	Network-Centric Warfare Technology	386,926	350,426	- 36,500
	Authorization adjustment: Hellads			- 20,000
	Restoring acquisition accountability: Classified program adjustment			- 16,500
63	Sensor Technology	312,821	302,821	- 10,000
	Maintain program affordability: Excessive growth in new starts			- 10,000
66	Quick Reaction Special Projects	69,319	59,319	- 10,000
	Maintain program affordability: Maintain level of effort			- 10,000
72	Operational Energy Capability Improvement	31,800	48,300	+ 16,500
	Restore reduced funding level			+ 16,500
80	Advanced Sensors Application Program	15,518	19,518	+ 4,000
	Program increase			+ 4,000
81	Environmental Security Technical Certification Program	51,462	66,462	+ 15,000
	Restore funding to the fiscal year 2014 enacted level			+ 15,000
82	Ballistic Missile Defense Terminal Defense Segment	299,598	170,832	- 128,766
	MT07 Test: Transfer to line 82a			- 111,366
	Restoring acquisition accountability: Software build concurrency			- 17,400
82a	Ballistic Missile Defense Terminal Defense Segment Test		111,366	+ 111,366
	MT07 Test: Transfer from line 82			+ 111,366
83	Ballistic Missile Defense Midcourse Defense Segment	1,003,768	854,391	- 149,377
	Authorization adjustment: Ground-Based Midcourse Defense reliability and maintenance			+ 30,000

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	MT08 Test: Transfer to line 83a			- 79,877
	MD97: Transfer to line 83b			- 99,500
83a	Ballistic Missile Defense Midcourse Defense Segment Test		79,877	+ 79,877
	MT08 Test: Transfer from line 83			+ 79,877
83b	Improved Homeland Defense Interceptors		99,500	+ 99,500
	MD97: Transfer Improved Homeland Defense Interceptors from line 83			+ 99,500
84	Chemical and Biological Defense Program—Dem/Val	179,236	163,236	- 16,000
	Restoring acquisition accountability: INATS Milestone B delay			- 10,000
	Restoring acquisition accountability: Equine Encephalitis vaccine delay			- 6,000
85	Ballistic Missile Defense Sensors	392,893	271,084	- 121,809
	MT11 Test: Transfer to line 85a			- 71,309
	MD96: Transfer LRDR to line 85b			- 50,500
85a	Ballistic Missile Defense Sensors Test		71,309	+ 71,309
	MT11 Test: Transfer from line 85			+ 71,309
85b	Long Range Disc Radar		50,500	+ 50,500
	MD96: Transfer LRDR from line 85			+ 50,500
88	AEGIS BMD	929,208	753,779	- 175,429
	MT09 Test: Transfer to line 88a			- 89,628
	Restoring acquisition accountability: SM-3 BLK IIA Manufacturing quantities excess to test requirements			- 50,801
	Restoring acquisition accountability: AEGIS BMD 5.1 unjustified budget increase			- 35,000
88a	AEGIS BMD Test		89,628	+ 89,628
	MT09 Test: Transfer from line 88			+ 89,628
91	Ballistic Missile Defense Command and Control, Battle Management and Communications	443,484	413,484	- 30,000
	Restoring acquisition accountability: Excess ramp up prior to completion of program baseline			- 30,000
96	Israeli Cooperative Programs	96,803	270,603	+ 173,800
	Israeli Upper tier			+ 22,100
	Israeli Arrow program			+ 45,500
	Short range ballistic missile defense			+ 106,200
97	Ballistic Missile Defense Test	386,482	366,482	- 20,000
	Improving funds management: Test efficiencies			- 20,000
98	Ballistic Missile Defense Targets	485,294	465,294	- 20,000
	Improving funds management: Program adjustment			- 20,000
101	Department of Defense Corrosion Program	2,907	12,907	+ 10,000
	Program increase			+ 10,000
103	Department of Defense [DOD] Unmanned Aircraft System [UAS] Common Development	3,702	8,263	+ 4,561
	Program increase			+ 4,561
106	Defense Rapid Innovation Program		75,000	+ 75,000
	Program increase			+ 75,000
110	AEGIS SM-3 Block IIA Co-Development	263,695	283,695	+ 20,000
	Development risk reduction			+ 20,000
117	Prompt Global Strike Capability Development	70,762	95,762	+ 25,000
	Additional hypersonics funding			+ 25,000
118	Chemical and Biological Defense Program—EMD	345,883	335,883	- 10,000
	Improving funds management: Unobligated balances			- 10,000

	Maintain program affordability: Maintain level of effort			- 4,000
	Classified Programs	3,118,502	3,042,920	- 75,582
	Classified adjustment			- 75,582

Manufacturing and Innovation Centers.—The Committee notes the budget request supports five manufacturing innovation institutes. The Committee encourages the Department of Defense to use these institutes to provide advanced manufacturing capabilities in

critical technology sectors, strengthen the defense industrial base, and promote the training of a technical manufacturing and engineering workforce. The Committee directs the Department to ensure that the private sector's cost share at least equally matches the funding from Federal sources, and recommends that the Department limit direct core support for these institutes to 5 fiscal years. Prior to establishing a new institute, the Committee directs the Department to submit to the congressional defense committees a business case analysis of costs, requirements, and justifications for the selection of the award and include metrics-based performance measures to monitor performance and success of the institute. The institute performers can compete for other manufacturing technology and research funding available from the Federal Government at all times. Finally, the Department should encourage institutes to work with private sector partners on pre-competitive research activities, common technical standards, and joint technology and manufacturing roadmaps.

Defense Advanced Research Projects Agency [DARPA] Basic Research.—The Committee provides an increase in basic research of 5 percent over the fiscal year 2014 enacted levels across the services and the defense wide research and development accounts. Of that increase, the Committee provides an additional \$30,909,000 for DARPA basic research. As the Department's leading research agency, the Committee understands that DARPA is best positioned to identify cutting edge research but believes it must utilize a wider set of colleges and universities, smaller defense contractors, and commercial firms. The Committee directs DARPA to submit a report to the congressional defense committees within 120 days after enactment of this act on its plan to utilize the additional funding.

Additive Technology.—The Committee notes that additive manufacturing has revolutionized production in key commercial industries, ranging from automotive and aerospace to medical devices and now cellular phone sectors. Innovations in this field have resulted in unprecedented efficiencies in product design, energy consumption, and supply chain management. However, it can take a decade or more to insert new materials and processes into key defense supply chains. The Committee urges the Department of Defense to focus efforts on breaking down key barriers for wider usage of this groundbreaking technology in the defense industrial base. The Committee directs that the Under Secretary for Acquisition, Technology, and Logistics report on the Department's activities to: accelerate quality control and qualification of additive manufacturing technology in various defense supply chains; increase speed of additive manufacturing production processes to meet both low and high volume needs; and integrate commercial advances in additive manufacturing and 3D scanning into defense supply chains, including investment casting, electronics and communications, medical bracing and devices, and ground and aerospace vehicle production.

Strategic Capabilities Office [SCO].—The Committee commends the Department of Defense for standing up the Strategic Capabilities Office to provide lower-cost, strategic alternatives for shaping and countering emerging threats. The Committee believes that

such efforts are a wise use of Government resources that can enhance current capabilities available to the services and combatant commanders. While supportive of these efforts, the Committee is concerned with the coordination of SCO initiatives with other service and Department of Defense research and development priorities. Therefore, the Committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics [AT&L] to provide a report to the congressional defense committees on SCO's current and long-term mission, a timeline for SCO project development and transition to Department or service activities, and the process by which SCO initiatives are coordinated with other service and Department research priorities. The report should also address how SCO efforts differ from those efforts typically funded through the joint capabilities and technology demonstration [JCTD] and rapid fielding initiatives.

Technology Transfer Pilot Program.—The Committee directs the Assistant Secretary of Defense for Research and Engineering to conduct a pilot program on public-private technology transfer ventures between Department of Defense research and development labs and centers and regionally-focused technology commercialization organizations, including accelerators, incubators, and innovation centers. The primary goal of the pilot program should be to increase the commercialization of intellectual property developed in the Department's research and development enterprise in support of critical cross-service technological needs. Areas of focus should include but not be limited to energetics, aviation, unmanned systems, rapid prototyping, corrosion control, and water quality improvement. Technology commercialization partners and initial technology incubator partnerships should be selected through full and open competition emphasizing strong business plans, demonstrated expertise in mentorship and commercialization, and strong regional partnerships. The Secretary of Defense shall report to the Committee on the implementation of the pilot program by April 1, 2015.

Gas Reactors.—The Committee is aware of the Department of Defense's interest in developing capabilities that would allow for self-contained power generation for military installations. In 2011, the Center for Naval Analysis released a study outlining new nuclear plant designs which could provide modular power generation, such as smaller scale high temperature gas reactors that use pebble bed technology. The Committee urges the Secretary of Defense to study the feasibility of such technology to include an evaluation of the safety and efficacy of this technology and determine whether a future set of prototype systems should be considered for development. The Committee requests that the Secretary of Defense consider the expedited licensing paths, development strategies, and recommended next steps for maturing this technology as part of the recommended study.

UAS Common Development Program.—The Committee notes that the Federal Aviation Administration [FAA] recently designated six unmanned aerial system [UAS] national test sites and plans to announce a UAS Center of Excellence soon that together will develop policies and standards to govern the integration of UAS into the national airspace system [NAS]. The Committee provides an additional \$4,561,000 for the UAS Common Development and encour-

ages the Department of Defense to coordinate with the FAA and National Aeronautics and Space Administration [NASA] in the development and demonstration of common UAS standards, architecture, and technologies. The intent of the effort is to ensure a consistent, nationwide approach to airspace integration across both civil and public sectors and in a way that protects privacy and the safety of other aircraft and people on the ground.

MISSILE DEFENSE AGENCY

Major Acquisition Program New Starts.—The fiscal year 2015 budget request includes \$99,500,000 to initiate development of improved homeland defense interceptors, and \$50,500,000 to initiate development of a long-range discrimination radar. The Committee notes that these are major defense acquisition programs with acquisition costs expected to exceed \$1,000,000,000. Therefore, the Committee recommends transferring funding for these programs to separate program elements and directs MDA to follow that program element structure in future budget submissions.

Further, the Committee believes that for each program, MDA should follow robust acquisition practices, to include conducting a full Analysis of Alternatives; seeking approval of requirements by the Joint Requirements Oversight Council; developing an acquisition strategy in accordance with DOD 5000.02 regulations; maximizing competition; and providing Office of Secretary of Defense Cost Assessment and Program Evaluation sufficient time to conduct an Independent Cost Estimate prior to reaching the milestone B equivalent of the development effort. The Committee directs the Director, Missile Defense Agency to provide the congressional defense committees an update on MDA's progress implementing these acquisition practices within 60 days of enactment of this act.

Ground-Based Midcourse Defense [GMD] Reliability and Maintenance Shortfalls.—The fiscal year 2015 budget request includes \$1,003,768,000 for Ground-Based Midcourse Defense [GMD]. The Committee understands that subsequent to the budget submission, the Director, Missile Defense Agency, completed an assessment of the GMD system, which identified funding shortfalls of certain reliability and maintenance functions. Therefore, the Committee recommends an additional \$30,000,000 only for Ground-Based Midcourse Defense [GMD] reliability and maintenance efforts, as authorized by S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported. The Committee understands that the Director, Missile Defense Agency plans to report to the congressional defense committees no later than November 15, 2014, on an implementation plan for executing GMD reliability and maintenance improvement efforts. The Committee directs the Director, Missile Defense Agency, to include in that implementation plan details on MDA's contracting strategy for GMD reliability and maintenance activities that meets program goals within cost and schedule while ensuring Government and industry accountability.

Acquisition Accountability in MDA Software Development Programs.—The fiscal year 2015 budget request includes no less than \$510,200,000 for Aegis and \$417,816,000 for Command and Control, Battle Management and Communications [C2BMC] software development efforts. The Committee has previously expressed con-

cerns regarding excess concurrency due to simultaneous development of multiple software spirals; the absence of acquisition program baselines for individual software spirals; the instability of software spiral content; and annual funding adjustments without explanation. The Committee notes that none of these concerns have been addressed with the fiscal year 2015 budget submission. Therefore, the Committee recommends sustaining Aegis and C2BMC software development efforts at prior year levels and adjusts the budget request accordingly.

Acquisition of Targets.—The fiscal year 2015 budget request includes \$485,294,000 for the acquisition of targets. The Committee notes significant volatility in MDA’s targets program, to include the adjustment of more than a dozen targets or target modules among multiple target classes between fiscal years. The Committee understands that MDA is working to address these issues, and expects to see improved acquisition performance for all target classes. The Committee further understands that improved acquisition performance will likely yield contracting efficiencies and recommends a reduction of \$20,000,000.

Standard Missile-3 Block IIA.—The fiscal year 2015 budget request includes \$263,395,000 to continue co-development of the Standard Missile-3 Block IIA interceptor. This interceptor contributes to the European Phased Adaptive Approach [EPAA], which provides regional ballistic missile defense of deployed U.S. forces and our allies. The Committee is concerned by some of the technical challenges encountered during program development and recommends an additional \$20,000,000 only for risk reduction activities. The Committee is further concerned that the fiscal year 2015 budget request includes initial funding for 17 SM-3 Block IIA rounds—well in excess of test requirements—even though the design has not yet proven mature and appears to be cost-prohibitive at this point. Therefore, the Committee recommends reducing the budget request only for SM-3 Block IIA rounds by \$50,801,000. The Committee notes that this recommendation provides sufficient funds to manufacture rounds in support of the flight test schedule, and does not delay the development or test schedule.

Sharing of Classified United States Ballistic Missile Defense Information With the Russian Federation.—The Committee is concerned with the potential security risks associated with sharing sensitive U.S. missile defense data and technology with the Russian Federation. The Committee recognizes existing law restricts the sharing of sensitive and classified ballistic missile defense information with the Russian Federation, as established in Public Law 113–66, the National Defense Authorization Act for Fiscal Year 2014. The Committee expects the administration to continue to adhere to current law until superseded by an act authorizing appropriations for fiscal year 2015.

OPERATIONAL TEST AND EVALUATION, DEFENSE

Appropriations, 2014	\$246,800,000
Budget estimate, 2015	167,738,000
House allowance	248,238,000
Committee recommendation	214,038,000

The Committee recommends an appropriation of \$214,038,000. This is \$46,300,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

(In thousands of dollars)

	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	RDT&E Management Support			
1	Operational Test and Evaluation	74,583	97,883	+ 23,300
	Program increase: Cyber force training and resiliency	+ 12,500
	Program increase: PACOM cyber ranging training	+ 6,100
	Program increase: Cyber RED team and training	+ 4,700
2	Live Fire Test and Evaluation	45,142	45,142
3	Operational Test Activities and Analyses	48,013	71,013	+ 23,000
	Program increase: Threat Resource Analysis	+ 5,000
	Program increase: Joint test and evaluation	+ 18,000
	RDT&E Management Support	167,738	214,038	+ 46,300
	Total, Operational Test and Evaluation, Defense	167,738	214,038	+ 46,300

Threat Emitters.—In fiscal year 2014, the Department of Defense initiated an effort to address deficiencies in future weapon system capabilities by developing and funding a plan to acquire advanced electronic warfare threat emitters. In response to the Department's actions, Congress transferred funds from the Test Resources Management Center [TRMC] program element to the Operational Test and Evaluation [OT&E] funding line to accelerate the development and fielding of these emitters. In transferring the funds, it was not the intent of Congress to create two duplicative efforts between the two testing agencies but rather to address a technology shortfall. While the Committee believes that TRMC is the best agency to carry out the overall mission of upgrading range infrastructure to address multi-service systems, there is concern the TRMC approach may not meet a timeline to address inadequacies of systems that are nearing initial operational capability.

In an effort to eliminate duplication and encourage a streamlined approach to addressing the threat, the Committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics [AT&L] and the Director of Operational Test and Evaluation [DOT&E] to develop a threat emitter execution plan, to be approved by the Deputy Secretary of Defense, that allows for rapid acquisition of both open and closed loop threat emitters that can be used to test future weapons systems. The plan shall emphasize DOT&E and TRMC collaboration and transparency while eliminating mission duplication between the two organizations; and identify a single program executive to execute the open loop and closed loop fielding plan. Furthermore, the Committee directs that any purchases of open loop emitters beyond fiscal year 2015 be conducted under an open and competitive process. The Committee believes that it is in the best interest of national security and to the taxpayer that both testing agencies set aside their competing plans and work together to find common solutions to this threat.

TITLE V
 REVOLVING AND MANAGEMENT FUNDS
 DEFENSE WORKING CAPITAL FUNDS

Appropriations, 2014	\$1,649,214,000
Budget estimate, 2015	1,234,468,000
House allowance	1,334,468,000
Committee recommendation	1,659,468,000

The Committee recommends an appropriation of \$1,659,468,000. This is \$425,000,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

Item	2015 budget estimate	Committee recommendation	Change from budget estimate
Prepositioned War Reserve Stocks	13,727	13,727
Arsenal Initiative	+ 225,000
Total, Defense Working Capital Fund, Army	13,727	238,727	+ 225,000
Supplies and Materials (Medical/Dental)	61,717	61,717
Total, Defense Working Capital Fund, Air Force	61,717	61,717
Defense Logistics Agency	44,293	44,293

Working Capital Fund—DECA	1,114,731	1,314,731	+ 200,000
DECA Increase	+ 200,000
Total, Defense Working Capital Fund, Defense-Wide	1,114,731	1,314,731	+ 200,000
Grand Total, Defense Working Capital Funds	1,234,468	1,659,468	+ 425,000

Meals Ready-to-Eat War Reserve.—The Committee commends the Defense Logistics Agency [DLA] for initiating action to study the Meals Ready to Eat [MRE] War Reserve and industrial base. The Committee encourages the Director of the DLA to maintain the recommendations outlined in DLA’s September 2013 Meals Ready to Eat [MRE] Strategic Plan. This plan outlined an objective to maintain a stockage level of 5 million cases of MREs and projected an annual purchase rate of approximately 2.5 million cases through 2016 to meet the stockage objective and ensure the industrial base is able to meet surge requirements. The Director of the DLA shall submit written notification to the congressional defense committees

no later than 90 days prior to seeking any potential modifications to the War Reserve after September 30, 2014. Additionally, the Director shall provide an updated report on War Reserve requirements no later than March 31, 2015.

Defense Commissary Agency.—The Committee recommends an increase of \$200,000,000 for the Defense Commissary Agency [DECA] in fiscal year 2015 which is consistent with S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported. The Committee also directs that the Committees on Appropriations of the House and Senate be recipients of the reporting requirements directed in the report accompanying S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, titled “Department of Defense proposal to modify commissary benefit.”

Additionally, the Committee directs the Secretary of Defense to provide the following information to the congressional defense committees no later than December 1, 2014:

- a breakdown showing the average percentage of commissary patrons by enlisted members, officers and retirees;
- surveys or other data on the value placed on commissary access by its patrons, especially in comparison to other benefits;
- a description of the impact of sequestration in fiscal year 2013 on the Defense Commissary Agency and commissaries; and
- a detailed description of how the fiscal year 2015 proposal to limit appropriated fund support to commissaries would be implemented in each year of the future years defense program if approved by Congress.

NATIONAL DEFENSE SEALIFT FUND

Appropriations, 2014	\$597,213,000
Budget estimate, 2015	
House allowance	
Committee recommendation	490,610,000

The Committee recommends an appropriation of \$490,610,000. This is \$490,610,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
20	Outfitting and Post Delivery		17,300	+ 17,300
	Outfitting and Post Delivery—Transfer from Shipbuilding and Conversion, Navy to National Defense Sealift Fund for execution			+ 17,300
50	Lg Med Spd RO/RO (LMSR) Maintenance		105,900	+ 105,900
	Lg Med Spd RO/RO (LMSR) Maintenance—Transfer from Operation and Maintenance, Navy to National Defense Sealift Fund for execution			+ 105,900
60	DOD Mobilization Alterations		19,000	+ 19,000
	DOD Mobilization Alterations—Transfer from Operation and Maintenance, Navy to National Defense Sealift Fund for execution			+ 19,000

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
70	TAH Maintenance		27,200	+ 27,200
	TAH Maintenance—Transfer from Operation and Maintenance, Navy to National Defense Sealift Fund for execution			+ 27,200

	Naval Operational Logistics Integration—Transfer from Research, Development, Test and Evaluation, Navy to National Defense Sealift Fund for execution			+ 15,963
	Total, National Defense Sealift Fund		490,610	+ 490,610

*National Defense Sealift Fund [NDSF].—*In the fiscal year 2015 budget request, the Navy proposes the elimination of the National Defense Sealift Fund [NDSF], which was established in fiscal year 1993 to address shortfalls in U.S. sealift capabilities. While the Committee has lingering concerns over some previous application of NDSF funds, the Committee sees no reason to eliminate the NDSF in its entirety. Therefore, the Committee recommends retaining the NDSF and transferring funds included in the Shipbuilding and Conversion, Navy; Research, Development, Test and Evaluation, Navy; and Operation and Maintenance, Navy accounts for functions previously funded in the NDSF back into the NDSF. The Committee directs that none of these funds may be used for the development or acquisition of ships.

TITLE VI
 OTHER DEPARTMENT OF DEFENSE PROGRAMS
 DEFENSE HEALTH PROGRAM

Appropriations, 2014	\$32,699,158,000
Budget estimate, 2015	31,994,918,000
House allowance	31,690,370,000
Committee recommendation	31,570,895,000

The Committee recommends an appropriation of \$31,570,895,000. This is \$424,023,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

	Item	2015 budget estimate	House allowance	Committee recommendation	Change from	
					Budget estimate	House allowance
	DEFENSE HEALTH PROGRAM					
	OPERATION AND MAINTENANCE

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

Item	2015 budget estimate	Committee recommendation	Change from budget estimate
Operation and Maintenance	31,031,911	29,826,688	-1,205,223
In-House Care	8,799,086	8,770,186	-28,900
Improving funds management: TRICARE consolidation not authorized			-30,000
Program increase: CVN-73 Refueling and Complex Overhaul			+1,100
Private Sector Care	15,412,599	14,317,599	-1,095,000
Improving funds management: TRICARE historical under-execution			-855,000
Improving funds management: Pharmaceutical drugs excess growth			-182,000
Improving funds management: TRICARE consolidation not authorized			-58,000
Consolidated Health Care	2,462,096	2,378,396	-83,700
Improving funds management: Travel excess growth			-3,700
Improving funds management: Historical under-execution			-80,000
Information Management/IT	1,557,347	1,560,947	+3,600
Program increase: HAIMS initiative			+3,600
Management Activities	366,223	366,223	
Education and Training	750,866	750,866	
Base Operations and Communications	1,683,694	1,682,471	-1,223
Improving funds management: DHHQ force protection and physical security excess to requirement			-1,223
Procurement	308,413	308,413	
Research and Development	654,594	1,435,794	+781,200
Program increase: Restore core research funding reduction			+162,200
Peer-reviewed breast cancer research			+120,000
Peer-reviewed cancer research			+50,000
Peer-reviewed epilepsy research			+7,500
Peer-reviewed medical research			+247,500
Peer-reviewed ovarian cancer research			+10,000
Peer-reviewed prostate cancer research			+64,000
Peer-reviewed traumatic brain injury and psychological health research			+60,000
Joint warfighter medical research			+50,000
Orthotics and prosthetics outcomes research			+10,000
Total	31,994,918	31,570,895	-424,023

Investments in Medical Research.—The Committee notes that Federal investment in medical research has generated medical discoveries and scientific innovations that have led to longer lives, created new industries, and established the United States as a leader in research and development. In order to maintain our Nation's global leadership and facilitate future live-saving discoveries, the Committee adds a total of \$789,200,000 for medical research, a 5 percent increase over the Committee's fiscal year 2014 recommendation.

Defense Health Program Reprogramming Procedures.—The Committee remains concerned regarding the transfer of funds from the In-House Care budget sub-activity to pay for contractor-provided medical care. To limit such transfers and improve oversight within the Defense Health Program operation and maintenance account, the Committee includes a provision which caps the funds available

for Private Sector Care under the TRICARE program subject to prior approval reprogramming procedures. The provision and accompanying report language should not be interpreted by the Department as limiting the amount of funds that may be transferred to the Direct Care System from other budget activities within the Defense Health Program. In addition, the Committee continues to designate the funding for the In-House Care budget sub-activity as a special interest item. Any transfer of funds from the In-House Care budget sub-activity into the Private Sector Care budget sub-activity or any other budget sub-activity will require the Secretary of Defense to follow prior approval reprogramming procedures for operation and maintenance funds.

The Committee has received and also remains concerned with reports that substantial amounts of funding are transferred from the Private Sector Care budget sub-activity without the submission of written notification, as required by previous Department of Defense Appropriations Acts. The Committee directs the Secretary of Defense to provide written notification to the congressional defense committees of cumulative transfers in excess of \$10,000,000 out of the Private Sector Care budget sub-activity not later than 15 days after such a transfer. Furthermore, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees not later than 30 days after the enactment of this act that delineates transfers of funds in excess of \$10,000,000, and the dates any transfers occurred, from the Private Sector Care budget sub-activity to any other budget sub-activity groups for fiscal years 2012, 2013, and 2014.

The Committee further directs the Assistant Secretary of Defense (Health Affairs) to provide quarterly reports to the congressional defense committees on budget execution data for all of the Defense Health Program budget activities and to adequately reflect changes to the budget activities requested by the services in future budget submissions.

Carryover.—For fiscal year 2015, the Committee recommends 1 percent carryover authority for the operation and maintenance account of the Defense Health Program. The Committee directs the Assistant Secretary of Defense (Health Affairs) to submit a detailed spending plan for any fiscal year 2014 designated carryover funds to the congressional defense committees not less than 30 days prior to executing the carryover funds.

Private Sector Care Underexecution.—According to a review by the Government Accountability Office, the Department under-executed its Private Sector Care budget by \$1,356,245,000 in fiscal year 2011, \$1,463,178,000 in fiscal year 2012, and \$519,427,000 in fiscal year 2013 for an average of 7.1 percent underexecution. Given the continued trend of prior-year underexecution, the Committee believes that additional savings can be realized and recommends a reduction of \$855,000,000 to the fiscal year 2015 budget request. The Committee urges the Department to submit future year budgets that are more closely aligned with recent provided care patterns.

Core Medical Research Funding.—The Committee notes that the Department's fiscal year 2015 budget for medical research, excluding information technology, severely declined. Core research and

development funding supports medical research in medical training and health information sciences, military infectious diseases, military operational medicine, combat casualty care, radiological health, and clinical and rehabilitation medicine. The Committee believes that this research yields important advances in medical care for servicemembers and their families, as well as the larger civilian population. Therefore, the Committee recommends \$162,200,000 to restore this unjustified funding reduction and allow the Department to continue funding its core research priorities.

Collaboration with the Department of Veterans Affairs.—Over the past several years, collaboration between the Department of Defense [DOD] and the Department of Veterans Affairs [VA] has significantly increased and the number of joint projects and services has expanded. The Committee applauds these efforts and believes that future information sharing between DOD and VA must strengthen in order to ensure a seamless transition from active duty and timely access to VA benefits. Nowhere is this more fundamental than in the transmission of Service Treatment Records [STRs] from DOD to VA. These records are essential in the VA's process of making accurate and timely determinations of benefits to which a veteran may be entitled.

The Committee applauds the electronic transfer from DOD to the VA, beginning on January 1, 2014, of certified and complete STRs for all separating servicemembers via the Health Artifacts and Imaging Management System [HAIMS]. This process has streamlined the exchange of a significant amount of data between DOD and VA and shortened the amount of time it takes for VA claims adjudicators to receive critical information from DOD. The Committee applauds DOD on the establishment of a liaison cell whose focus is uploading certified STRs into HAIMS. The Committee recommends an additional \$3,600,000 for the continuation and improvement of HAIMS and directs DOD to upload the STR of all separating servicemembers into HAIMS within 45 calendar days of a servicemember's separation.

The Consolidated Appropriations Act, 2014 directed the DOD Inspector General to work in coordination with the VA Office of the Inspector General to assess the time it takes for Service Treatment records to be transmitted to VA, impediments to providing the records in a useable electronic format, and recommendations to streamline this process. The Committee is currently waiting for the completion and release of the report and looks forward to reviewing its recommendations.

The Committee understands that Guard and Reserve records are often the most difficult for the VA to obtain because many of these veterans saw multiple, non-consecutive deployments with different units. In January 2014, DOD created three service Single Points of Entry for VA to contact for information requests. The Committee understands that DOD and VA are still collaborating on expanding the Single Points of Entry concept to assist in the transfer of Guard and Reserve records and encourages both Departments to standardize this process in order to ensure the timely processing of benefits for Guard and Reserve servicemembers.

In October 2010, DOD and VA established a first-of-its-kind partnership with the opening of the Captain James A. Lovell Federal

Health Care Center [FHCC]. This is a fully integrated Federal healthcare facility that serves active duty military, their family members, military retirees, and veterans. The Committee continues to support the pilot program at FHCC.

Electronic Health Record [EHR].—The Committee remains concerned about the progress being made by the Departments of Defense and Veterans Affairs to develop fully interoperable electronic health records. The ultimate goal of the efforts of both Departments is to have systems that can exchange data in a meaningful way and be used in a dynamic environment to improve patient care and facilitate smoother transitions for servicemembers from military service to veteran status.

The Committee notes that, despite improvements in providing information on prior year budgets and expenditures on its electronic health record, the Department of Defense failed to provide the Committee with an equivalent level of detail for its fiscal year 2015 budget request. The Committee continues its restriction on the amount of funding that may be obligated for the Interagency Program Office [IPO], the Defense Healthcare Management Systems Modernization [DHMSM] program, and the Defense Information Management Exchange [DMIX] to 25 percent of the funding provided until the Secretary of Defense provides the House and Senate Appropriations committees an expenditure plan that includes numerous reporting requirements. The Committee also directs the Department of Defense to provide written notification to the Committees on Appropriations of the House and Senate prior to obligating any contract or combination of contracts in excess of \$5,000,000.

The Committee directs the Program Executive Officer [PEO] for DHMSM to provide quarterly reports to the congressional defense committees and the Government Accountability Office on the cost and schedule of the program, to include milestones, knowledge points, and acquisition timelines, as well as quarterly obligation reports. The Committee further directs the PEO DHMSM to continue briefing the House and Senate Defense Appropriations Subcommittees on a quarterly basis, coinciding with the report submission.

Finally, the Committee directs the IPO to continue to provide quarterly briefings to the House and Senate Subcommittees on Appropriations for Defense and Military Construction, Veterans Affairs, and Related Agencies regarding standards development, how those standards are being incorporated by both DOD and VA, and the progress of interoperability between the two Departments. In an effort to ensure Government-wide accountability, the Committee also directs the DOD in coordination with the VA to provide the Federal Chief Information Officer of the United States with monthly updates on progress made by the two Departments to reach interoperability and modernize their respective electronic health records.

Integrated Disability Evaluation System.—The Secretary of Defense, in consultation with the Secretary of Veterans Affairs, shall develop a plan to improve the sharing of information necessary to predict and address surges in workload within the Integrated Disability Evaluation System. Further, the Departments shall integrate information technology systems to ensure an end-to-end in-

formation technology solution is in place for both the transfer and management of Integrated Disability Evaluation system cases between the military services and Department of Veterans Affairs no later than December 31, 2014.

Traumatic Brain Injury [TBI]/Psychological Health.—The Committee recommends \$60,000,000 above the fiscal year 2015 budget request for continued research into treatment and prevention of traumatic brain injuries and improved psychological health. The Committee directs the Assistant Secretary of Defense (Health Affairs) to submit a report to the congressional defense committees within 180 days of enactment of this act on expenditure and obligation data of additional funding added by Congress for psychological health and traumatic brain injury. This report should include information on agreements made with other government agencies. Additionally, the Committee is aware of recent medical advances in drug development for neurodegenerative diseases and encourages the Department to further its research into developing drugs that reverse, halt, or slow the neurodegenerative process associated with traumatic brain injury.

Peer Reviewed Medical Research Program.—The Committee recommends \$247,500,000 for the Peer Reviewed Medical Research Program. The Committee directs the Secretary of Defense, in conjunction with the Service Surgeons General, to select medical research projects of clear scientific merit and direct relevance to military health. Research areas considered under this funding are restricted to: acute lung injury, advanced prosthetics, alcohol and substance abuse, amyotrophic lateral sclerosis, arthritis, autism, chronic migraine and post-traumatic headache, congenital heart disease, Dengue, diabetes, DNA vaccine technology for postexposure prophylaxis, duchenne muscular dystrophy, dystonia, food allergies, Fragile X syndrome, gulf war illness, healthcare-acquired infection reduction, hepatitis B, hereditary angioedema, hydrocephalus, inflammatory bowel disease, integrative medicine, interstitial cystitis, lupus, malaria, metals toxicology, mitochondrial disease, multiple sclerosis, nanomaterials for bone regeneration, neurofibromatosis, orthopedics, osteoarthritis, pancreatitis, Parkinson's, pathogen-inactivated dried plasma, polycystic kidney disease, post-traumatic osteoarthritis, psychotropic medications, pulmonary fibrosis, reconstructive transplantation, respiratory health, rheumatoid arthritis, scleroderma, sleep disorders, spinal cord injury, tinnitus, tuberous sclerosis complex, vascular malformations, vision, and women's heart disease. The Committee emphasizes that the additional funding provided under the Peer Reviewed Medical Research Program shall be devoted only to the purposes listed above.

The Committee remains supportive of the medical research being conducted by the Department that yields medical breakthroughs for servicemembers and often translates to the civilian population, as well. The Committee directs the Assistant Secretary of Defense (Health Affairs) to provide a report to the congressional defense committees within 180 days of enactment of this act on the breakdown of funding in the Congressionally Directed Medical Research program between basic and advanced research.

Joint Warfighter Medical Research Program.—The Committee recommends \$50,000,000 for the Joint Warfighter Medical Research Program. Funds shall be used to augment and accelerate high priority Department of Defense and Service medical requirements and to continue prior year initiatives that are close to achieving their objectives and yielding a benefit to military medicine. These funds shall not be used for new projects or basic research, and they shall be awarded at the discretion of the Secretary of Defense following a review of medical research and development gaps, as well as unfinanced medical requirements of the services. Further, the Committee directs the Assistant Secretary of Defense (Health Affairs) to provide a report not later than 180 days after the enactment of this act to the congressional defense committees, which lists the projects that receive funding. The report should include the funding amount awarded to each project, a thorough description of each project's research, and the benefit the research will provide to the Department of Defense.

Peer-Reviewed Cancer Research Programs.—The Committee recommends \$120,000,000 for the peer-reviewed breast cancer research program, \$64,000,000 for the peer-reviewed prostate cancer research program, \$10,000,000 for the peer-reviewed ovarian cancer research program, and \$50,000,000 for the peer-reviewed cancer research program that would research cancers not addressed in the aforementioned programs currently executed by the Department of Defense.

The funds provided in the peer-reviewed cancer research program are directed to be used to conduct research in the following areas: colorectal cancer, kidney cancer, liver cancer, melanoma, mesothelioma, myeloproliferative disorders, neuroblastoma, pancreatic cancer, and stomach cancer.

The funds provided under the peer-reviewed cancer research program shall be used only for the purposes listed above. The Committee directs the Assistant Secretary of Defense (Health Affairs) to provide a report not later than 180 days after the enactment of this act to the congressional defense committees on the status of the peer-reviewed cancer research program. For each research area, the report should include the funding amount awarded, the progress of the research, and the relevance of the research to servicemembers.

Orthotics and Prosthetics Outcomes Research.—The Committee provides \$10,000,000 in support of orthotics and prosthetics outcomes research and directs the Assistant Secretary of Defense (Health Affairs) to provide a report not later than 180 days after the enactment of this act to the congressional defense committees on the peer-reviewed projects that receive funding. The report should include the funding amount awarded to each project and the anticipated effect on patient care.

Collaboration on Medical Research.—The Committee notes that the Department of Defense [DOD] coordinates with several other Federal agencies, especially the National Institutes of Health [NIH], through its peer-review process for medical research. NIH currently uses the Research Portfolio Online Reporting Tools [REPORTER] to consolidate reports, data, and analyses of NIH research activities, including information on expenditures and the re-

sults of supported research. The Committee understands that DOD signed a memorandum of agreement in February 2014, to initiate a pilot program to begin sharing DOD research data into REPORTER. The Committee is supportive of this collaboration and directs the Assistant Secretary of Defense for Health Affairs to provide the Committee a report on the status of this pilot program not later than 90 days after enactment of this act. The report should include a full description of the pilot program, a timeline of its implementation, and any impediments for the Department in uploading all of its research information into the database.

Additionally, DOD and NIH worked together to create the Federal Interagency Traumatic Brain Injury Research [FITBIR] system, a centralized database for traumatic brain injury [TBI] research. FITBIR serves as a central repository for new data, links to current databases, and allows valid comparison of results across studies. The Committee supports this type of collaboration and believes it is a crucial step in addressing the critical gaps in knowledge regarding the diagnosis and treatment of TBI. The Committee encourages continued collaboration between DOD and NIH in order to avoid duplication of effort and maximize Government investments in medical research.

In order to build on this collaboration, the Committee directs the Department to contract with the Institute of Medicine [IOM] to evaluate the Congressionally Directed Medical Research Program [CDMRP] and provide a report to the congressional defense committees not later than 12 months after enactment of this act. The report should include an evaluation of the CDMRP two-tiered peer review process, its coordination of research priorities with NIH, and recommendations for how the process can be improved. The Committee notes that the peer review system used in the CDMRP is the recommendation of a 1993 IOM report and was modeled after the NIH system. The inclusion of patient advocates in the CDMRP peer review has been a highly regarded addition to the process, and the Committee believes that these voices provide a valuable contribution.

Mental Health Professionals.—The Committee recognizes that servicemembers and their families face unique stresses beyond those of everyday life. After over a decade of war, the need for mental health professionals in the Department is at an all-time high, and the Committee believes that every beneficiary of the Military Health System should have timely access to mental health services. However, the Committee is concerned with the Department's inability to recruit and retain enough psychiatrists, psychologists, social workers, nurse practitioners, and registered nurses to provide adequate mental healthcare. The Committee has asked the Government Accountability Office to review this issue including the Department's current inventory of mental health providers, current and future needs for providers, challenges the Department faces in recruitment and retention, actions taken to mitigate these challenges, and recommendations going forward to ensure an adequate inventory of mental health professionals within the Military Health System. The Committee looks forward to the receiving the results of this review and working with the Department to provide the tools necessary to implement any recommendations.

Brain Tissue Repository.—The Committee applauds the Department's recent efforts in advancing the study and treatment of traumatic brain injury [TBI] in servicemembers by partnering with the National Institutes of Health to create the world's first human brain tissue repository for military personnel at the Uniformed Services University of the Health Sciences. Its researchers need access to post-mortem tissues from servicemembers affected by blast injury, but there are currently significant hurdles to gaining access to these invaluable resources. The Committee directs the Assistant Secretary of Defense (Health Affairs) to provide a report outlining strategies for overcoming roadblocks to post-mortem brain donation in the military, including consent issues, that are preventing access to needed resources not later than 180 days after enactment of this act. The Committee maintains that respect and care for the deceased and their families is of utmost consideration moving forward and believes that thoughtful and effective strategies for increasing post-mortem donation will be key in developing potential interventions, treatments, and cures for this devastating condition.

Global Health.—The Committee recognizes the critical contribution that the Department's research and development [R&D] portfolio makes in protecting our troops from infectious and neglected diseases they may encounter on missions around the world. The Committee also recognizes the need to sustain and support U.S. investment in this area by fully funding those R&D programs that carry out this work within the Defense Health Program; Department of the Army and Department of the Navy Research, Development, Test and Evaluation [RDT&E]; and RDT&E, Defense-Wide budgets.

The Committee directs each program within the Department of Defense currently involved in infectious disease related research to submit a report on its R&D activities to the congressional defense committees outlining the program's funding and accomplishments from fiscal years 2011 through 2014. The report should also include each program's goals moving forward and funding needs across the Future Years Defense Program.

Additionally, the Committee recognizes that the Department's global health engagements support combatant commanders' efforts to build the capacity of partner nations, manage and respond to local health challenges, and promote regional stability by increasing access to basic health services. The Committee encourages the Assistant Secretary of Defense (Health Affairs), in collaboration with the Uniformed Services University of Health Sciences, to establish a learning tool to assess the efficiency and effectiveness of global health engagements in meeting national security goals. The Committee further encourages the Department to fund this modest investment from within appropriated funds in order to better inform future investments in global health engagements.

Healthy Base Initiative.—The Committee is encouraged by the Department's development of the Healthy Base Initiative [HBI], which holds the promise of substantially shifting behavior and practice to improve the wellness and resilience of the Nation's military, their families, and the communities that support them. The Committee is particularly supportive and encouraged that, to date, the program has included bases representing each service, as well

as the Guard and Reserve. The Committee encourages the Department to commit internal structures and processes to ensure the program's permanence.

The Committee recommends that the Department: (1) issue necessary instructions or directions to ensure HBI's sustainability, including the training of DOD leadership at all levels about HBI; (2) expand HBI's scope beyond tobacco use cessation and obesity to better align with a broader whole systems approach, such as Total Force Fitness; (3) develop a multi-stakeholder working group, including strong public-private partnerships that engage surrounding communities and leaders, to support the design and execution of an expanded HBI; (4) identify and implement appropriate program metrics to measure impact on health as described in Total Force Fitness; and (5) establish a single, fully accountable, vested DOD official in charge of HBI within the Office of Military Community and Family Policy of the Under Secretary of Defense (Personnel & Readiness).

The Consolidated Appropriations Act, 2014 included \$3,000,000 to expand HBI, and the Committee looks forward to reviewing the progress report on the status of the program due in July 2014. The Committee recommends \$3,000,000 in Operation and Maintenance, Defense-Wide for the continuation and expansion of HBI.

Reconstructive Transplantation.—The Committee understands that the Department's continued research into reconstructive transplantation will allow surgeons to refine techniques for hand, face, and other vascularized composite tissue allografts such as the transplants of skin, muscle, tendon, nerves, bone, and blood vessels. This work has immediate and transformative implications for wounded warriors and civilian patients alike, allowing those with debilitating, disfiguring and disabling injuries to regain their independence. The Committee includes reconstructive transplant as eligible to compete for funds in the Peer-Reviewed Medical Research Program and supports this important research to improve access to reconstructive transplants and state-of-the-art immunotherapy.

Prescription Effectiveness of Psychotropic Medications.—The Committee supports the Department's efforts to treat patients diagnosed with behavioral health disorders and believes that recent efforts to use database-supported methods in order to increase the accuracy and effectiveness of prescription practices for mental health medications may not only achieve cost savings but also improve patient care. The Committee understands that this research is currently taking place at Walter Reed National Military Medical Center and Fort Belvoir Community Hospital and encourages its expansion to additional sites as preliminary findings have shown promising results.

Trauma Research Clinical Trials Network.—The Committee recognizes that trauma-related deaths impact our military services as well as the general civilian population, and the life-saving impact of trauma clinical research can be seen on the battlefield and in civilian trauma response. The Committee believes the Department of Defense should maintain the momentum on advances in trauma care and build on the success achieved by the Armed Forces Institute of Regenerative Medicine [AFIRM] and the recent consortiums on Traumatic Brain Injury [TBI] and Post-Traumatic Stress Dis-

order [PTSD], which combine efforts across the Federal Government. The Committee encourages the Assistant Secretary of Defense for Health Affairs and the Director of the Defense Health Agency to work with other Federal agencies focused on trauma research to establish a task force to create a Trauma Research Clinical Trials Network and Repository.

Military Integrative Medicine.—The Committee recognizes that chronic pain disorders are increasingly prevalent among servicemembers and that the Department has established a Clinical and Rehabilitative Medicine Research Program to focus research on alternatives to opioid analgesics for pain management. Further, the Committee supports the growing focus on integrated and patient-centered practices and models of care within the Military Health System. The Department's Pain Task Force has highlighted the challenges of pain management for today's servicemembers and their families, the problem of overmedication, and the necessity to evaluate and implement non-pharmaceutical pain management approaches. Several recently published systematic reviews and expert roundtables show the promise of active self-care, complementary, and integrative practices as varied as meditation, tai chi, yoga, and acupuncture for the management of chronic pain.

The Committee strongly encourages the Department to create a systematic, centralized approach to evaluating the implementation of integrative medicine by working with organizations that conduct research in these areas and have relevant subject matter expertise and significant military experience. The evaluation should measure and analyze the cost effectiveness of integrative medicine approaches and establish timely and articulate channels to disseminate the findings throughout the Military Health System. The Committee believes that such an evaluation of integrative medicine approaches will show which practices are most effective and efficient and allow the Department to confidently expand their implementation.

Hydrocephalus Research.—The Committee is concerned that of the estimated 294,000 servicemembers who have sustained a traumatic brain injury [TBI] in Operations Enduring Freedom and Iraqi Freedom, over 30,000 are expected to develop hydrocephalus. Hydrocephalus, an increased accumulation of fluid in the brain, often has a delayed onset and can easily be misdiagnosed as dementia or other aging related diseases. Given that there is currently no cure for hydrocephalus and current treatment options are limited and have high failure rates, the Committee encourages the Department to increase its investments in hydrocephalus research.

Warfighter Respiratory Health.—The Committee understands that respiratory diseases affect more than 100,000 servicemembers each year and is concerned about respiratory ailments among deployed and returning servicemembers. Beyond the decreased quality of life for affected servicemembers, respiratory diseases result in almost 27,000 lost workdays per year. The Committee encourages the Department to provide adequate resources for research on respiratory health.

Epilepsy Research.—The Committee is concerned about the large number of service men and women returning from the Persian Gulf

Wars and Afghanistan who have sustained traumatic brain injuries [TBI] and the long term consequences of TBI. These wounded warriors are at high risk for developing posttraumatic epilepsy, depression, cognitive difficulties, and posttraumatic stress disorder, which may be interconnected. As current TBI longitudinal studies have not included epilepsy, the Committee encourages the Department to place greater priority and invest more funding in longitudinal epidemiological research, including epilepsy surveillance, to better understand the magnitude of the problem and improve patient care and outcomes. To assist in these efforts, the Committee provides \$7,500,000 in support of epilepsy research. Additionally, the Committee urges the Department to expand research into the mechanisms by which brain injury produces epilepsy and research directed at the prevention of epilepsy and concomitant comorbidities in those known to be at high risk.

Melanoma Research.—The Committee understands that melanoma diagnoses are increasing among active duty servicemembers and that melanoma is the fifth most common cancer among veterans. Recent research suggests that exposure to high levels of solar radiation in young adulthood is associated with a higher risk of melanoma mortality. Given the extreme and harsh conditions servicemembers face in theater and the rise of this aggressive and frequently deadly form of cancer, the Committee encourages the Department to continue its investments in melanoma research.

Sleep Disorder Research.—The Committee recognizes that sleep disorders are increasingly prevalent among servicemembers and that such disruptions have been associated with diverse mental and physical disorders, including traumatic brain injury and posttraumatic stress. The Committee applauds the Army for acknowledging the importance of sleep in achieving optimal physical, mental, and emotional health and including sleep as a focus in the Performance Triad.

In support of this effort, the Committee urges the Department to support basic, translational, and clinical research on how the disruption of normal sleep and circadian biological rhythms adversely affects the health, safety, performance and productivity of our military and civilian populations.

Obesity Treatment Options.—The Committee recognizes that obesity is an underlying cause of several chronic conditions such as diabetes, heart disease, hypertension, and certain cancers including breast and colon cancer. While the Department has taken some steps to address obesity, it does not currently provide comprehensive access to a full complement of medical treatments for obesity. The Committee encourages the Department to meet with experts in the field of obesity, such as the Obesity Action Coalition, the American Medical Association, and the American Association of Clinical Endocrinologists, to better understand the science and current medical treatments for obese or overweight patients.

Military Medical Photonics.—Military Medical Photonics research improves battlefield patient care using photomedicine technologies and exemplifies how mission-oriented research can benefit both military and civilian populations. Recent breakthroughs in this research include advances in the removal of kidney stones, diagnosis and treatment of major eye diseases, normalization of se-

vere scarring from war wounds, and rapid imaging of coronary artery disease. The Committee understands that the budget for Military Medical Photonics research decreased significantly from \$6,238,000 in fiscal year 2014 to \$2,087,000 in the fiscal year 2015 budget request. The Committee encourages the Department to fund this important research at historical levels in future budgets.

DNA Vaccine Technology for Post-Exposure Prophylaxis.—The Committee is concerned that the Army has not emphasized the production of polyclonal antibodies as part of its DNA vaccine technology research. The Committee continues to encourage the Army to conduct research that focuses on producing polyclonal antibodies in anseriformes through DNA vaccines.

Medical Defense Against Infectious Disease.—The Committee recognizes the importance of medical countermeasures to naturally occurring infectious diseases, such as malaria, Dengue, and Chikungunya viruses. These pose a significant threat to the strategic access and operational effectiveness of forces deployed outside the United States. The Committee is concerned with the Department's decisions over recent years to precipitously decrease funding for malaria research and encourages the Department to address diseases of military importance and invest in research for chemoprophylaxis, surveillance, novel approaches to vaccine development, and other countermeasures. Finally, the Committee urges the Department to partner with colleges and universities that have strong research programs in infectious diseases, as well as other Federal agencies, foreign governments, international agencies, and non-profit organizations to mitigate duplication of effort and maximize the use of Department resources.

Biomarkers for Toxic Exposures.—The Committee recognizes that hazardous exposures cost the Departments of Defense and Veterans Affairs billions of dollars annually in medical care, reduce servicemember performance, and create a multitude of health compensation claims. Identifying biomarkers for toxic or psychologically traumatic exposures could allow for faster diagnosis and treatment of a number of exposure-related conditions among military and veteran populations. The Committee supports research efforts that capitalize on recent advances in chemical surveillance and systems biology including proteomics, genomics, and metabolomics.

Access to Military Treatment Facilities.—The Committee is aware of unobligated balances from funds appropriated in section 8110 of the Department of Defense Appropriations Act for Fiscal Year 2011. The Committee believes that these unobligated balances should be utilized for the purposes for which they were originally appropriated. Accordingly, the Committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than 60 days after the enactment of this act on any remaining balances from funds appropriated in section 8110 of the Department of Defense Appropriations Act, 2011. The report shall include the amount of remaining balances and an execution plan for these funds that will improve access to the Department's military treatment facilities.

Antimicrobial Stewardship Programs.—The Committee encourages the Department to implement antimicrobial stewardship pro-

grams at all its medical facilities and develop consistent ways to collect and analyze data on antibiotic usage, healthcare outcomes (such as Clostridium difficile infections), and antimicrobial resistance trends in order to evaluate how well these programs are improving patient care and reducing inappropriate antibiotic use. The Committee also encourages the Department to provide antibiotic usage and antimicrobial resistance data to the Centers for Disease Control and Prevention’s National Healthcare Safety Network.

CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE

Appropriations, 2014	\$1,004,123,000
Budget estimate, 2015	828,868,000
House allowance	828,868,000
Committee recommendation	798,268,000

The Committee recommends an appropriation of \$798,268,000. This is \$30,600,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[Dollars in thousands]

Item	Qty.	2015 budget estimate	Qty.	House recommendation	Qty.	Committee recommendation	Change from		Change from	
							Budget estimate	House estimate	Qty.	House estimate
CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE										
1 CHEM DEMILITARIZATION—OPERATION AND MAINTENANCE		222,728		222,728		192,128		— 30,600		— 30,600
3 CHEM DEMILITARIZATION—PROCUREMENT		10,227		10,227		10,227				
2 CHEM DEMILITARIZATION—RESEARCH, DEVELOPMENT, TEST AND EVALUATION		595,913		595,913		595,913				
TOTAL, CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE		828,868		828,868		798,268		— 30,600		— 30,600

COMMITTEE RECOMMENDED ADJUSTMENTS

The following table details the adjustments recommended by the Committee:

[In thousands of dollars]

	2015 budget estimate	Committee recommendation	Change from budget estimate
Chemical Demilitarization O&M	222,728	192,128	- 30,600
Improving funds management: Recovered Chemical Warfare Material Project excess to requirement			- 30,600

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE

Appropriations, 2014	\$1,015,885,000
Budget estimate, 2015	820,687,000
House allowance	944,687,000
Committee recommendation	950,687,000

The Committee recommends an appropriation of \$950,687,000. This is \$130,000,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
10	Counter-Narcotics Support	719,096	632,396	- 86,700
	Transfer to National Guard Counter-Drug Program			- 86,700
30	Drug Demand Reduction Program	101,591	101,591	
30A	National Guard Counter-Drug Program		216,700	+ 216,700
	Transfer from Counter-Narcotics Support			+ 86,700
	Program increase			+ 130,000
	Total, Drug Interdiction and Counter-Drug Activities	820,687	950,687	+ 130,000

National Guard Counter-Drug Program.—The Committee remains concerned that the Department continues to reduce funding for the National Guard Counter-Drug program, and disagrees with the fiscal year 2015 President’s budget request to eliminate funding for operation of the Counter-Drug Schools program. The counter-drug schools’ mission of providing combatant commands, law enforcement agencies, community-based organizations and military personnel with training to support and enhance their capabilities to detect, interdict, disrupt and curtail drug trafficking is an important component of our overall effort to reduce drug crimes and protect national security. To ensure this training remains available, the Committee provides \$216,700,000 to the National Guard Counter-Drug program and directs the National Guard Bureau to continue operation of the existing counter-drug schools to achieve their full mission.

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT FUND

Appropriations, 2014	\$879,225,000
Budget estimate, 2015	115,058,000
House allowance	65,464,000
Committee recommendation	

The Committee recommends no funding for the Joint Improvised Explosive Device Defeat Fund in the base budget and addresses this requirement in title IX.

Joint Improvised Explosive Device Defeat Organization [JIEDDO].—The fiscal year 2015 President’s budget request includes \$115,058,000 to develop technologies to defeat improvised explosives devices in the base budget. However the Committee denies this request in base and transfers \$65,463,000 to title IX, as these requirements are war-related and should be funded through Overseas Contingency Operations [OCO] funding.

JOINT URGENT OPERATIONAL NEEDS FUND

Appropriations, 2014	
Budget estimate, 2015	\$20,000,000
House allowance	
Committee recommendation	

The Committee recommends no funding for the Joint Urgent Operational Needs Fund.

SUPPORT FOR INTERNATIONAL SPORTING COMPETITIONS

Appropriations, 2014	
Budget estimate, 2015	\$10,000,000
House allowance	10,000,000
Committee recommendation	10,000,000

The Committee recommends an appropriation of \$10,000,000. This is equal to the budget estimate.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2014	\$316,000,000
Budget estimate, 2015	311,830,000
House allowance	311,830,000
Committee recommendation	311,830,000

The Committee recommends an appropriation of \$311,830,000. This is equal to the budget estimate.

TITLE VII
RELATED AGENCIES

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY
SYSTEM FUND

Appropriations, 2014	\$514,000,000
Budget estimate, 2015	514,000,000
House allowance	514,000,000
Committee recommendation	514,000,000

The Committee recommends an appropriation of \$514,000,000.
This is equal to the budget estimate.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

Appropriations, 2014	\$528,229,000
Budget estimate, 2015	510,194,000
House allowance	501,194,000
Committee recommendation	509,374,000

The Committee recommends an appropriation of \$509,374,000.
This is \$820,000 below the budget estimate.

TITLE VIII

GENERAL PROVISIONS

The following lists general provisions proposed by the Committee. The Committee recommends inclusion of several proposals which have been incorporated in previous appropriations acts, provisions requested for inclusion by the Defense Department, and new provisions. The Committee recommendations are as follows:

SEC. 8001. *Publicity/Propaganda Limitation.*—Retains a provision carried in previous years.

SEC. 8002. *Compensation/Employment of Foreign Nationals.*—Retains a provision carried in previous years.

SEC. 8003. *Obligation Rate of Appropriations.*—Retains a provision carried in previous years.

SEC. 8004. *Obligations in Last 2 Months of Fiscal Year.*—Retains a provision carried in previous years.

SEC. 8005. *General Transfer Authority.*—Retains and modifies a provision carried in previous years.

SEC. 8006. *Project Level Adjustments.*—Retains a provision carried in previous years.

SEC. 8007. *Establishment of Reprogramming Baseline.*—Retains and modifies a provision carried in previous years.

SEC. 8008. *Working Capital Fund Cash Disbursements.*—Retains a provision carried in previous year.

SEC. 8009. *Special Access Programs Notification.*—Retains a provision carried in previous years.

SEC. 8010. *Multiyear Procurement Authority.*—Retains and modifies a provision carried in previous years.

SEC. 8011. *Humanitarian and Civic Assistance.*—Retains a provision carried in previous years.

SEC. 8012. *Civilian Personnel Ceilings.*—Retains and modifies a provision carried in previous years.

SEC. 8013. *Lobbying.*—Retains a provision carried in previous years.

SEC. 8014. *Educational Benefits and Bonuses.*—Retains a provision carried in previous years.

SEC. 8015. *Mentor-Protégé Program.*—Retains a provision carried in previous years.

SEC. 8016. *Public Schools on Military Facilities.*—Inserts a new provision providing authority to make available funds through the Office of Economic Adjustment or by transfer to the Department of Education for construction, renovation, repair, and expansion of public schools on military facilities.

SEC. 8017. *Demilitarization of Surplus Firearms.*—Retains a provision carried in previous years.

SEC. 8018. *Relocations Into the National Capital Region.*—Retains a provision carried in previous years.

SEC. 8019. *Indian Financing Act Incentives*.—Retains a provision carried in previous years.

SEC. 8020. *Defense Media Activity*.—Retains a provision carried in previous years.

SEC. 8021. *Burden Sharing With Kuwait*.—Retains a provision carried in previous years.

SEC. 8022. *Civil Air Patrol*.—Retains and modifies a provision carried in previous years.

SEC. 8023. *Federally Funded Research and Development Centers*.—Retains and modifies a provision carried in previous years.

SEC. 8024. *Carbon, Alloy, or Armor Steel Plate*.—Retains a provision carried in previous years.

SEC. 8025. *Congressional Defense Committee Definition*.—Retains a provision carried in previous years.

SEC. 8026. *Depot Maintenance Competition*.—Retains a provision carried in previous years.

SEC. 8027. *Reciprocal Trade Agreements*.—Retains and modifies a provision carried in previous years.

SEC. 8028. *Overseas Military Facility Investment*.—Retains a provision carried in previous years.

SEC. 8029. *Walking Shield*.—Retains a provision carried in previous years.

SEC. 8030. *Investment Item Unit Cost*.—Retains a provision carried in previous years.

SEC. 8031. *Working Capital Fund Investment Item Restrictions*.—Retains and modifies a provision carried in previous years.

SEC. 8032. *CIA Availability of Funds*.—Retains and modifies a provision carried in previous years.

SEC. 8033. *GDIP Information System*.—Retains a provision carried in previous years.

SEC. 8034. *Tribal Lands Environmental Impact*.—Retains a provision carried in previous years.

SEC. 8035. *Buy America Act Compliance*.—Retains a provision carried in previous years.

SEC. 8036. *Competition for Consultants and Studies Programs*.—Retains a provision carried in previous years.

SEC. 8037. *Field Operating Agencies*.—Retains a provision carried in previous years.

SEC. 8038. *Contractor Conversion and Performance*.—Retains a provision carried in previous years.

SEC. 8039. *Rescissions*.—The Committee recommends a general provision rescinding funds from the prior years as displayed below:

	Amount
2013 Appropriations	
Aircraft Procurement, Army:	
Kiowa Warrior program termination	\$18,242,000
Other Procurement, Army:	
NAVSTAR GPS	5,842,000
Joint Tactical Radio System	67,000,000
Mid-Tier Networking Vehicular Radio	68,884,000
Aircraft Procurement, Navy:	
MQ-4 Triton	47,200,000
Procurement, Marine Corps:	
LAV PIP	10,000,000
Combat Support System	2,000,000
Common Computer Resources	42,000,000

	Amount
Comm & Elec Infrastructure	15,000,000
HMMWV	5,000,000
Motor Transport Mod	15,000,000
LVSR	10,000,000
EOD Systems	16,900,000
Material Handling Equipment	3,500,000
Aircraft Procurement, Air Force:	
C-130 Mods	39,000,000
MQ-1B Mods	16,300,000
RQ-4	33,000,000
Procurement, Defense-Wide:	
Non standard Aviation	11,500,000
2014 Appropriations	
Aircraft Procurement, Army:	
Aerial Common Sensor	73,500,000
Other Procurement, Army:	
Mid-Tier Networking Vehicular Radio	19,200,000
Transportable Tactical Command Communications	598,000
Joint Tactical Radio System	103,000,000
Fire Support C2 Family	4,400,000
Tactical Bridge	6,000,000
Personnel Recovery Support System	9,400,000
Aircraft Procurement, Navy:	
Joint Strike Fighter CV	196,000,000
Joint Strike Fighter STOVL	172,000,000
EA-18G	25,000,000
FA-18E/F Advance Procurement	75,000,000
Executive Helicopter Series	15,000,000
Aviation Life Support Mods	6,267,000
Shipbuilding and Conversion, Navy:	
Virginia Class Submarine: Economic Change Orders	20,000,000
Aircraft Procurement, Air Force:	
C-5 Modifications	36,000,000
Joint Strike Fighter CTOL	196,000,000
Missile Procurement, Air Force:	
Evolved Expendable Launch Vehicle	118,685,000
Small Diameter Bomb	36,024,000
Procurement, Defense-Wide:	
JBPS program termination	12,100,000
Research, Development, Test and Evaluation, Navy:	
Amphibious Combat Vehicle	40,000,000
JATAS termination	14,000,000
Marine Corps combat service support	6,600,000
Ship to Shore Connector	16,330,000
Advance Submarine System Development Test and Evaluation	2,795,000
JPALS Increment 2	38,762,000
Tactical Cryptologic Activities	497,000
JHSV	986,000
Harpoon Mods termination	500,000
Research, Development, Test and Evaluation, Air Force:	
Cyber Security Initiative	2,048,000
DOD Cyber Crime Center	288,000
F-22 Increment 3.2B	23,000,000
ICBM Fuze Modernization	14,000,000

SEC. 8040. *Civilian Technician Reductions.*—Retains a provision carried in previous years.

SEC. 8041. *North Korea.*—Retains a provision carried in previous years.

SEC. 8042. *Reserve Component Intelligence Reimbursement.*—Retains a provision carried in previous years.

SEC. 8043. *Investment Mobilization Capacity Account.*—Inserts a new provision to provide funding to sustain work rates at the manufacturing arsenals and maintain the defense industrial base.

SEC. 8044. *Counter-Drug Activities Transfer*.—Retains a provision carried in previous years.

SEC. 8045. *United Service Organizations Grant*.—Retains and modifies a provision carried in previous years.

SEC. 8046. *Buy American Computers*.—Retains a provision carried in previous years.

SEC. 8047. *Small Business Set-Asides*.—Inserts a new provision directing that transfers to SBIR and STTR be taken proportionally.

SEC. 8048. *Transfer of Equipment and Supplies*.—Retains and modifies to make permanent a provision carried in previous years.

SEC. 8049. *Contractor Bonuses*.—Retains a provision carried in previous years.

SEC. 8050. *Reserve Peacetime Support*.—Retains a provision carried in previous years.

SEC. 8051. *Unexpended Balances*.—Retains a provision carried in previous years.

SEC. 8052. *National Guard Distance Learning*.—Retains a provision carried in previous years.

SEC. 8053. *Sexual Assault Prevention Programs*.—Retains and modifies a provision carried in previous years.

SEC. 8054. *End-Item Procurement*.—Retains a provisions carried in previous years.

SEC. 8055. *Buy American Waivers*.—Retains a provision carried in previous years.

SEC. 8056. *Training of Foreign Security Forces*.—Retains and modifies a provision carried in previous years.

SEC. 8057. *Repair and Maintenance of Military Family Housing*.—Retains a provision carried in previous years.

SEC. 8058. *Joint Capability Demonstration Project*.—Retains a provision carried in previous years.

SEC. 8059. *Secretary of Defense Reporting Requirement*.—Retains a provision carried in previous years.

SEC. 8060. *Support to Other Government Agencies*.—Makes permanent a provision carried in previous years.

SEC. 8061. *Missile Defense Authorization*.—Retains and modifies a provision carried in previous years.

SEC. 8062. *Armor-Piercing Ammo*.—Retains a provision carried in previous years.

SEC. 8063. *Funding Arlington National Cemetery*.—Inserts a new provision directing the Army to request funding for Arlington National Cemetery in the Cemeterial Expenses, Army appropriation.

SEC. 8064. *Alcoholic Beverages*.—Retains a provision carried in previous years.

SEC. 8065. *O&M, Army Transfer*.—Retains and modifies a provision carried in previous years.

SEC. 8066. *National Intelligence Program Separation*.—Retains and modifies a provision carried in previous years.

SEC. 8067. *Global Security Contingency Fund Authority*.—Retains a provision carried in previous years.

SEC. 8068. *Tobacco Use in the Military*.—Inserts a new provision eliminating the 5 percent discount on tobacco products at military exchanges as authorized by Department of Defense Instruction 1330.9.

SEC. 8069. *Israeli Cooperative Programs*.—Retains and modifies a provision carried in previous years.

SEC. 8070. *Enlistment Waivers*.—Inserts a new provision prohibiting the use of funds from being used to grant an enlistment waiver for an offense within offense code 433 related to certain sex crimes.

SEC. 8071. *Prior Year Shipbuilding*.—Retains and modifies a provision carried in previous years.

SEC. 8072. *Intelligence Authorization*.—Retains and modifies a provision carried in previous years.

SEC. 8073. *New Start Authority*.—Retains a provision carried in previous years.

SEC. 8074. *Contingency Operations Budget Justification*.—Retains a provision carried in previous years.

SEC. 8075. *Nuclear Armed Interceptors*.—Retains a provision carried in previous years.

SEC. 8076. *Grants*.—Retains and modifies a provision carried in previous years.

SEC. 8077. *53rd Weather Reconnaissance Squadron*.—Retains a provision carried in previous years.

SEC. 8078. *Integration of Foreign Intelligence*.—Retains a provision carried in previous years.

SEC. 8079. *Evolved Expendable Launch Competition*.—Inserts a new provision that directs the acceleration of a competitively awarded launch.

SEC. 8080. *SCN Transfer Authority*.—Retains and modifies a provision carried in previous years.

SEC. 8081. *Army Tactical UAVs*.—Retains a provision carried in previous years.

SEC. 8082. *Asia-Pacific Regional Initiative*.—Retains a provision carried in previous years.

SEC. 8083. *DNI R&D Waiver*.—Retains a provision carried in previous years.

SEC. 8084. *Shipbuilding Obligations*.—Retains a provision carried in previous years.

SEC. 8085. *DNI Reprogramming Baseline*.—Retains a provision carried in previous years.

SEC. 8086. *Child Soldiers*.—Makes permanent a provision carried in previous years.

SEC. 8087. *DNI Information Sharing*.—Retains a provision carried in previous years.

SEC. 8088. *NIP Reprogramming*.—Retains a provision carried in previous years.

SEC. 8089. *Future-Years Intelligence Program*.—Retains a provision carried in previous years.

SEC. 8090. *Congressional Intelligence Committee Definition*.—Retains a provision carried in previous years.

SEC. 8091. *Cost of War Report*.—Retains and modifies a provision carried in previous years.

SEC. 8092. *Fisher House Authorization*.—Retains a provision carried in previous years.

SEC. 8093. *Defense Acquisition Workforce Development Fund*.—Retains and modifies a provision carried in previous years.

SEC. 8094. *Public Disclosure of Agency Reports.*—Retains a provision carried in previous years.

SEC. 8095. *Contractor Compliance With the Civil Rights Act of 1964.*—Retains a provision carried in previous years.

SEC. 8096. *DOD-VA Medical Facility Demonstration.*—Retains and modifies a provision carried in previous years.

SEC. 8097. *Travel and Conference Activities.*—Retains and modifies a provision carried in previous years.

SEC. 8098. *Senior Mentors.*—Makes permanent a provision carried in previous years.

SEC. 8126. *Amyotrophic Lateral Sclerosis.*—Inserts a new provision making \$7,500,000 available for peer-reviewed medical research on ALS.

SEC. 8127. *DFAS.*—Inserts a new provision requiring the Secretary of Defense to notify Congress before implementing any changes to the operations of the Defense Finance and Accounting Service.

TITLE IX
OVERSEAS CONTINGENCY OPERATIONS
DEPARTMENT OF DEFENSE—MILITARY

The Committee recommends an appropriation of \$58,255,711,000 for operations related to overseas contingency operations. In fiscal year 2014 Congress appropriated \$85,026,942,000 for activities funded in this title.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the Committee recommendation:

[In thousands of dollars]

	Fiscal year 2014 enacted	Fiscal year 2015 estimate	Committee recommendation
Military Personnel	7,971,993	5,394,983	5,424,983
Operation and Maintenance	68,397,122	46,494,661	45,271,342
Procurement	6,233,156	5,598,560	6,755,240
Research and Development	135,134	79,977	82,677
Revolving and Management Funds	264,910	91,350	91,350
Other Department of Defense Programs	2,164,997	926,499	961,962
General Provisions (net)	-140,370	-117,000	-331,843
Total, Overseas Contingency Operations	85,026,942	58,469,030	58,255,711

OVERVIEW

COMMITTEE RECOMMENDATION

The Committee recommends \$58,255,711,000 of additional appropriations for overseas contingency operations in fiscal year 2015. This funding will ensure that resources, equipment, and supplies are available for our servicemembers without interruption, and will enable the Department to avoid absorbing operational costs from within baseline programs that are critical to future readiness and home-station activities.

REPORTING REQUIREMENTS

The Committee directs that the Department of Defense continue to report incremental contingency operations costs for Operation Enduring Freedom on a monthly basis in the Cost of War Execution report as required by Department of Defense Financial Management Regulation, chapter 23, volume 12. The Committee further directs the Department to continue providing the Cost of War reports to the congressional defense committees that include the following information by appropriation: funding appropriated, funding allocated, monthly obligations, monthly disbursements, cumulative fiscal year obligations, and cumulative fiscal year disbursements.

The Committee expects that in order to meet unanticipated requirements, the Department of Defense may need to transfer funds within these appropriations accounts for purposes other than those specified in this report. The Committee directs the Department of Defense to follow normal prior approval reprogramming procedures should it be necessary to transfer funding between different appropriations accounts in this title.

COUNTERTERRORISM PARTNERSHIPS FUND

The Overseas Contingency Operations budget request includes \$4,000,000,000 for the Counterterrorism Partnerships Fund [CTPF] in the Department of Defense. An additional \$1,000,000,000 was requested for the Department of State in a similar fund. The intent of the CTPF is to supplement ongoing counterterrorism and crisis response activities by the United States, and to accelerate cooperation with key partner nations.

The Committee supports increased engagement with partner nations to address emerging threats. The United States Armed Forces cannot be expected to respond unilaterally to an increasing number of complex terrorist threats in the Middle East, North Africa, the Sahel, the Horn of Africa, and other regions. The United States must have effective partners which can take responsibility for new security threats, and additional engagement with those nations can enhance those capabilities.

However, the Committee is concerned with several aspects of the proposal. In particular, the Committee does not support broad exemptions from current laws that could result in the training of foreign security services that would otherwise be ineligible for such assistance. The Committee similarly does not support waiving the statutory caps on the amount of funds that may be used for cooperative counterterrorism activities. Additionally, the Committee has not been satisfied that there is a sufficiently specific plan in place to execute \$4,000,000,000 over the next 3 years for the requested activities. Finally, additional policy questions should be raised as to whether the Department of Defense or the Department of State should be in the lead over the long term for training and equipping foreign security forces.

Therefore, the Committee recommendation includes \$1,900,000,000 for the CTPF, available for 2 years, with narrower authorities than those proposed in the request. These narrower authorities require that funds may be transferred only to certain appropriations which are actually related to counterterrorism missions and that human rights vetting must occur for any train and equip program for foreign security services. The Committee does not include a waiver for the authorized caps contained in the National Defense Authorization Act section 1206 and section 1208 training and support activities; instead the Committee authorizes an increase in the caps when CTPF funds are transferred for use in those programs. The recommendation allows for up to \$700,000,000 in 1206 train and equip programs in any fiscal year, and up to \$80,000,000 in 1208 counterterrorism support programs in any fiscal year.

In addition, the Committee recommendation includes \$1,000,000,000 in additional funds for Operation and Maintenance,

Defense-wide, which may be used in fiscal year 2015 for additional counterterrorism partnership activities under existing authorities and budgeting mechanisms. Providing additional funds for counterterrorism activities within existing accounts will increase accountability and oversight.

SYRIA TRAIN AND EQUIP AUTHORITY

The Committee is gravely concerned about the continuing civil war in Syria, including the serious humanitarian toll and the expanding counterterrorism crisis caused by the brutal actions of the illegitimate Assad regime. The Overseas Contingency Operations request includes a proposal to authorize the Department of Defense to engage in atrain and equip mission for vetted, moderate elements of the Syrian opposition.

The Committee supports increased action by the United States and its regional partners to contain the crisis in Syria and hasten a negotiated settlement to end the conflict. The Committee also notes that S. 2410, the National Defense Authorization Act for Fiscal Year 2015, as reported, contains a similar authorization for the Department of Defense to supply equipment, supplies, training, and defense services to vetted elements of the Syrian opposition.

The recommendation includes a provision which authorizes these activities through September 30, 2015, or until enactment of the National Defense Authorization Act for Fiscal Year 2015. The provision requires that the Department of Defense conduct vetting of candidates for assistance from the Department of Defense, including for associations with terrorist groups and for commitments to a peaceful and democratic Syria under civilian rule.

To remove any ambiguity on the role of the United States Armed Forces in supporting moderate elements of the Syrian opposition, the provision states that it does not authorize the use of the Armed Forces for combat operations covered by the War Powers Resolution.

Finally, the authorization allows for the use of up to \$500,000,000 from Operation and Maintenance, Defense-wide, to carry out these activities. As noted above, the recommendation includes a \$1,000,000,000 increase to this account for counterterrorism activities. The Committee strongly urges the Department of Defense to include funding for support to the Syrian opposition through normal budgeting processes in future requests, in order to maximize transparency and accountability in this sensitive, but critical, initiative.

BALTIC STATES

The Committee is deeply concerned about the threat Russia's recent aggression poses to Baltic States and supports programs that provide training and assistance to bolster the abilities of these nations to defend against possible future provocations. The Committee supports Department of Defense efforts to maintain U.S. military personnel rotations in these countries along with NATO's Baltic Air Policing program. To that end, the Committee recommends not less than \$30,000,000 from the European Reassurance Initiative be made available for the countries of Estonia, Lithuania, and Latvia.

OVERSEAS CONTINGENCY OPERATIONS FUNDING MIGRATION

The Committee notes that there is not yet an understanding of enduring activities funded by the Overseas Contingency Operations [OCO] budget or a clear path forward in migrating enduring requirement resources to the base budget. The Committee is concerned about the potential for large portions of enduring activities, training, sustainment, and other military requirements being funded through the OCO budget. The Committee believes the Department of Defense would be accepting high levels of risk in continuing to fund non-contingency related activities through the OCO budget. Therefore, the Committee directs the Secretary of Defense to submit a report showing transfers of OCO funding to the base budget, at the program, project and activity level, for fiscal year 2016. This report shall be submitted to the congressional defense committees at the time of the President's budget submission for fiscal year 2016.

MILITARY PERSONNEL

The Committee recommends a total of \$5,424,983,000 for pay, allowances, and other personnel costs for Active, Reserve, and Guard troops activated for duty in Afghanistan and other contingency operations. This recommendation includes funding for subsistence, permanent change of station travel, and special pays including imminent danger pay, family separation allowance, and hardship duty pay.

MILITARY PERSONNEL, ARMY

Appropriations, 2014	\$5,449,726,000
Budget estimate, 2015	3,711,003,000
Committee recommendation	3,711,003,000

The Committee recommends an appropriation of \$3,711,003,000. This is equal to the budget estimate.

NATIONAL GUARD PERSONNEL, AIR FORCE

Appropriations, 2014	\$6,919,000
Budget estimate, 2015	4,894,000
Committee recommendation	4,894,000

The Committee recommends an appropriation of \$4,894,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	BA 1: UNIT AND INDIVIDUAL TRAINING			
80	Special Training	4,894	4,894
	TOTAL	4,894	4,894
	Total, National Guard Personnel, Air Force	4,894	4,894

OPERATION AND MAINTENANCE

The Committee recommends \$45,271,342,000 for the operation and maintenance accounts. These funds are available to fund overseas deployments and other activities by the services and Special Operations Forces to include financing flying hours, ship steaming days, ground operations, special airlift missions, increased ship and aircraft maintenance, logistics support, fuel purchases, base support, civilian personnel, personnel support costs, overseas transportation, communications support, facility management, and other operation and maintenance requirements.

OPERATION AND MAINTENANCE, ARMY

Appropriations, 2014	\$32,369,249,000
Budget estimate, 2015	16,355,722,000
Committee recommendation	16,355,722,000

The Committee recommends an appropriation of \$16,355,722,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

Commanders Emergency Response Program.—The Committee recommends \$10,000,000 for the Commanders Emergency Response Program [CERP] in Afghanistan in fiscal year 2015. The Committee directs the Army to submit monthly commitment, obligation, and expenditure data for CERP to the congressional defense committees no later than 30 days after each month.

The Committee includes language in section 9005 that requires all CERP projects executed under this authority shall be small scale, and shall not exceed \$2,000,000 in cost (including any ancillary or related elements in connection with such project).

OPERATION AND MAINTENANCE, NAVY

Appropriations, 2014	\$8,470,808,000
Budget estimate, 2015	5,477,240,000
Committee recommendation	5,263,921,000

The Committee recommends an appropriation of \$5,263,921,000. This is \$213,319,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

	Total, Operation and Maintenance, Defense-Wide	5,707,463	6,722,463	+ 1,015,000

National Guard and Reserve Reintegration Programs.—The Committee believes that National Guard and Reserve reintegration pro-

grams, like the Yellow Ribbon Reintegration Program [YRRP] and the Beyond Yellow Ribbon program, continue to provide value to service members and their families. Since 2008, more than 1.3 million National Guard members and reservists and their families have benefited from the Yellow Ribbon Reintegration Program. Information and counseling provided during YRRP events help mitigate the unique challenges associated with repeated transitions between military and civilian life, particularly for service members returning to rural areas far removed from traditional military support networks. In addition, State programs supported through the Beyond Yellow Ribbon program provide community-based outreach services that coordinate State and local resources into a single, comprehensive network of support throughout the deployment cycle.

Given the proven track record of these programs in addressing many of the reintegration challenges facing Guard and reservists, particularly the vital mission of suicide prevention, the Committee believes the YRRP and Beyond Yellow Ribbon program have enduring value and encourages the Department to ensure their continued viability by transitioning each to its base budget request.

OPERATION AND MAINTENANCE, ARMY RESERVE

Appropriations, 2014	\$34,674,000
Budget estimate, 2015	36,572,000
Committee recommendation	36,572,000

The Committee recommends an appropriation of \$36,572,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

	Sustainment	29,603	29,603
	Subtotal, Related Activities	31,853	31,853
	Total, Afghanistan Security Forces Fund	4,109,333	4,109,333

Recruiting and Retention of Women in Afghanistan National Security Forces.—Of the funds provided for the Afghanistan Security Forces Fund, the Committee directs that \$25,000,000 be directed toward the recruitment and retention of women in the Afghan security forces. The funds should be focused on, but not limited to, providing appropriate equipment for female security and police forces, modification of facilities to allow for female participation within the security and police forces' training to include literacy training for women recruits, and gender awareness training for male counterparts and recruitment of women to support the 2015 parliamentary elections. The Committee directs the Department of Defense to provide periodic updates to the congressional defense committees on the efforts to increase women participation in the Afghan security forces.

Afghan Pilot Training.—The Secretary of the Air Force has recommended the training of Afghan Air Force pilots and maintenance personnel on the A-29 Light Air Support [LAS] aircraft within the United States. The Committee is concerned about the aggressive training timeline planned by the Air Force and whether trainees will be able to operate and maintain U.S. provided aircraft in Afghanistan without coalition support and protection. The Committee also has questions about the rigor of planned threat vetting and screening before pilot trainees arrive in the United States. Therefore, the Committee directs the Secretary of the Air Force to provide a report to the defense committees, no later than 60 days prior to the start of pilot training, outlining the plan to train Afghan LAS pilots, including pilot background checks, threat vetting, and screening planned prior to the arrival of pilots in the United States and any other planned safeguards. The report shall also include the timeline for aircraft delivery to Afghanistan and the plan to enable the Afghans to successfully operate and maintain the aircraft at a permanent base in Afghanistan.

COUNTERTERRORISM PARTNERSHIPS FUND

Appropriations, 2014	
Budget estimate, 2015	\$4,000,000,000
Committee recommendation	1,900,000,000

The Committee recommends an appropriation of \$1,900,000,000. This is \$2,100,000,000 below the budget estimate.

EUROPEAN REASSURANCE INITIATIVE

Appropriations, 2014	
Budget estimate, 2015	\$925,000,000
Committee recommendation	1,000,000,000

The Committee recommends an appropriation of \$1,000,000,000. This is \$75,000,000 above the budget estimate.

PROCUREMENT

The Committee recommends \$6,755,240,000 for the procurement accounts. The overseas contingency operations funding supports our forces engaged in Operation Enduring Freedom and other contingency operations. The Committee provides funding to replace combat losses and equipment left behind in theater, augment and upgrade equipment for deploying units, sustain munitions and other war consumables, and reset the units returning home to an equipment-ready status. Funding adjustments have been made in instances where the requirement was poorly defined, funding was requested ahead of need or program execution has been delayed.

AIRCRAFT PROCUREMENT, ARMY

Appropriations, 2014	\$669,000,000
Budget estimate, 2015	36,000,000
Committee recommendation	196,200,000

The Committee recommends an appropriation of \$196,200,000. This is \$160,200,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

	Total, Procurement of Ammunition, Army	140,905	140,905

OTHER PROCUREMENT, ARMY

Appropriations, 2014	\$653,902,000
Budget estimate, 2015	727,553,000
Committee recommendation	614,424,000

The Committee recommends an appropriation of \$614,424,000. This is \$113,129,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
5	Family of Medium Tactical Veh [FMTV]	95,624	95,624
8	PLS ESP	60,300	60,300
10	Hvy Expanded Mobile Tactical Truck Ext Serv	192,620	192,620
15	Mine-Resistant Ambush-Protected [MRAP] Mods	197,000	197,000
63	DCGS-A [MIP]	48,331	- 48,331
	Improving funds management: Excess to need	- 48,331
67	CI HUMINT Auto Reporting and Coll [CHARCS]	4,980	- 4,980
	Improving funds management: Excess to need	- 4,980
71	Family Of Persistent Surveillance Capabilities	32,083	- 32,083
	Improving funds management: Excess to need	- 32,083
72	Counterintelligence/Security Countermeasures	17,535	- 17,535
	Improving funds management: Excess to need	- 17,535
133	Force Provider	51,500	51,500
135	Cargo Aerial Del & Personnel Parachute System	2,580	- 2,580
	Improving funds management: Excess to need	- 2,580
170	Rapid Equipping Soldier Support Equipment	25,000	17,380	- 7,620
	Improving funds management: Excess to need	- 10,000
	Transfer from Title III	+ 2,380
	Total, Other Procurement, Army	727,553	614,424	- 113,129

AIRCRAFT PROCUREMENT, NAVY

Appropriations, 2014	\$211,176,000
Budget estimate, 2015	141,247,000
Committee recommendation	158,503,000

The Committee recommends an appropriation of \$158,503,000. This is \$17,256,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
11	UH-1&/AH-1Z	30,000	26,000	- 4,000

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
	Improving funds management: Excess to need			- 4,000
27	MQ-8 UAV	40,888	70,000	+ 29,112
	Program increase: 3 additional MQ-8 UAVs			+ 29,112
39	EP-3 Series	34,955	34,955	
49	Special Project Aircraft	2,548	2,548	
54	Common ECM Equipment	31,920		- 31,920
	Improving funds management: Excess to need			- 31,920
65	Spares and Repair Parts		25,000	+ 25,000
	Program increase			+ 25,000
67	Aircraft Industrial Facilities	936		- 936
	Improving funds management: Excess to need			- 936
	Total, Aircraft Procurement, Navy	141,247	158,503	+ 17,256

WEAPONS PROCUREMENT, NAVY

Appropriations, 2014	\$86,500,000
Budget estimate, 2015	12,456,000
Committee recommendation	12,456,000

The Committee recommends an appropriation of \$12,456,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
10	Laser Maverick	7,656	7,656	
11	Stand off Precision Guided Munitions [SOPGM]	4,800	4,800	
	Total, Weapons Procurement, Navy	12,456	12,456	

PROCUREMENT OF AMMUNITION, NAVY AND MARINE CORPS

Appropriations, 2014	\$169,362,000
Budget estimate, 2015	152,009,000
Committee recommendation	152,009,000

The Committee recommends an appropriation of \$152,009,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
1	General Purpose Bombs	5,086	5,086	
2	Airborne Rockets, All Types	8,862	8,862	
3	Machine Gun Ammunition	3,473	3,473	
6	Air Expendable Countermeasures	29,376	29,376	
11	Other Ship Gun Ammunition	3,919	3,919	
12	Small Arms & Landing Party Ammo	3,561	3,561	
13	Pyrotechnic and Demolition	2,913	2,913	

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
14	Ammunition Less Than \$5 Million	2,764	2,764

	Total, Procurement, Marine Corps	53,589	67,589	+ 14,000

AIRCRAFT PROCUREMENT, AIR FORCE

Appropriations, 2014	\$188,868,000
Budget estimate, 2015	646,219,000
Committee recommendation	296,200,000

The Committee recommends an appropriation of \$296,200,000. This is \$350,019,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
4	C-130J	70,000	70,000
18	MQ-9	192,000	26,000	- 166,000
	Improving funds management: Reduce quantity by 10	- 166,000
21	B-1B	91,879	- 91,879
	Improving funds management: Lack of justification	- 91,879
50	C-130	47,840	- 47,840
	Improving funds management: Lack of justification	- 47,840
51	C-130J Mods	18,000	18,000
53	Compass Call Mods	24,800	24,800
63	HC/MC-130 Modifications	44,300	—	- 44,300
	Improving funds management: Lack of justification	- 44,300
64	Other Aircraft	111,990	111,990
70	Initial Spares/Repair Parts	45,410	45,410
	Total, Aircraft Procurement, Air Force	646,219	296,200	- 350,019

MISSILE PROCUREMENT, AIR FORCE

Appropriations, 2014	\$24,200,000
Budget estimate, 2015	114,939,000
Committee recommendation	114,939,000

The Committee recommends an appropriation of \$114,939,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
5	Predator Hellfire Missile	114,939	114,939
	Total, Missile Procurement, Air Force	114,939	114,939

PROCUREMENT OF AMMUNITION, AIR FORCE

Appropriations, 2014	\$137,826,000
Budget estimate, 2015	170,732,000
Committee recommendation	170,732,000

The Committee recommends an appropriation of \$170,732,000. This is equal to the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
2	Cartridges	2,163	2,163
4	General Purpose Bombs	41,545	41,545

68	Intelligence Systems	13,549	13,549
71	Other Items <\$5M	32,773	32,773
76	Warrior Systems <\$5M	78,357	78,357
88	Operational Enhancements	3,600	3,600
	Classified Programs	41,529	41,529
	Total, Procurement Defense-Wide	189,041	211,541	+ 22,500

NATIONAL GUARD AND RESERVE EQUIPMENT

Appropriations, 2014	\$1,000,000,000
Budget estimate, 2015	1,000,000,000
Committee recommendation	1,000,000,000

The Committee recommends an appropriation of \$1,000,000,000. This is \$1,000,000,000 above the budget estimate.

The appropriation includes direction for each Reserve and National Guard component commander to submit to the congressional defense committees a detailed assessment of that component's modernization priorities, not later than 30 days after enactment of this act.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Item	2015 budget estimate	Committee recommendation	Change from budget estimate
NATIONAL GUARD AND RESERVE EQUIPMENT			
RESERVE EQUIPMENT:			
ARMY RESERVE:			
Miscellaneous Equipment		175,000	+ 175,000
NAVY RESERVE:			
Miscellaneous Equipment		65,000	+ 65,000
MARINE CORPS RESERVE:			
Miscellaneous Equipment		60,000	+ 60,000
AIR FORCE RESERVE:			
Miscellaneous Equipment		70,000	+ 70,000
TOTAL, RESERVE EQUIPMENT		370,000	+ 370,000
NATIONAL GUARD EQUIPMENT:			
ARMY NATIONAL GUARD:			
Miscellaneous Equipment		315,000	+ 315,000
AIR NATIONAL GUARD:			
Miscellaneous Equipment		315,000	+ 315,000
TOTAL, NATIONAL GUARD EQUIPMENT		630,000	+ 630,000
TOTAL, NATIONAL GUARD AND RESERVE EQUIPMENT		1,000,000	+ 1,000,000

High-Priority Items.—The Committee directs that the National Guard and Reserve Equipment account shall be executed by the Chiefs of the National Guard and Reserve components with priority consideration given to the following items: C-130 Propulsion Upgrades; C-130 and KC-135 Secure Line-of-Sight/Beyond Line-of-Sight [SLOS/BLOS] Data Link and Situational Awareness Cockpit Displays; Chemical and Biological Protective Shelters; Coastal Riverine Force Boats and Communications Upgrades; Combat Mobility Equipment; Communications, Navigation and Surveillance/Air Traffic Management [CNS/ATM]; Construction Engineering Equipment; Crashworthy Auxiliary Fuel Systems; Cyber Range Training Equipment; F-15C/D AESA Radars; F-15/F-16 Sensor Upgrades; Fire-Resistant Environmental Ensemble; FMTV Virtual Trainers; HMMWV Ambulances; HMMWV Modernization; In-Flight Propeller Balancing System; Integrated Vehicle Health Management System for UH-72As; Large Aircraft Infrared Countermeasures [LAIRCM]; Light Utility Helicopters; Mobile Satellite Networking Technology; Naval Construction Force Equipment; Radio Enhancements; Palletized Loading Systems; Reactive Skin Decontamination Lotion; Rotary Medium Cargo [H-60M] modernization; Security and Support/Civil Support Communication Package for UH-60s; Semi-permanent Humidity Controlled Shelters; Semitrailers; Simulation Training Systems; Small Arms Sim-

ulation Training Systems; TACSAT Radios; Tactical Communications Equipment for MQ-9s; Tactical Trucks; Ultra-Light Tactical Vehicles; and Wireless Mobile Mesh Network Systems.

National Guard and Reserve Equipment Report.—The Committee utilizes the annual National Guard and Reserve Equipment Report [NGRER] as a valuable repository for information on equipment requirements, inventories, and shortages for the Guard and Reserve components. In the fiscal year 2015 NGRER, the Army changed the way in which it calculated its equipment shortages to include modernized substitutes, and therefore the Army’s equipment shortage data was not included in the Report. The Committee notes that this is a break from past reports and that this change in calculation detracts from the usefulness of the Report. The Committee directs the Army to provide data excluding modernized substitutes in future NGRERs.

Simulation Training Systems.—The Committee acknowledges that simulation training is a cost-effective means by which military units can improve tactical decisionmaking skills and readiness. The Committee encourages the Department of Defense to use a portion of National Guard and Reserve Equipment account funding to continue the procurement of simulation training systems and to seek the appropriate combination of Government-owned and operated simulators as well as contractor support in order to maximize efficiency and effectiveness.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The Committee recommends \$82,677,000 for research, development, test and evaluation.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

Appropriations, 2014	\$13,500,000
Budget estimate, 2015	4,500,000
Committee recommendation	2,000,000

The Committee recommends an appropriation of \$2,000,000. This is \$2,500,000 below the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate

Appropriations, 2014	\$376,305,000
Budget estimate, 2015	189,000,000
Committee recommendation	209,000,000

The Committee recommends an appropriation of \$209,000,000. This is \$20,000,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
10	Drug Interdiction and Counter-Drug Activities	189,000	209,000	+ 20,000
	Program increase: SOUTHCOM ISR	+ 20,000
	Total, Drug Interdiction and Counter-Drug Activities ...	189,000	209,000	+ 20,000

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT FUND

Appropriations, 2014	\$879,225,000
Budget estimate, 2015	379,000,000
Committee recommendation	444,463,000

The Committee recommends an appropriation of \$444,463,000. This is \$65,463,000 above the budget estimate.

COMMITTEE RECOMMENDED PROGRAM

The following table details the program recommended by the Committee:

[In thousands of dollars]

Line	Item	2015 budget estimate	Committee recommendation	Change from budget estimate
1	Attack the Network	189,700	189,700
2	Defeat the Device	94,600	94,600
3	Train the Force	15,700	15,700
4	Operations	79,000	144,463	+ 65,463
	Transfer from Base	+ 65,463
	Total, JIEDDO	379,000	444,463	+ 65,463

Joint Improvised Explosive Device Defeat Organization [JIEDDO].—The fiscal year 2015 President’s budget request includes \$115,058,000 in base funding and an additional \$379,000,000 in title IX Oversees Contingency Operations [OCO] funding. However, the Committee denies this request in base and transfers \$65,463,000 to title IX, as these requirements are war-related and should be funded through OCO funding. In all, the recommendation provides \$444,463,000 for JIEDDO.

The Committee recently received an interim report stating that the Department of Defense is transitioning JIEDDO’s roles and missions from its current focus on counter-improvised explosive devices [C-IED] to a much broader mission. The reports states the new mission “includes an ability to prepare for and react to battle-field surprise in counterterrorism, counter-insurgency, and other related mission areas beyond C-IED but with a significantly smaller footprint.” The final report with the detailed concept of operations will be finalized in September 2014. The Committee believes that the proposed change in roles and missions has not been justified, in part because there are already organizations that exist to conduct those missions.

In addition, the Committee strongly believes that the request to establish a new organization runs counter to the letter and intent of section 8037 of Public Law 113–76, the Department of Defense Appropriations Act, 2014, which prohibits the establishment of a new field operating agency. The Committee notes that this legislative provision has been carried annually for several years, and the Committee recommendation continues that provision.

JOINT URGENT OPERATIONAL NEEDS FUND

Appropriations, 2014
Budget estimate, 2015	\$50,000,000
Committee recommendation

The Committee recommends no funding for the Joint Urgent Operational Needs Fund.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2014	\$10,766,000
Budget estimate, 2015	7,968,000
Committee recommendation	7,968,000

The Committee recommends an appropriation of \$7,968,000. This is equal to the budget estimate.

GENERAL PROVISIONS—THIS TITLE

SEC. 9001. *Funds in Addition to Base*.—Retains and modifies a provision carried in previous years.

SEC. 9002. *Special Transfer Authority*.—Retains and modifies a provision carried in previous years.

SEC. 9003. *Supervision and Administration Costs*.—Retains a provision carried in previous years.

SEC. 9004. *Vehicle Procurement*.—Retains a provision carried in previous years.

SEC. 9005. *Commander's Emergency Response Program*.—Retains and modifies a provision carried in previous years.

SEC. 9006. *Coalition Lift and Sustainment*.—Retains and modifies a provision carried in previous years.

SEC. 9007. *Permanent Military Installations*.—Retains a provision carried in previous years.

SEC. 9008. *U.N. Convention Against Torture*.—Retains a provision carried in previous years.

SEC. 9009. *Afghanistan Resource Oversight Council*.—Retains a provision carried in previous years.

SEC. 9010. *Investment Unit Cost*.—Retains a provision carried in previous years.

SEC. 9011. *Office of Security Cooperation in Iraq*.—Retains and modifies a provision carried in previous years.

SEC. 9012. *Rescissions*.—The Committee recommends a general provision rescinding funds from prior years as displayed below:

	Amount
2013 Appropriations	
Other Procurement, Army:	
Single Army Logistics Enterprise	\$5,000,000
Fire Support C2 Family	3,200,000
2014 Appropriations	
Aircraft Procurement, Army:	
CH-47 Chinook	347,000,000
Kiowa Warrior program termination	117,000,000
Afghanistan Security Forces Fund:	
Program adjustment	109,643,000

SEC. 9013. *Syria War Powers Contravention*.—Retains and modifies a provision carried in previous years.

SEC. 9014. *Unexploded Ordnance*.—Inserts a new provision funding the surface and subsurface clearance of unexploded ordnance in Afghanistan.

SEC. 9015. *Syria Opposition*.—Inserts a new provision to train and assist the Syrian opposition.

SEC. 9016. *C-130 Cargo Aircraft Transfers*.—Inserts a new provision prohibiting the use of funds appropriated by this act to transfer additional C-130 cargo aircraft to the Afghan National Security Forces until the Department of Defense submits a review of the Afghanistan Air Force's requirements.

SEC. 9017. *Emergency Authorization*.—Inserts a new provision limiting the disbursement of OCO funds to those authorized by the President.

TITLE X
OVERSEAS CONTINGENCY OPERATIONS
BILATERAL ECONOMIC ASSISTANCE
FUNDS APPROPRIATED TO THE PRESIDENT

COMPLEX CRISES FUND

The Committee recommends \$1,000,000,000 for Complex Crises Fund for the extraordinary costs of undertaking counterterrorism partnership efforts, responding to crises, and addressing regional instability resulting from the conflict in Syria, including to rescue scholars, and is designated for Overseas Contingency Operations [OCO]. The Committee authorizes up to 5 percent, in addition to amounts otherwise available, for administrative expenses.

The Committee also provides authority to the Secretary of Defense to transfer and merge funds from the heading Counterterrorism Partnerships Fund in this act to this heading.

INTERNATIONAL SECURITY ASSISTANCE

DEPARTMENT OF STATE

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING ACTIVITIES

The Committee recommends \$278,000,000 for Contributions for International Peacekeeping Activities for the extraordinary costs related to new and expanded international peacekeeping missions, including in the Central African Republic, and is designated for OCO.

FUNDS APPROPRIATED TO THE PRESIDENT

FOREIGN MILITARY FINANCING PROGRAM

The Committee recommends \$75,000,000 for Foreign Military Financing Program for the extraordinary costs of strengthening the capacity of partner states in Europe, including to support security sector reform, and is designated for OCO.

GENERAL PROVISION—THIS TITLE

SEC. 10001. This provision provides that sections 8002 and 8003 of S. 2499, as reported to the Senate on June 19, 2014, shall apply to funds appropriated under this heading.

TITLE XI
OVERSEAS CONTINGENCY OPERATIONS

DEPARTMENT OF DEFENSE—MILITARY CONSTRUCTION, DEFENSE-
WIDE

The Committee recommends \$46,000,000 for “Military Construction, Defense-Wide”, as requested, for a classified project at a classified location.

European Reassurance Initiative Military Construction Proposal.—The funding request for the European Reassurance Initiative [ERI] included a provision allowing the use of up to \$175,000,000 for unspecified military construction projects associated with the initiative. The ERI is funded through Department of Defense Operation and Maintenance [O&M] accounts. The Committee believes that military construction projects should be identified and funded within the appropriate Military Construction account, not with O&M funding over which the Military Construction and Veterans Affairs subcommittee has no visibility or oversight. Therefore, the Committee recommendation does not include a provision allowing the use of ERI funding for military construction. The Department is encouraged to work with the Committee to provide project-level detail, justification, and Military Construction funding requirements for any projects required to support the ERI.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI OF THE
STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill “which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.”

The Committee recommends funding for the following accounts which currently lack authorization for fiscal year 2015:

Military Personnel, Army
Military Personnel, Navy
Military Personnel, Marine Corps
Military Personnel, Air Force
Reserve Personnel, Army
Reserve Personnel, Navy
Reserve Personnel, Marine Corps
Reserve Personnel, Air Force

Support for International Sporting Competitions
Office of the Inspector General
Central Intelligence Agency Retirement and Disability System
Fund
Intelligence Community Management Account
Complex Crises Fund
Contributions for International Peacekeeping Activities
Foreign Military Financing Program
Military Construction Defense-Wide

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE
STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include “(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the Committee.”

The Committee bill as recommended contains no such provisions.

BUDGETARY IMPACT OF BILL

PREPARED IN CONSULTATION WITH THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a), PUBLIC LAW 93-344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays	
	Committee allocation	Amount in bill	Committee allocation	Amount in bill
Comparison of amounts in the bill with the subcommittee allocation for 2015: Subcommittee on Defense:				
Mandatory	514	514	514	¹ 514
Discretionary	489,605	549,324	523,730	¹ 550,504
Security	489,413	547,779	NA	NA
Nonsecurity	192	1,545	NA	NA
Projections of outlays associated with the recommendation:				
2015	² 346,859
2016	118,085
2017	43,714
2018	20,669
2019 and future years	15,349
Financial assistance to State and local governments for 2015	NA	NA

¹ Includes outlays from prior-year budget authority.

² Excludes outlays from prior-year budget authority.

NA: Not applicable.

NOTE.—Consistent with the funding recommended in the bill for overseas contingency operations and in accordance with section 251(b)(2)(A)(ii) of the BBEDCA of 1985, the Committee anticipates that the Budget Committee will provide a revised 302(a) allocation for the Committee on Appropriations reflecting an upward adjustment of \$59,719,000,000 in budget authority plus associated outlays.
